To Our Thousands of Garden Loving Friends:

GREETINGS FOR THIS YEAR OF 1932 I

It's going to be a glorious year for gardens. The rains have fallen early and abundantly, spaced at kindly intervals so the thirsty earth might drink them to the last drop. Deep snows on the mountains promise plentiful water for the summer. Springtime will find the fields of California a starry carpet of wildflowers. And our gardens will thrive with new vigor and gaiety because Nature has been kind to them.

So it is with new enthusiasm that we present our Catalogue for 1932. We know you will enjoy perusing it, thumbing its pages under the mellow lamp light while you dream your gardens in advance, checking back on its helpful hints when the thrill of planting really begins, finding in it the answer to your many garden questions and the inspiration, we hope, for much of colorful beauty.

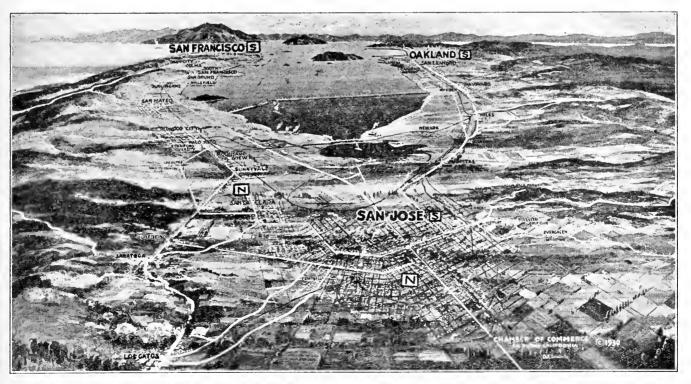

As you compare this with previous Catalogues, you will find listed many new garden beauties, and many improved varieties in the old garden favorites. Also, you'll notice new low prices on hundreds of items, made possible by your continued patronage and the steady addition of new customers.

We've been friends for nearly half a century, your garden and Navlet's. As we greet you for 1932, it is with a feeling of genuine appreciation for your confidence in the past, and a renewed pledge of high standards of service that may continue to merit that confidence in the future.

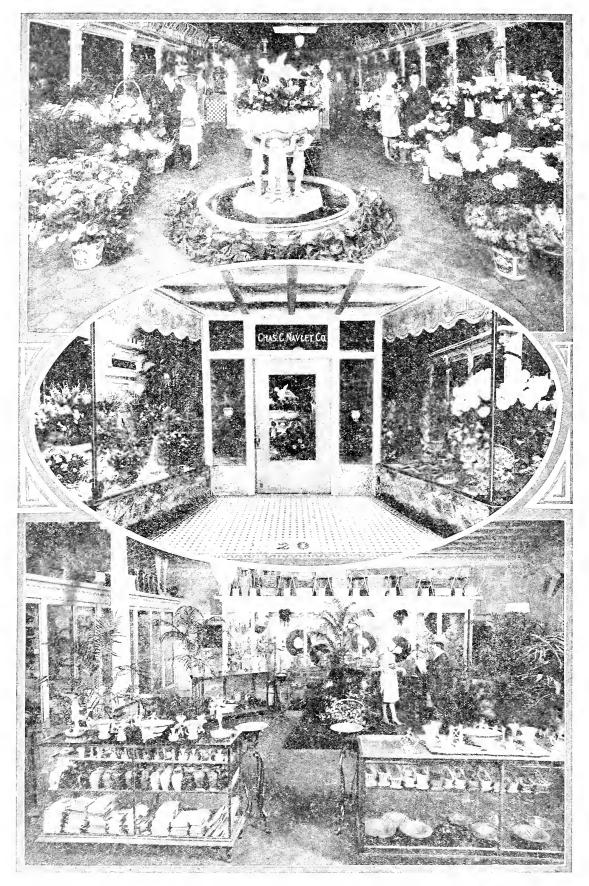

And may we add the friendly hope that your garden this year will linger long in your memory as the perfect unfolding of quiet beauty!

Yours in friendly service,

CHAS. C. NAVLET CO., Inc.

This aerial photograph shows the extent of Navlet's facilities for prompt service: 3 Retail Stores (marked S) in San Jose, San Francisco and Oakland, and 2 large Nurseries (N), one in San Jose on Prevost Street near Auzerais, the other on the San Francisco Highway between Santa Clara and Sunnyvale,—5 establishments devoted to Growing Service. A hearty welcome awaits you everywhere.

Scenes from our beautiful Flower Shop in San Jose, at 20 to 22 East San Fernando Street. A hearty welcome and courteous service await you here, as well as at our sto es in San Francisco and Oakland.

"Say It With Flowers"

And if the Flowers be from Navlet's, you may be sure it will be said gaily, lavishly, or sympathetically, as the case may be.

For nearly half a century, Navlet's has been intimately associated with the joys and sorrows of thousands of California families. Life and death, births, weddings and funerals, civic ceremonies and private functions have all been enacted against a backdrop of flowers—Navlet flowers Forty-seven years of service have taught us much of the richness of human relationships and the art of expressing those relationships in the language of flowers. Truly, we know how to "say it with flowers".

SAN FRANCISCO

When You Place Your Order

Please read these suggestion and instructions carefully before ordering. We make every effort to fill your order exactly as specified. We will appreciate your exercising every care in placing your order accurately.

I.—Use the Order Blank or Write Us a Letter

If you like an order blank, use it. If you want to give us more complete information, or ask questions or advice, write us a letter.

Either way, we'll be glad to hear from you.

And we'll answer you promptly.

If you want more order blanks, ask for them, and we'll gladly send them.

2.—Our Nurseries and Packing Plant are located in San Jose.

(Mail address 20-22 East San Fernando Street.) Orders for plants, shrubs, bulbs, seeds, etc., sent here get immediate attention, while orders sent to the other stores must be forwarded here, thus causing delay.

Note the exception—Cut Flowers should be ordered from the store that's nearest you. Each of our stores maintains a staff of skilled floral artists.

3.—Write your own language.

We can answer correspondents in their own language. French, German, Italian, Spanish or Portuguese may be used.

4.—Write name and address plainly.

Many delays occur because of insufficient address. Print or write your name carefully, then give street address or R. F. D. route, city or town, county, and State.

5.—How to send money.

Amounts of \$1.00 or less may be sent in stamps. If you send currency or silver, be sure to send by registered mail.

Postoffice or Express Money Orders or Bank Drafts are

equally satisfactory, and need not be registered.

If you send a Cashier's Check or Bank Draft drawn by your home-town bank, have it made payable to yourself and then endorse on the back "Payable to Chas. C. Navlet Co." This will help to avoid possibility of error, and give us a record of whom the check is from.

6.—Non-warranty.

We exercise due care in selecting our seed, plants, bulbs and trees, but we give no warranty, expressed or implied, as to description, quality, productiveness, or any other matter on any merchandise we sell, and we cannot be responsible in any way for the crop.

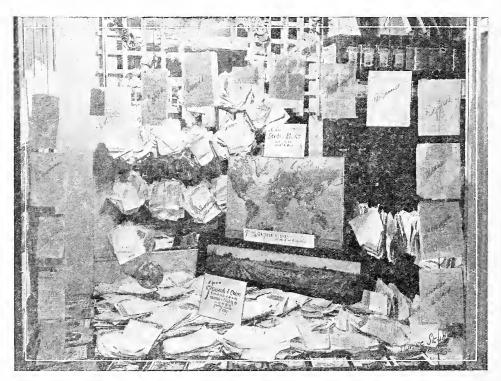

If the purchaser does not accept the goods on these terms, they are at once to be returned.

7.—Safe arrival assured.

We hold ourselves responsible for the safe arrival of goods in first-class condition. Our packing is in the hands of experts. If the goods do not arrive in first-class condition, kindly return them with the wrapper, at our expense, and the order will be immediately refilled.

8.—Early ordering appreciated.

If you can anticipate your needs, and place your order early, we will appreciate it. We handle a tremendous volume of mail order business during the planting seasons. By ordering early you get extra special attention.

From the far-flung corners of the world, orders come in to Navlet's for Flower Seeds, Vegetable Seeds and Nursery Stock. This photograph of actual orders received in a single season from practically every country of the world presents vivid testimony of the confidence our customers have in Navlet's dependability, strict adherence to high quality, and painstaking care in filling and shipping of orders.

Superb New Flower Creations

Marvelous new varieties introduced by Navlet's to add interest and beauty to your garden

Always on the alert for what is newer, more beautiful. more interesting, Navlet's this year presents the largest collection of Specialties and Novelties that it has been our privilege to offer for many years. On this and the two following pages you will find many glorious new flower creations, and more beautiful developments of some of the old garden favorites. We know every garden lover will hail them with delight. And because they are more beautiful, we feel that they will add materially to California's fame as the home of gorgeous flowers.

WE PREPAY POSTAGE ON ALL FLOWER SEED ORDERS

ALLWOODII ALPINUS

The wonderful Fairy Plant for growing in Rockeries, Stone Walls, Terraces, Wall Gardens and all forms of Alpine Gardens. Perpetual flowering from Spring to Winter; retains its silvery, moss-like foliage at all seasons. Does not exceed 4 to 6 inches in height, while a two-year old plant will not spread more than 6 Inches in diameter. Loves the Sun and a well-drained situation. Soil should be rich and contain lime, nothing else. Choice Mixture of named varieties all of Dianthus character, in blush, mauve, reddish-pink, pale cerise, white, pale pink, maroon, purple. Pkt. 50c.

ARCTOTIS HYBRIDA (Novelty) (A)

Undoubtedly this new variety of Arctotis, which we are offering here, is one of the most beautiful novelties introduced during the last few years. Height about twelve inches. The flowers are of beautiful shades of colors with dark disk at the center. The leaves are crested and fringed, on the upper part of a green and underneath a silvery color. The rich and abundant flowering will make this plant very popular. Pkt. 35c.

ASTER AURORA-GOLDEN QUEEN

New class of Aster with large flowers, full of petals. The petals at the extremity are large and flat. All the other petals are quilled Height of plant about 24 inches with upright stems. Excellent as cut-flower. This Aster has great merit. As the name implies, the color of this new Aster is a combination of yellow and creamywhite, the extreme petals are creamy white and the center or quilled petals are yellow. Pkt. 35c.

BEGONIAS (Tuberous)

Gold Medal Choicest Singles in mixture. Pkt. 75c.

Gold Medal Choicest Doubles in Mixture. Pkt. 75c.

Gold Medal Choicest Hanging Basket type in mixture. Pkt. 75c.

Gold Medal Choicest Single Crested in Mixture. Pkt. 75c.

Gold Medal Choicest Heavily Frilled Single in Mixture. Pkt. 75c.

CAPSICUM (Ornamental Pepper) (A)

LAMPION—The shape of the small peppers are lamp-shaped, and each pepper has a range of coloring. Per pkt. 25c.

COLUMBINE (Aquilegia)

EXHIBITION TYPE—(Special long-spurred), an unsurpassed grand strain in colors varying from white, pink, salmon, pale and deep blue, rose, orange, yellow and many more beautiful combinations of these shades. Mixed 75c pkt.

DAISY (Bellis) (P)

DOUBLE MONSTROUS IDYLLE—(Radiata)—Peculiar novelty which consists in the fact that half of the petals are open and half are quilled. Dark red in color. Pkt. 35c.

DOUBLE MONSTROUS GIGANTEA ALBA—The largest flower-Daisy of all other similar varieties. Very long stems, about 10 to 12 inches long. Delightful as a cut flower. It looks like a small Aster. White ln color. Pkt. 35c.

MONSTROUS DARK ROSE—The flowers are very large in size and of a dark rose in color. Pkt. 25c.

The "Guinea Gold" is a brilliant new Marigold with practically no odor.

DIANTHUS (Sweet Wivelsfield) (H.A.)

An outstanding novelty of very easy culture. Blooms the first year from seed. A cross between Dianthus Allwoodi and Dianthus Barbatus (Annual Sweet William). About 18 inches tall. Not unlike Sweet William, but distinct in habit, freedom from growth method of flowering and formation of trusses. Few plants can compare with it for brilliant colorings and markings. Predicted to become as popular as Snapdragons, Stocks and Asters. Our own importation of Originator's seed. Pkt. 50c.

DELPHINIUMS

Easily the world's best. Gold Medal Collection of Best Hybrids. Pkt. 75c.

New Introductions and Importations

Unusual varieties and gorgeous new colorings that every Garden lover will hail with delight

This is the new Blue Perennial Poppy, a glorious sky-blue in color.

ECHIUM

(TOWER OF JEWELS)—A hardy biennial which grows easily and in poor soil, producing a spike of flowers 4 to 6 feet tall and about a foot in diameter at the base. This native of the Canary Islands is most unusual. Do not confuse it with E. plantagineum and E. creticum which are annuals. The leaves are silvery white, covered with fine hairs. The bloom spike is literally covered with thousands of small rose pink flowers in spiral rows. Pkt. 75c.

FOXGLOVE

"Shell Pink" Originator's seed of this remarkable introduction. Color that is found in sea shells with warm pleasing tones. Awarded medal by RHS as best introduction in two years. Our offering. Pkt. 50c.

A STATELY NEW HOLLYHOCK (H.P.)

DOUBLE IMPERATOR—A striking, entirely original variety. Flowers 5½ to 6½ inches across, suggesting a giant crested Tuberous Begonia. Unusual tints of striking beauty; cerise-salmon with rosy-cream center; delicate pink with rosy-yellow center, light yellow flushed rose with canary center, etc. Branched from base, so that lateral stems can be utilized in vases for decorative purposes. Our own importation of Originator's seed. Per pkt. 35c.

CARNATION FLOWERED MARIGOLD (H.A.)

GUINEA GOLD—An entirely new very distinct type of Marigold. Graceful pyramidal habit, 2½ feet high, producing 30 to 40 flowers, 2 to 2½ inches across, of a brilliant shade of orange flushed with gold. All double and semi-double flowers. Marigold odor practically eliminated. Our own importation of Originator's seed. Per pkt. 35c.

All double Orange and All double Lemon—African Marigolds developed ninety to one hundred per cent double from seed. Flowers are enormous in size. Per pkt. 35c each color.

DOUBLE NASTURTIUMS

GOLDEN GLEAM—Large golden yellow flowers 2½ to 3 in. across, borne on stiff stems 6 inches long, and standing well above the foliage. Plant forms large, vigorous bush, throwing out runners averaging 18 inches. In full bloom it is a blaze of color. Full double flower, very fragrant. Per pkt. 25c.

NAVLET'S MAGNIFICIENT NEW PANSIES (H.A.)

NAVLET'S "RAINBOW GIANTS"—Consistent prize winners, shown for the first time last Fall. Gigantic size, perfectly formed of splendid substance and texture, vigorous in growth, rugged long stems and long blooming season from early spring through Summer until fall if blooms are constantly picked and plants well fed. The crowning glory of this new and improved strain is the rainbow of colors including many new and beautiful shades. Easy to grow from seed. These sensational Pansies are destined to take their place at the head of the list of fine strains of Pansies. Pkt. \$1.00.

"PURE GOLD"—The largest yellow Swiss Pansy grown, a rich pure golden yellow with flowers of enormous size in long vigorous stems, gracefully surmounting the foliage Put 500

"ALPEN GLOW"—A wonderful bright garnet red Swiss Novelty, velvety texture with beautiful dark blotches. Very striking and attractive. A real giant in size. Pkt. 50c.

"ULLSWATER" (Thuner Sea Blue, Lake or Thun)—A giant Swiss, solid blue with the blue black center, by far the largest and most magnificent of all blue. Giant Pansies. Pkt. 50c.

JUMBO—This new Giant surpasses any Pansy we have ever seen in size of blooms and vigor of growth. Range of colors is well balanced, the blooms held on long, stout stems. When planted in a rather cool, moist situation, in rich soil, blooms will average 3½ inches across. The largest blooms grown from this wonderful strain measured 4½ inches across. A sensation wherever shown. Pkt. \$1.00.

A NEW BLUE PERENNIAL POPPY

MECONOPSIS BAILEYII—The beautiful new perennial Poppy from Thibet. Broad, sea-green leaves and four-petaled blooms of a glorious sky-blue color, enhanced by golden-yellow center. Grows 2 feet high, likes a moist, well-drained, half shady position in the garden. Our own importation. Per pkt. 50c.

PRIMROSE and POLYANTHUS

BLUE PRIMROSE—A rare variety of these beautiful Spring free-flowering plants, delighting in a cool, rich soil and sheltered shady positions. Including pale, medium and deep blue colors. Pkt. 40c.

MALACOIDES SUPERBA-A new and improved variety; color is deep rosy pink. Pkt. 25c.

FLAME POLYANTHUS—A novel range of color in these charming spring-flowering plants ranging from orange to vivid scarlet, very bright and attractive. Pkt. 40c.

The flaming Salvia "Harbinger" blooms until frost

Magnificent New Varieties

Flower Novelties and Specialties introduced by Navlet's or imported from the far corners of the world to glorify your garden

The Venidium Fastuousum, a new Daisy type of flower, has petals of gigantic size.

SALVIA Splendens "HARBINGER"

NOVELTY—Sow seed in February. In June the plants will produce a profusion of long spikes with dazzling bright scarlet flowers, and maintain a blaze of color until frost. The plants are dwarf and compact in habit and the strong dark foliage forms an effective foil to the vivid hue of the flowers.

Per Packet 25c postpaid

SCABOSIA

GIANT LOVELINESS—A glorious new color in annual Scabiosa. The blossoms range through varying tones of soft delicate salmon rose. This is one of the most beautiful Scabiosas ever introduced. Unsurpassed as a cut flower. It has long, stiff stems and a delightful fragrance. Pkt. 35c.

COLUMBARIA—The beautiful Scabiosa with rosy-mauve blooms. Flowers are very large, measuring 2 to 2½ inches across, and foliage is lacy and decorative. Excellent for cutting. Pkt. 50c; 1/4 oz. 75c, postpaid.

SNAPDRAGON (Maximum)

MAXIMUM—Salmon Rose—This color is always the most popular in flowers, a beautiful shade of Salmon combined with Begonia rose. Plants have a vigorous habit and flowers are immense. Per pkt. 25c.

ANTIRRHINUM (New Majestic Type)—Very large individual flowers, very symmetrical and dense. Plants semi-tall. Spikes very heavy, excellent for cutting. In the following colors: Twilight, apricot; Orange King, orange; Eldorado, golden yellow; Golden Dawn, golden buff; Red Chief, deep scarlet; Rose Marie, salmon rose; Majestic Mixed. 25c each per pkt.

SWEET WIVELSFIELD (See Dianthus, Page 5)

TIGRIDIA PAVONIA (Mexican Shell Flower) (H.P.)

Lily-like blooms of unusual beauty, thriving in full sun. Colors run from salmon-red to salmon-pink, the throat usually shading to canary or orange-yellow, tiger-spotted with blotches of rich brown. Grows 2 feet high. Blooms throughout the Summer. Bulbs 20c each; \$2.00 per doz. Seed, 25c per pkt.

URSINA ANETHOIDES

Grows 1 foot high. Brilliant orange, colored, Daisy-like flowers, 2 inches across, borne above dwarf, finely-cut foliage on long wiry stems. Fine for cutting. Our own importation. Per pkt. 35c.

VENIDIUM FASTUOUSUM

Grows 2 to 3 feet high. Thrives in full sun. Rich, orange-colored Daisy-like flowers, marked with purple-black zone at base of petals, averaging 4 to 5 inches across. Silky grey foliage. Our own importation. Per pkt. 50c.

NAVLET'S GORGEOUS NEW VIOLAS

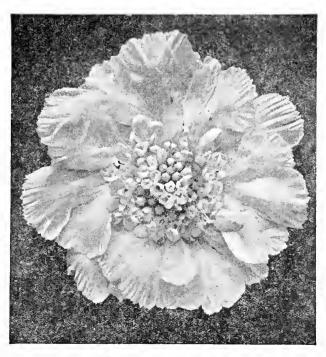

"LAVENDER GEM" (Viola Cornuta)-A new soft deep shade of lavender, not unlike that of the well-known tufted Pansy "Maggie Mott," but having all of the desirable drought-resistant qualities, continuous profusion of long lasting bloom of "Jersey Gem" and other Cornuta varieties. Pkt. 50c.

"LORD NELSON" (Viola Cornuta)-A new glowing violet purple with long stems and all Cornuta characteristics described above under "Lavender Gem". Pkt. 25c.

"SCOTCH STRAINS MIXED"-Containing all of the newest and choicest bedding hybrids in a wonderful range of color. Pkt.

ZINNIA SCABIOUS FLOWERED

This NEW Zinnia is entirely different to all the other classes. The plant reaches a height of about forty inches and is of abundant flowering. Its curiosity consists in the form of the flowers. as the outer ring is formed of long petals, whereas the center shows many small flowers, which at first sight have a great likeness with the Scabiosa. Pkt. 50c.

Scabiosa Columbaria has a delicate charm in color and form.

Navlet's Choice Vegetables

15 Pages of Our Own Finely Selected Varieties of Vegetable Seeds and Plants, Developed for Home and Market Cultivation

For delicious crispness and fine fresh flavor, and for important For delicious crispness and fine fresh flavor, and for important considerations of health, there's nothing better than a supply of fresh green vegetables grown right in your own home garden. And for the man whose work is sedentary, the easy outdoor exercise of caring for a vegetable patch is a recommendation in itself. With a minimum of expense you can enjoy fresh tender vegetables the year round, with an ample abundance for canning season, too. A home vegetable garden takes little space, little labor, little expense, but the rewards are big!

Prices are Postpaid to the 4th Zone on Navlet Vegetable Seeds at the following ounce, 1/4 lb., 1 lb., and 10 lb. prices.

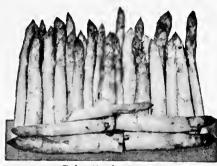

ARTICHOKES

Plant from February to May

LARGE GREEN GLOBE-Most Popular Variety. Highly esteemed for its delicate flavor and large, flowered heads, which are cooked like Asparagus. Pkt. 15c; oz. 90c; 1/4 lb.

ARTICHOKE ROOTS

LARGE GREEN GLOBE—The most popular variety, delicately flavored. 15c each; 12 for \$1.25, postpaid. Or 12 choice plants for \$1.00, express collect.

Palmetto Asparagus

ASPARAGUS

Plant from February to May

CONOVER'S COLOSSAL ASPARAGUS—A well-known variety of quick growth. Mammoth plant, producing from 30 to 50 tender sprouts of excellent quality.

Pkt. 10c; oz. 20c; ½ lb. 35c; 1 lb. \$1.00.

MARY WASHINGTON—A new variety which has proven to be nearly rust free. The plants form thick, large, heavy shoots, dark green and of fine flavor. Pkt. 10c; oz. 20c; ½ lb. 55c; 1 lb.

PALMETTO—Originally from South Carolina, found best adapted for the Pacific Coast. Grown extensively for the markets on the Coast on account of being two weeks earlier than other varieties; sells at higher prices, an average bunch of 12 shoots measuring 12 inches in circumference. Earliness, mammoth size, prolific and regular bearing make it a desirable variety. Pkt. 10c; oz. 20c; 1/4 lb. 35c; 1 lb. \$1.00.

ASPARAGUS ROOTS

Ready for immediate delivery. 35c per doz.; \$2.50 per 100, post-paid, or \$2.25 per 100, express collect.

FINEST QUALITY SEEDS

We prize the confidence of our customers too highly to sell any but the highest grade seeds. Therefore, we exercise the greatest care to have all seeds true to name, full of life, and absolutely reliable. We are constantly testing to insure the quality of the seeds we sell. And we give you big, well filled packets—a generous money's worth always at Navlet's.

Suggestions for Ordering

Small Orders. If you want only a single packet or two, do not hesitate to order. We welcome small orders as well as large ones.

Large Orders. Dealers, market gardeners, institutions and individuals desiring to buy seeds in large quantities will find it to their advantage to write us for quotations.

Order Early. Don't put off sending for the seeds you want. Order them right away and have them ready when planting time arrives.

Non-Warranty. We exercise great care to have all seeds pure and reliable, but we give no warranty, expressed or implied, as to description, quality, productiveness, or any other matter of any seeds, bulbs, trees or plants we send out, and we will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms, they are at once to be returned.

For VEGETABLE SEED BARGAINS see inside Front Cover.

BROCCOLI (Cauliflower Type)

Pkt. 10c; oz. 90c; 1/4 lb. \$3.00

EARL LARGE WHITE CAPS—Large close heads creamy white and of excellent flavor. This variety is the most generally culti-

EARLY PURPLE CAPS—Very hardy. Fine greenish-purple heads. Good flavor.

BROCCOLI (Sprouting) Pkt. 15c; ¼ oz. 75c; oz. \$2.50

A distinctly different type, producing a large compact bunch of green buds in the center of the plant, instead of the usual cauliflower head. After this central bunch is removed and used, the plant throws out numerous branches, bearing small compact clusters of buds. These are the crop proper, the branches being cut off to 6 or 8 in. lengths and tied in bunches like asparagus. For servia, trim the larger leaves, boil 20 minutes, and serve like asparagus. Sow in Spring for July and August crop, and in June for Winter crop. Sow in seed bed and transplant like cabbage.

TWO BEAN VARIETIES

That provide delicious food as well as furnishing ornamental arbor growth

Guinea Bean

CELESTIAL BEAN-Sometimes called Yard Long Bean. Of Chinese origin. A good table Bean, its rank growth makes it excellent for arbor covering. Pkt. 25e; 1/4 lb. 75e, postpaid.

GUINEA BEAN-When used as a vegetable, Beans should be picked when about the size of cucumbers, and cooked like Summer squash. If allowed to grow for ornamental purposes, the Bean will grow to 4 or 5 ft. length. Vine grows rapidly, averaging 50 to 75 ft. per season. Pkt. 10c, postpaid.

Beans Fresh from the Garden

have a crispness and flavor no others can equal

The fresher the better—and they're so easy to grow Take your choice among these splendid varieties of Dwarf Beans, Pole varieties and Limas.

Market growers who wish larger quantities than are listed here are asked to write for quantity price quotations.

Postage Paid up to 10 lbs. (up to 4th Zone) Plant Beans from March to August

DWARF GREEN PODDED

Pkt. 10c; 1/4 lb. 15c; 1/2 lb. 25c; 1 lb. 45c; 10 lbs. \$3.75

- BURPEE STRINGLESS GREEN POD—An early maturing, round flesh, podded variety of fine quality. Pods straight, brittle and entirely stringless. Rivals the bush varieties.

 DWARF HORTICULTURAL OR CRANBERRY—Absolutely stringless and most desirable for cooking when young. Pods are of medium length and slightly curved The dry beans are large, oval and nearly covered with splashes of bright red.
- EXTRA EARLY REFUGEE, or 1000 to 1—The earliest strain of this popular variety by ten days. The pods are nearly round, pale green in color, 5 inches long, tapering to a slender point. They are quite solidly fleshy, brittle, tender and mild in flavor.
- EXTRA LONG YELLOW SIX WEEKS—A very early standard variety, much prized for its productiveness and excellent quality. The green pods ar often eight inches long, tender and brittle. Vine vigorous and branching. Beans long kidney-shaped.
- FRENCH STRING BEAN—A hardy green-podded variety, with black seed. Is much esteemed by the Italian market gardeners for a very productive string bean and a good shipper.
- EXTRA EARLY TENDER PODDED RED VALENTINE—America's Standard Dwarf Snap Bean—Fully 10 days earlier than the old popular Valentine Bean. A popular variety; erect vine with dark green leaves. Pods of medium length; fleshy, round and saddle-backed, with only slight strings. Seed pink, marbled with red.

Pkt. 10c; 1/4 lb. 15c; 1/2 lb. 25c; 1 lb. 45c; 10 lbs. \$3.75

- DAVIS WHITE WAX—The most hardy and productive wax podded variety. The pods are very long and yellow, and while not stringless, it is a remarkably good bean for shipping; seed white, and on that account is desirable for a sheller bean in Winter
- IMPROVED GERMAN BLACK WAX—An improved stock of the old Black Wax. The pods are beautifully rounded, meaty and deeply saddle-backed. The flesh is brittle, solid, and entirely stringless. Exceedingly arly and enormously productive.
- IMPROVED GOLDEN WAX—Heavy yielder. Pods thick and stringless. Dark rich golden-yellow color, and of perfect shape. It is of grand quality, showing no string or coarseness. It is of tender, melting flavor at all stages of its growth.

CHOICE POLE BEANS

1/4 lb. 15e; 1/2 lb. 25e; 1 lb. 35e; 10 lbs. \$3.00

- BURGER'S POLE—A new Pole variety of great merit. Bears long, brittle, stringless pods of excellent flavor. It rivals all other Pole Beans and is destined to become the most popular.
- HORTICULTURAL OR SPECKLED CRANBERRY—A late and very productive sort. It is a very strong grower, bearing a profusion of large, fleshy, dark green pods, which, as they become older, are brightly marked with rich carmine flakes and stripes. It is a "double purpose bean," and will furnish a large supply of delicious Shell Beans to use in the green state during the Summer months or dried for Winter. Pods grow from 6 to 8 inches in length.
- ter. Pods grow from 6 to 8 inches in length.

 KENTUCKY WONDER OR "OLD HOMESTEAD"—A marvel of productiveness from July until frost. King of Pole Beans. The best and most popular Pole Bean in cultivation. It grows luxuriantly and is enormously productive, the pods hanging in great clusters from top to bottom of pole. Color, green; stringless.

 KENTUCKY WONDER WAX—An exceedingly productive variety, bearing a large quantity of rich golden-yellow pods which are thick, stringless and very tender.
- WHITE CREASEBACK—Or rapid growth and very productive. One of the best early green-podded Beans for snapshorts. The silvery-green pods grow in clusters and are from 3 to 6 inches long, perfectly round, and deeply creased or "saddle-backed." They are solidly round, entirely stringless, and of finest quality. The dry seed is pure white and excellent for Winter use.
- SCARLET RUNNER BEAN—Favorite English Climbing Bean. Scarlet tender. Also as an ornamental climber. Pkt. 10c; 1 lb. 40c; 10 lbs. \$3.50.

BUSH AND POLE LIMAS

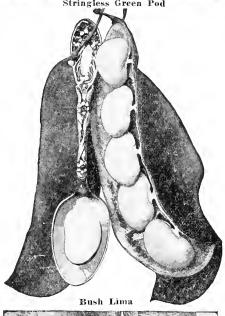

Plant from August to March

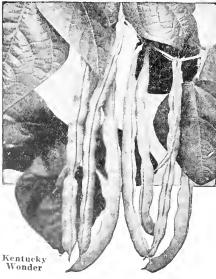

- BURPEE'S IMPROVED BUSH—This Bean produces magnificent crops of pods, which measure from 5 to 6 inches long, by 1¼ inches wide. The pods and beans are very large, while the beans, either green or dry, are very thick. The dried beans are very handsome, and sometimes show a greenish-white coloring. Pkt. 10c; ¼ lb. 15c; 1 lb. 45c; 10 lbs. \$4.00.
- FORDHOOK BUSH LIMA—An improved form of Dreer's Bush Lima, the pods and beans being larger. The plant is of a strong, upright growth, bearing its thick sweet beans in clusters of 2 to 5, well out from the plant, on long spikes. Pkt. 10c; 1/4 lb. 15c; 1 lb. 50c; 10 lbs. \$4.50.

 HENDERSON'S BUSH LIMA—Extremely early and enormously productive. Ready for the table or market from 2 to 3 weeks ahead of any other Climbing or Bush Beans, and bears continuously throughout the Summer until killed by frost. Immense yielder; handsome, large pods well filled with very large Beans of most luscious flavor. It excels in quality, quantity and earliness. 1/4 lb. 15c; 1 lb. 40c; 10 lbs. \$3.50. 10 lbs. \$3.50.
- NG OF THE GARDEN (Pole)—One of the most popular main crop varieties. It is a medium early sort, with well-filled pods, 5 to 6 inches long, filled with 4 to 5 good-sized Beans. The vines are very hardy. Heavy cropper. Pkt. 10c; 1/4 lb. 15c; KING OF THE GARDEN (Pole)-1 Ib. 40c; 10 Ibs. \$3.50.

Here Are Choice Varieties of Beets

Navlet's selected strains offer the best for home or market growing

Beet seed should be planted about two inches deep. The rows for hand cultivation should be 18 inches apart and the plants in the rows, after thinning, about five inches apart. It takes about one ounce of seed for 50 feet. The seed should germinate in about 15 days, depending on conditions.

BEST TABLE VARIETIES

- EXTRA EARLY ECLIPSE BLOOD TURNIP—The ideal table Beet—fine grained, rich, red flesh exceedingly tender and delicious. Remarkably early. A grand money maker. Almost round, with small leaves and tap root, and combines the maximum of edible bulb with the minimum of root and foliage. The color is a very dark blood red and the flesh is delicate, rich and sugary. Extremely early. Pkt. 10c; oz. 20c; ¼ lb. 35c; 1 lb. \$1.00.
- DETROIT DARK RED—A most excellent variety for either the home or market garden. The medium sized roots are smooth and globe shaped; skin dark red, flesh red slightly zoned with a lighter shade. Pkt. 10c; oz. 20c; ¼ lb. 35c; 1 lb. \$1.00.
- IMPROVED BLOOD TURNIP—A selected strain of early Blood Turnip Beet. Flesh is blood red and of excellent quality; remains in good condition for a long time; tops are green. Pkt. 10c; oz. 15c; ¼ lb. 30c; 1 lb. 75c.
- CROSBY'S EGYPTIAN—An Extremely Handsome and Early Table Beet—Root very dark, rounded on top, but flat beneath, and with very small tap roots, flesh dark red with rings of a lighter hue—hard, crisp and tender. Pkt. 10c; oz. 15c; 1/4 lb. 30c; 1 lb. 75c.

Pkt. 10c; 1/4 lb. 20c; 1 lb. 60c; 10 lbs. \$5.50

- FRENCH WHITE SUGAR—A mammoth variety with crisp, snow-white flesh. Very valuable for stock feeding, and excellent for table use.
- KLEIN WANZELBEN SUGAR—This is a wedge-shaped variety and contains a large percentage of saccharine matter; planted more than any other sort for sugar factories; also good for stock feed.

BEST STOCK VARIETIES

- IMPROVED GOLDEN TANKARD—The Best Yellow Mangel in cultivation. A distinct and valuable yellow-fleshed variety, which contains a larger percentage of sugar and nutritive matter than any of the red-skinned sorts. It is more relished by milch cows and sheep than any other. Pkt. 10c; 1/4 oz. 20c; 1 lb. 50c; 10 lbs. \$4.50.
- LONG RED MANGEL WURTZEL—This is an enormously productive variety, yielding from 50 to 70 tons to the acre, a single root often weighing from 20 to 30 pounds. It is the best Long Red Mangel and of the greatest value for stock feeding. Pkt. 10c; 1/4 lb. 20c; 1 lb. 60c; 10 lbs. \$5.50.
- YELLOW GLOBE GIANT MANGEL WURTZEL—Very large and of vigorons growth. The roots have fine necks and very smooth skin. Flesh white, firm, sweet and very nutritious. Grows almost on the surface of the soil, hence is easily harvested and the chunky shape of the roots prevents them from being broken in handling. Pkt. 10c; ¼ lb. 20c; 1 lb. 60c; 10 lbs. \$5.50.

BRUSSELS SPROUTS

Plant from January to April and July to October

IMPROVED DWARFS—This variety is a great improvement. It is of sturdy growth and produces abundantly large, solid sprouts. Are ready for gathering from Junesown seed the same season. Cook same as cauliflower. Pkt. 10c; oz. 30c; 1/4 lb. 90c; 1 lb. \$2.75.

CARDOON

LARGE SMOOTH—The best variety, grows about 4 feet tall. The leaves and stems must be blanched like celery to bring out the delicate flavor. Sow in Spring in drills 1 inch deep and when one year old transplant into well-manured ground in rows 3 feet apart and 1 foot apart in the row. Pkt. 10c; oz. 50c; 1/4 lb. \$1.50.

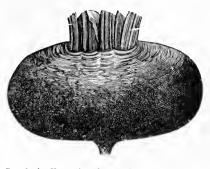

CHARD

Pkt. 10e; oz. 20e; 1/4 lb. 35e; 1 lb. \$1.00

Much valued as a poultry food. Also greatly superior to the common beet for greens, and better than spinach for summer use. Plant the year around.

SEA KALE OR SPINACH BEET—Grows continuously, year after year. For poultry, or table use. Easy to wash and prepare.

WHITE RIB-Chard with large pale green leaves with white rib. Very tender and good.

Crosby's Egyptian is a crisp, tender Beet

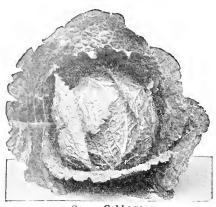

The Blood Turnip Beet has a fine grained flesh and excellent color.

Chard, with its tender leaves, deserves a more important place as a table green

Cabbages and Cauliflower

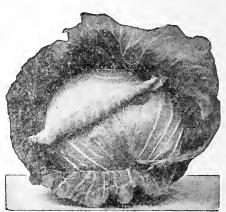

Savoy Cabbage

Plant Cabbage Seed from January to April and July to October. Use plenty of moisture, but not too much, as this causes rot. One ounce of seed grows 2,000 to 2,500 plants. Plant seed first in boxes, half inch deep; transplant when about 6 inches tall; rows 30 inches apart, with plants 24 inches apart.

CABBAGE PLANTS

Early Flat Dutch, Early Winningstedt, Late Premium Flat Dutch, Late Drumhead—strong hardy plants in these choicest varieties. 20c doz., postpaid; \$1.00 per 100, postpaid; \$6.00 per 1,000, postpaid. Delivery year round.

Flat Dutch Cabbage

EARLY CABBAGES

COPENHAGEN MARKET—A new early variety producing fine heads weighing 10 to 12 pounds, very solid and of excellent quality. Pkt. 10c; oz. 30c; ½ lb. \$1.00; 1 lb. \$3.00.

EARLY LARGE JERSEY WAKEFIELD—Most gardeners depend upon this variety for the bulk of extra early crop. Head conical, very compact, solid and of excellent quality. The thick, stout leaves and compact habit make it the best sort for wintering over or for very early setting. Pkt. 10c; oz. 30c; ¼ lb. 90c; 1 lb. \$2.50.

EARLY WINNINGSTADT—A peerless Cabbage for general use. Very hardy and sure to head. Owing to its compact and upright habit of growth and peculiar texture of short, thick leaf, the variety seems to suffer less from the Cabbage Worm than most other sorts. Heads regular, conical, very hardy. Pkt. 10c; oz. 30c; ¼ lb. 90c; 1 lb. \$2.75.

EXTRA EARLY YORK—A grand old standard Cabbage for market and home use. Sure header. Pkt. 10c; oz. 30c; 1/4 lb. 90c; 1

COLLARDS

A Form of Cabbage

Plant September to October; February to May

Extensively grown in the South, where it furnishes an abundance of food for the table and for stock. It forms a large, loose, open head, or a mass of leaves on a tall stem. Freezing does not injure, but rather improves the quality. Pkt. 10c; oz. 15c; 1/4 lb. 35c; 1 lb. \$1.00.

SECOND EARLY CABBAGES

EARLY DRUMHEAD—A leading variety. Sure to head and good to ship. Plant very hardy and compact, with thick, dark green leaves, covered with a dense bloom. Head flat, very solid and of fine quality. Pkt. 10c; oz. 30c; ¼ lb. 90c; 1 lb. \$2.50.

EARLY DWARF FLAT DUTCH—A most valuable second early Cabbage. The plant is short-stemmed, upright and having comparatively few and short leaves, the rows can be set close together. Head large, solid, crisp and tender, maturing with early Summer. Pkt. 10c; oz. 30c; ¼ lb. 90c; 1 lb. \$2.50.

GREEN GLOBE SAVOY—or Curled Cabbage—Particularly adapted for private use, where quality rather than quantity is desired. Tender, crisp and finely flavored. Pkt. 10c; oz. 25c; 1/4 lb. 85c; 1 lb. \$2.50.

WINTER CABBAGES

LARGE LATE DRUMHEAD—Very productive and of the best variety. Produces enormous heads that are as solid as a rock. Can't be beat as a Fall or Winter variety. Pkt. 10c; oz. 25c; 3/4 lb. 85c; 1 lb. \$2.50.

PREMUIUM FLAT DUTCH—A very productive market variety. Makes a large solid head, which keeps long without bursting. Pkt. 10c; oz. 25c; ¼ lb. 85c; 1 lb. \$2.50.

RED CABBAGE

RED DUTCH—A sure bearer. Large, slightly rounded head. Pkt. 10c; oz. 35c; ¼ lb. \$1.00; 1 lb. \$3.50.

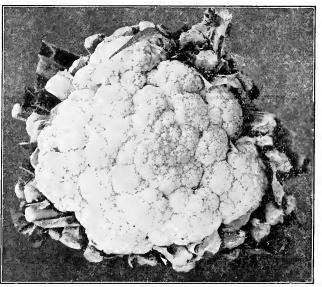

CHOICE SNOWY WHITE CAULIFLOWER

CHAS. C. NAVLET CO.'S EAR-LY DANISH CAULIFLOW-ER—A very dwarf variety, producing large, solid, snowwhite heads. Very tender and fine flavor. One of the earliest. Has proved itself reliable and gardeners can trust it every time. Pkt. 25c; ¼ oz. 90c; oz. \$2.75.

CAULIFLOWER PLANTS

SNOWBALL—Very early snow white Cauliflower. 20c per doz., postpaid; \$1.00 per 100, postpaid; \$6.00 per 1,000. Ready for delivery year round.

Prices postpaid to 4th Zone on Seeds at oz. 1/4 lb., I lb. and 10 lb. prices.

Snowball

SNOWBALL — The best and most popular variety grown. There is a vast difference in the strains of this variety offered. Those who have had trouble with Cauliflower should try our imported Snowball. They are pure snowy-white, with very close, compact curd of extra fine quality. The plant is of strong growth, with erect, pointed dark green leaves, growing closely about the head. Pkt. 25c; ¼ oz. 75c; oz. \$1.75; ½ lb. \$6.25.

VEITCHE'S AUTUMN GIANT CAULIFLOWER—Late varriety. Large heads, firm and well protected by foliage. Pkt. 15c; oz. 65c; ½ lb. 82.00.

For Special Bargain Collections of vegetable seeds, see Inside Front cover.

Choice Carrots and Crisp Celery

bid for a place in your Vegetable Garden

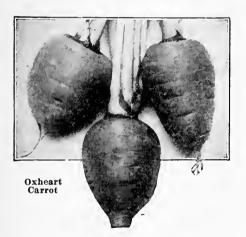

Navlet's Offers 7 Selected Varieties of Improved Carrot Seed

PLANTING SUGGESTIONS

Rich deep soil is best for Carrots and Cauliflower—soil that has not been recently manured. One ounce sows 50 feet of drill. Sow 2 inches deep, in rows 30 to 40 inches apart. Carrots ready for use about 80 days after planting.

- ELY FRENCH FORCING CARROT—Earliest and best variety for forcing. The reddish-orange colored roots are nearly round. When matured they are about two inches in diameter but should be used before they are full grown, when they are tender and delicious. Pkt. 10c; oz. 20c; ½ lb. 50c; 1 lb. \$1.50.
- EARLY OXHEART OR GUERANDE CARROT—A thick Carrot, 5 inches long and very blunt at the lower extremity. It grows very rapidly and the roots attain a weight of more than a pound. It is tender, of delicious flavor, and of a deep red color, and is a variety we can recommend to all market gardeners. Pkt. 10c; oz. 20c; 1/4 lb. 45c; 1 lb. \$1.25.
- HALF LONG TRUE DANVERS CARROT—A handsome cylinderical-shaped Carrot of large size and stump rooted. It is a rich dark orange color, and the flesh is very close in texture with little core. It is a first-class Carrot for all soils, and under good cultivation has yielded from 25 to 30 tons per acre, with the smallest length of root of any now grown. More easily harvested than the larger types. Pkt. 10c; oz. 15c; ¼ lb. 45c; 1 lb. \$1.25.

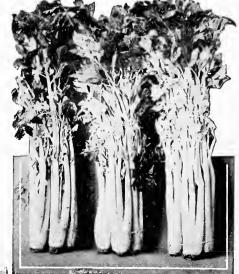

- CHAS. C. NAVLET CO.'S ORANGE COLORED CARROT—A tremendous cropper. A wonder for its earliness. This variety is a cross between Long Orange and Oxheart. It grows about 4 inches across the shoulder, 9 to 11 inches long, and tapers slightly to the bottom and very stump-rooted. The color is of a very bright orange. Pkt. 10c; oz. 20c; ¼ 1b. 45c; 1 lb. \$1.25.
- IMPROVED LONG ORANGE CARROT—Standard Late Sort—Roots 12 to 15 inches long. A good variety for the table and market. Pkt. 10c; oz. 20c; ¼ lb. 45c; 1 lb. \$1.25.
- NANTES—A very superior Carrot. It is coreless, brittle, fine-grained and of fine mild sweet flavor. The color is reddish-orange and the skin is smooth. It is 6 inches long, cylindrical and very stump-rooted. Pkt. 10c; oz. 20c; 1/4 lb. 45c; 1 lb. \$1.25.
- WHITE BELGIAN CARROT—Grows largely above ground, making it easy to harvest. This Carrot is enormously productive, the roots attaining a surprising size. Pkt. 10c; oz. 20c; 1/4 lb. 35c; 1 lb. \$1.00.

CELERY PLANTS

GOLDEN SELF-BLANCHING—A very satisfactory variety, golden yellow in color, with thick, crisp stalks, free from stringiness. Ready for delivery the year round. Plants 25c per doz., postpaid; \$1.50 per 100, postpaid.

CELERY

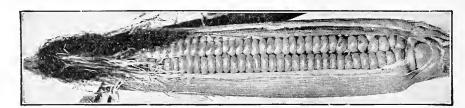

- PLANTING INSTRUCTIONS—Celery seed should be planted in a seed bed or box and when about 6 inches tall transplanted in rows 12 to 18 inches apart. The rows 18 to 24 inches apart for home garden. For horse cultivation see instruction on page 89. Seed should not be planted deeper than one-half inch. Plant from February to May, or September and October.
- WHITE PLUME—Earliest variety. It blanches naturally without banking up. It has no rival for earliness, beauty, flavor and texture. If the stalks are drawn together when the palnt is three-fourths grown and the soil is drawn to or pressed around the plant, it will soon be fit for use. Pkt. 10c; oz. 35c; ¼ 1b. \$1.00; 1 1b. \$3.00.
- GIANT PASCAL CELERY—This is a green-leaved variety developed from the Golden Yellow Self-Blanching and is an excellent sort for Fall and Winter use. It blanches to a beautiful yellowish-white color, is very solld and crisp and of fine nutty flavor. Pkt. 10c; oz. 35c; ¼ lb. \$1.00; 1 lb. \$3.00.
- GOLDEN PLUME OR WONDERFUL—A yellow Celery, in many respects resembling the Dwarf Golden Self-Blanching. Is about two weeks earlier. Larger bunch and blanches easier and whiter. Full hearted and stocky and of the finest table quality. Especially recommended for home gardens. Pkt. 15c; oz. \$1.50; 1/4 lb. \$3.00; 1 lb. \$9.00.
- GOLDEN SELF-BLANCHING—(Paris Golden)—This grand variety is of French origin. It is not quite as early as White Plume, but is of heavier and more compact growth and possessed the same self-blanching characteristics. The stalks are thick and brittle—the hearts large and solid. Outer seed is a very select California grown strain and will give superior results and satisfaction. Pkt. 10c; oz. 75c; ½ lb. \$2.00; 1 lb. \$7.50.
- LARGE WHITE SOLID—A large, vigorous-growing Celery. The stalks are white round, very crisp free from stringiness or bitterness, perfectly solid and of superior flavor. Under good cultivation, it grows 3 feet high. Pkt. 10c; oz. 30c; 1/4 lb. \$1.00; 1 lb. \$3.00.
- CELERIAC—(Turnip-Rooted Celery)—Large smooth Pragne. Pkt. 10c; oz. 25c; 1/4 lb. 75c; 1 lb. \$2.50.

table varieties

SWEET CORN

Plant March to July Prices of All Varieties

Pkt. 10c; 1/4 lb. 20c; 1 lb. 35c; 10 lbs. \$3.00

GOLDEN BANTAM—A very early variety. The ears are but medium size but are thickly set with delicious yellow kernels. The quality of this variety is superb, and it has become a general favorite early Sweet Corn with all who have tried it.

GOLDEN CARMEL—Different from the well known Golden Bantam. Produces thicker and larger ears with 12 rows of sweet, tender yellow kernels. An early variety. Originated in the Carmel Valley, California. Ears grow about seven inches long, stalks five to six feet.

OREGON EVERGREEN—Very sweet and fine; white kernels; large ears, earlier than Stowell's Evergreen.

STOWELL'S EVERGREEN—The standard main crop variety. It is hardy and productive, very tender and sugary, remaining a long time in condition and suitable for boiling. Height about seven and one-half feet.

BLACK MEXICAN—Sweet as honey. The grains when first perfected are pure white, and are then at their best for table use. They soon become dark and almost black, though still retaining their wonderful sweetness.

COUNTRY GENTLEMEN—The finest of all Sweet Corn for the table. The great merit of the Country Gentleman Corn is its delicious sweetness, retaining gits delicate tenderness when a little old.

EXTRA EARLY-WHITE COB CORN—One of the largest and best extra early varieties. Each stalk furnishes two or more large, fine-shaped ears, which are usually fit for use in from 50 to 60 days from seed sowing. The ears are very symmetrical and handsome, without opening between the rows at the base.

ALAMEDA SWEET OR EARLY MAMMOTH—It is remarkably productive, a very strong grower, with large ears, and of excellent flavor. Extensively grown in Alameda County for the San Francisco market.

EARLY MINNESOTA—This old and deservedly popular variety is one of the best early sorts for the market and private garden. Stalks about 5 feet high, without suckers, and bearing one or two ears, well covered with husks. Ears long, eight-rowed.

Alameda Sweet Corn

FIELD VARIETIES

Lb. 20c; 10 lbs. \$1.00

LEAMING—An early, tall - growing variety. Kernels are long and deep golden yellow, stalks are leafy and make excellent fodder.

WHITE DENT—Ears are long, with 16 to 18 rows.

GOLDEN BEAUTY—
A large, broadgrained and very
handsome golden
yellow corn. Matures early—hardy
—very productive
—easy to husk.

TAMALE CORN

The true Tamale Corn. Easy to grow. Lb. 20c; 10 lbs. for \$1.00.

PLANTING INSTUCTIONS

Plant from March to July. Seed should be planted where corn is to grow, without transplanting. Plant 1 to 2 inches deep, hills 24 to 30 inches apart, rows 30 to 36 inches apart. 1 lb. of seed is sufficient for 150 hills. See page 89.

POP CORN

The most popular variety. Short ears, long kernels, rice shape. White in color. 14 lb. 15c; 1 lb. 30c; 10 lbs. for \$2.50.

CORN SALAD

FETTICUS OR LAMB LETTUCE—Used during the Winter and Spring months as a substitute for Lettuce. Also cooked and used like Spinach. Pkt. 10c; oz. 20c; ¼ lb. 60c; 1 lb. \$2.00.

CHICKORY

Plant from February to May

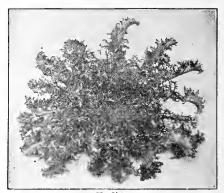

LARGE ROOTS—Fine for salad. The dried roots are used quite extensively as a substitute and an adulterant of coffee. Pkt. 10c; oz. 25c; ¼ lb. 75c; 1 lb. \$2.50.

SMALL-ROOTED, OR RADICHETTS—Pkt. 10e; oz. 25e; 1/4 lb. 75c; 1 lb. \$2.50.

Dandelion

Plant from March to August

I M P R O V E D
L A R G E
LEAVED — The
largest leaved
and best cutting
variety. Pkt. 10c;
oz. \$1.50.

Endive

ENDIVE

Plant from March to October

BROAD LEAVED BATAVIAN (Escarolle)—This variety has broad, thick, plain or slightly wrinkled leaves forming a large head, and is desirable for stews and soups. If the outer leaves are gathered and tied at the top, the inner ones will blanch and may be used for salad. Pkt. 10c; oz. 15c; ¼ lb. 40c; 1 lb. \$1.25.

LARGE GREEN CURLED—A large, strong growing Endive which by tying up can be made to form finely blanched centers of good quality. Other leaves well cut and of a bright deep green. Pkt. 10c; oz. 15c; ½ lb. 40c; 1 lb. \$1.25.

WITLOOF OR FRENCH ENDIVE

Is used as a salad and is most delicious served with French dressing and eaten like lettuce. Seed should be sown in June, July and August in drills 12 to 18 inches apart and the seedlings should be thinned out to stand not closer than 3 inches. Pkt. 10c; oz. 50c; ½ 1b. \$1.50.

Health in These Fine Fresh Vegetables

CUCUMBERS

Plant Seed from March to June

One ounce of Cucumber seed is sufficient for 75 hills. The seed should be planted 1 to 2 inches deep and 6 to 8 seeds in each hill, 4 to 6 inches apart. The hills should be 4 to 6 feet apart. In making what is termed a hill, dig down about 2 inches deep in a circle about 12 inches in diameter. Set your seed in this "pan" as mentioned above. After seed has been set, water well, then cover each hill or "pan" with straw or, still better, with manure. Further instructions on page

- IMPROVED LONG GREEN—Vine vigorous and productive, forming fruit fit for the table nearly as early as the shorter sorts. Fruit about 12 inches long, firm and crisp. Also excellent for pickles. Pkt. 10c; oz. 20c; ½ lb. 60c; 1 lb. \$1.75.
- JAPANESE CLIMBING—The vine attains nearly twice the length of common varieties. The fruits are 10 to 12 inches in length and of a fine green color. The flesh is thick and firm, never bitter, and fine for pickling as well as slicing. Pkt. 10c; oz. 20c; ¼ lb. 65c; 1 lb. \$2.00.
- KLONDYKE—A desirable early dark green variety of White Spine Cucumber. Very prolific and a fine shipping sort. Pkt. 10c; oz. 20c; ¼ lb. 45c; 1 lb. \$1.25.
- SMALL GHERKINS—For pickles. A very small, oval, prickly variety, quite distinct from all others, and grown exclusively for pickles. It is the smallest of all varieties and should always be picked when young and tender. Pkt. 10c; oz. 25c; ¼ lb. 75c; 1 lb. \$2.00.
- ARLINGTON WHITE SPINE—The Cucumbers are very regular in outline, uniform in size, averaging 7 to 8 inches in length, straight and of a rich, dark green color—never turn yellow; the light stripes or "white spines" run from blossom end. Pkt. 10c; oz. 15c; ¼ lb. 45c; 1 lb. \$1.25.
- EARLY SHORT GREEN—Early Frame Cucumber—An excellent sort both for table use and pickling. Pkt. 10c; oz. 20c; ¼ lb. 45c; 1 lb. \$1.25.
- GREEN PROLIFIC (Boston Pickling)—A favorite with pickle growers and commercial gardeners. Very productive. Fruit medium size, very smooth, symmetrical and of a beautiful light green. Pkt. 10c; oz. 20c; 1/4 lb. 45c; 1 lb. \$1.25.
- TELEGRAPH—An English cucumber for frames or forcing under glass. The cucumbers are very long, measuring 16 inches or more, contain very few seeds, and of the most excellent quality. Seed quite expensive, therefore only a few seeds to a packet. Pkt. 25c.

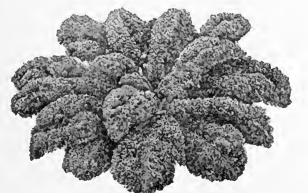

KOHL RABI

Plant from February to June, or September to October

TURNIP-ROOTED CABBAGE—Grown for its turnip-shaped bulb, which is formed above ground. The bulb should be used while young and tender. The Early White Vienna is the best variety for table use. Pkt. 10c; oz. 30c; ½ lb. 90c; 1 lb. \$3.00.

KALE PLANTS

TALL JERSEY—Green feed for poultry. Ready for delivery the year round. 25c per doz., \$1.00 per 100, post-paid.

Dwarf Green Curled Scotch Kale

CLARK'S SPECIAL CUCUMBER

A special strain developed for critical market garden trade. A good shipper, it will hold its color and firmness when handled over long distances. Attractive deep green color, the darkest on the market today. Of uniform length, running from 8 to 10 inches, smooth in appearance, having very few white spines. On account of its small seed pockets it is of excellent quality for slicing. Pkt. 10c; oz. 20c; ½ lb. 65c; 1 lb. \$2.00.

LEMON CUCUMBER

The fruit is as large as a lemon, the shape of a lemon, and the color of a lemon. It can be pared and eaten the same as an apple. When sliced and served it is very delicious, the flavor being most refreshing and delightful. The Lemon Cucumber is not injurious to health, as it is free from the acid that all other Cucumbers have. The vines are strong growers and will bear heavily until frost. Per pkt. 10c; oz. 25c; 1/4 lb. 85c; 1 lb. \$2.00.

EGG PLANT

Plant from February to April

- NEW YORK IMPROVED PURPLE—The leading market variety. Plant of strong growth and extremely productive. The fruit is of large size with smooth, glossy, deep purple skin. Pkt. 10c; oz. 75c; ¼ lb. \$2.50; l lb. \$7.50.
- EARLY LONG PURPLE—Hardy and much earlier than the large New York Purple, succeeding farther north. Thin fruit and is 6 to 10 inches long. Pkt. 10c; oz. 75c; ¼ lb. \$2.50; 1 lb. \$7.50.

EGG PLANT PLANTS

NEW YORK IMPROVED PURPLE—Choice variety, easy to grow. Ready for delivery March to May. 30c per doz., postpaid; \$2.00 per 100, postpaid.

KALE

One ounce of Kale (Borecole) seed will give you 1,500 to 2,000 plants. Start seed in boxes, when about four inches tall transplant in rows three feet apart, with plants two feet apart. Plant from January to April, or July to October.

- DWARF GREEN CURLED SCOTCH—Curly, bright green leaves—tender and of delicate flavor. Pkt. 10c; oz. 15c; ¾ 1b. 35c; 1 lb. \$1.00.
- GIANT MARROW—Thick fleshy leaf stalks. Yield large supply of green food. Excellent for chickens. Pkt. 10c; oz. 20c; ¼ lb. 65c; 1 lb. \$2.00.
- TALL GREEN CURLED SCOTCH—Finely cut leaves, 2½ feet high. Pkt. 10c; oz. 15c; ¼ lb. 40c; 1 lb. \$1.25.
- TALL JERSEY KALE—A native of Europe, producing tremendous mass of beautifully curled leaves. Eagerly sought by chickens, sheep, horses, cattle. Pkt. 10c; oz. 15c; ¼ lb. 35c; 1 lb. \$1.00.

Here's a Variety Page of Vegetables

that includes Vegetable Seeds, Mushrooms and Seasoning Plants

OKRA OR GUMBO

Plant from March to June

The young seed pods of this Southern plant are used for the well-known and delicious "Gumbo" soups; alone or with chicken. TALL, or PERKINS MAMMOTH—The long pods, measuring 4 and 5 inches, are produced in great quantities. The appearance is handsome, of green color and the best quality. Per pkt. 10e; oz. 20e; ¼ lb. 35e; 1 lb. \$1.00.

WHITE VELVET—Produces pods larger than any other. They are never prickly to the touch, always round and smooth, while in other varieties they are either ridged or square-holed. Pkt. 10c; oz. 20c; ¼ lb. 35c; 1 lb. \$1.00.

FAVORITE PARSNIPS

Plant from July to October and from January to June

HOLLOW CROWN—(Very Popular Sort)—Root white, very tender, with a smooth, clean skin. The variety is easily distinguished by the leaves growing from a depression on the top or crown of the root. Pkt. 10c; oz. 20c; 1/4 lb. 45c; 1 lb. \$1.25.

Long Dutch Sugar

out protection. Pkt. tlon. Pkt. 10c; oz. 20c; ½ lb. 45c; 1 lb. \$1.25.

MUSTARD

Plant from February to May

SOUTHERN GIANT CURLED—This is the true curled leaf variety. Is grown largely to furnish an early spring salad. May also be boiled and eaten like spinach. Oz. 10c; 1/4 lb. 25c; 1 lb. 75c.

PARSLEY

Plant All Year Round

CHOICE MOSS CURLED—A compact-growing, finely-curled and densely-cut variety, of a deep green color. Owing to its fine color and handsome foliage, it is one of the most popular sorts. Pkt. 10c; oz. 20c; 1/4 lb. 45c; 1 lb. \$1.25.

FINE TRIPLE CURLED—Distinct in appearance from any other varlety. The leaves are beautifully crimped and curled. Pkt. varlety. The leaves are beautifully 10c; oz. 20c; ¼ lb. 45c; 1 lb. \$1.25.

PLAIN, OR SINGLE—A very hardy variety. Leaves are flat and not curled. Pkt. 10c; oz. 20c; ¼ lb. 45c; 1 lb. \$1.25.
TURNIP ROOTED, OR HAMBURG—A plain leaved variety, forming a large, thick, edible root. Pkt. 10c; oz. 20c; ¼ lb. 45c; 1

WONG BOK

(Chinese or Celery Cabbage)

Has a mild cabbage flavor, very delicate and delicious. Fine for salads and greens. Culture is the same as for Winter Cabbage. Seed should be sown in July or early August and early in September the plants should be transplanted. Will grow in any good soil. Pkt. 10c; oz. 50c; ¼ lb. \$1.50; 1 lb. \$5.00.

A "KITCHEN BOUQUET"

is yours for the gathering with these fresh Seasoning Plants in the garden.

Nothing like being able to run out into the garden for a bit of fresh mint, a spicy sprig of sage, fresh young chives for chopping. These kitchen plants take almost no room in the garden, almost no attention, but they are invaluable to the cook who looks to her seasonings!

CHIVES

Fine for seasoning soups, salads and stews. One square foot of ground is enough for the average family, and 15c worth will last many months. Ready for delivery the year round. 15c per clump, postpaid; \$1.25 per doz., postpaid.

HORSERADISH SETS

Will grow any place. Much better when grated fresh as wanted, and a bit of fresh horseradish goes a long way. Ready for delivery December to May. 30c per doz., postpaid; \$2.00 per 100, postpaid.

MINT ROOTS

One of the most valuable seasonings and one of the most difficult to secure in the market. Ready the year round. 10c each, postpaid; \$1.00 per doz., postpaid.

PARSLEY PLANTS

MOSS CURLED—A compact, finely curled variety, excel-lent for garnish or flowering. 10c per clump; 50c per

SAGE PLANTS

Nothing like fresh sage for real seasoning. Plants ready in March. 20c each; \$1.50 per doz., postpaid.

Sometimes called Estragon. A fine flavoring plant. Ready in March. 25c per plant; \$2.50 per doz., postpaid.

THYME

An old fashioned seasoning plant, excellent for soups, dressing, etc. Ready in March. 6 for 40c; 75c per doz., \$5.50 per 100, postpaid.

FRENCH MUSHROOM SPAWN

Mushrooms may be grown by anyone having a supply of fresh horse manure and shed or cellar—and make a most profitable crop. This new spawn is produced by a new method direct from virgin spores secured from the finest type of healthy large white French mushrooms. Propagating in a sterilized medium insures freedom from inferior types as well as the bacterial enemies so often prevalent in ordinary spawn. Our Mushroom Spawn is sold in bricks of about 1½ pounds and will plant from 8 to 10 square feet of bed. Price, 40c per brick, postpaid; 5 bricks, \$1.75, by express. express.

Fresh Curly Lettuce

Pull it right from your own garden with the dew of morning fresh upon it!

Plant Lettuce the year round.

Lettuce is very easy to grow, and so healthful. There is no reason why every person with a patch of backyard garden should not gather crisp succulent lettuce for his table every month in

FIVE FAMOUS VARIETIES

OS ANGELES—Large—Crisp—Tight-Headed—Unsurpassed for home and market growing. The heart is solid and of light green color and very long-standing; perfect heads may be cut from the same bed for many weeks. It is an extremely hardy variety, rooting deeply, resisting hot weather and thriving when many sorts could hardly exist. For exhibition purposes and for an outdoor all-season Lettuce the Chas. C. Navlet Co.'s special strain of Los Angeles Lettuce is in a class of its own. Buy from us and you will get the very choicest strains of this choicest of all Lettuce. Pkt. 10c; oz. 25c; ½ lb. 75c; 1 lb. \$2.25. LOS

HANSON'S IMPROVED—Grows to large size and is uniformly sure heading. Head very solid and beautifully blanched—crisp, mild, tender. One of the finest varieties to grow for market, during the Summer months. Our stock is unexcelled, being of the improved hard-heading strain. Pkt. 10c; oz. 20c; ½ lb. 45c; 1 lb. \$1.50.

ICEBERG—Large solid heads, light green, slightly tinged with brown, very tender and crisp. Pkt. 10c; oz. 25c; ½ lb. 50c; 1 lb. \$1.50.

lb. \$1.50.

HITE LOS ANGELES—A favorite Summer Lettuce. Produces large, solid heads of superior quality—closely resembling the original Los Angeles variety—with the exception of the leaves, which are a great deal lighter in color. Pkt. 10c; oz. 25c; ¼ lb. WHITE LOS 50c; 1 lb. \$1.50.

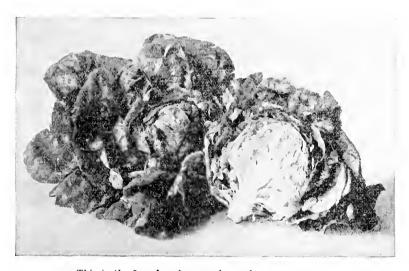

WHITE PARIS COS (Romaine)—Full-headed, much esteemed by epicures for its crispness, tenderness and flavor, which is different from that of any other Lettuce. The heads are long and conical. The leaves require to be tied up when they soon form solid heads that quickly bleach to snowy whiteness. Pkt. 10c; oz. 20c; 1/4 lb. 65e; 1 lb. \$1.75.

Hanson's Lettuce

PLANTING INSTRUCTIONS

Lettuce seed should be covered very lightly to obtain germination. As soon as the plants are well started transplant them to rows 18 to 24 inches apart, and 6 to 12 inches apart in the row. In California and in most localities lettuce seed may be planted any month in the year. For best results, plant Chas. C. Navlet Co.'s Choicest Strains.

This is the Los Angeles, a pale, cool green.

TIGHT-HEAD LETTUCE

BIG BOSTON—Plant is large, very hardy and vigorous. Color, bright light green tinged with brown. Always finds a ready market. Pkt. 10c; oz. 20c; ¼ lb. 60c; 1 lb. \$1.75.

CALIFORNIA CREAM BUTTER (Cabbage Lettuce)—A very popular variety for Autumn and Winter use. Forms a very large head, which is very buttery and of a rich golden yellow inside. The leaves are thick and of bright green, slightly tinged with brown. Grown extensively by San Francisco market gardeners. Pkt. 10c; oz. 20c; ¼ lb. 50c; 1 lb. \$1.50.

EARLY CURLED SIMPSON—A curled, light green, non-heading variety. Can be grown quite thickly in the row and produces an abundance of crisp, sweet flavored lettuce leaves. For Winter and Spring sowing. Pkt. 10c; oz. 20c; 14 lb. 50c; 1 lb.

LOOSE-HEAD LETTUCE

CHICKEN LETTUCE—This variety does not make a head but seeds up to a stout stalk. 3 to 4 feet high, just loaded with leaves which can be pulled off each stem like Jersey Kale, or the plants can be cut down as new shoots will spring up and make quick growth. Economical to grow as the yield is extremely heavy. Pkt. 10c; oz. 20c; ¼ lb. 50c; 1 lb. \$1.50.

PRIZEHEAD—A quick growing variety; does not form a head but has a fine flavor. Leaves are browning red and very curly, easily grown. Pkt. 10e; oz. 20c; ¼ lb. 50c; 1 lb. \$1.50.

Grow a Health Garden in your back yard!. Lettuce, Spinach, Carrots, Beans, Onions, all these are easy to grow, and rich in iron and health-giving vitamins.

Melons, Sun Ripened on your own Choice Vines

Easy to grow, and so delicious, picked fresh from the vine. For planting instructions, see Page 89. The directions for making the hills are the same as for Cucumbers.

Plant from March to June

CASABAS

The wonderful New Winter Muskmelon—The flesh of the Casaba is thick, of fine texture, and spicy and palatable to within ¼ inch of the skin. The flavor—a combination of pineapple and the finest wild Muskmelon—is delicous beyond description. The fruits are oblong and about 12 inches long—the skin is smooth and finely mottled with dark green and yellow—the seed cavity is small. Seed should not be sown until all danger of frost is over. Pkt. 10c; oz. 20c; ¼ lb. 70c; 1 lb. \$2.00.

HONEY DEW MELON—This Melon has won the highest praise

HONEY DEW MELON—This Melon has won the highest praise from all. Melon is medium size, weighing 5 to 6 pounds; about 6 inches in diameter and slightly oblong. Skin smooth; color while growing white, when ripe creamy yellow. Flesh thick light emerald green in color. Melons slip from vines when ripe. Can be stored in cool place and will keep until Christmas. Pkt. 10c; oz. 20c; ¼ lb. 50c; 1 lb. \$1.50.

WATERMELONS

in choicest varieties

Illustrated - The Kleckley Sweet, a favorite for its crisp, melting sweetness.

GEORGIA RATTLESNAKE — Or Gypsy Oblong — An oblong Watermelon of good size and excellent quality. Rind thin, light green with beautiful stripes. Flesh bright scarlet, solid, tender and very sweet. Per pkt. 10c; oz. 15c; 1/4 lb. 20c; 1 lb.

KLECKLEY SWEETS—The sweetest of all Watermelons. The fruit is large, oblong in form, with a dark green skin and very thin rind. The flesh, of beautiful bright scarlet, has a broad solid heart, and is crisp, sugary, melting in the highest degree, and entirely free from any stringiness. The average 18 to 20 inches in length by 10 to 12 inches in diameter. Very handsome in appearance and of uniformly superior quality. Pkt. 10c; oz. 15c; ¼ lb. 20c; 1 lb. 75c.

KLONDIKE—One of the most popular shipping varieties in California. Oblong Melon, an even dark green. Flesh brittle, bright red and very solid, with few seeds and these only about half the size of ordinary watermelon seeds. Pkt. 10c; oz. 25c; 1 lb. 75c; 1 lb. \$2.25.

74 10. WATSON—Orignated near Augusta, Ga., a few years ago.
Very prolific, 6 carloads on 10 acres often made. Long shape;
dark, deep green, no stripes. Oftentimes 50 to 60 lbs. two
Melons to vine; no ends; no necks to rot; better shipper than
Rattlesnake; tougher ring; flesh deep red; seeds white;
smeared with yellow. Pkt. 10e; oz. 15c; 1/4 lb. 25c; 1 lb. 75c.

CITRON—Red Seeded—A small globular variety, striped and marbled with light green. Flesh white, solid and red. Used exclusively for pickles and preserves. Pkt. 10c; oz. 15c; 1/4 lb. 25c; 1 lb. 75c.

25c; 1 lb. 75c.

FORDHOOK EARLY—The earliest large-fruited Watermelon in cultivation. Average weight about 35 pounds; rather short and blocky in form. Dark green skin with occasional faint stripes of lighter green. Flesh bright red, crisp, sweet, and of surpassing quality. Rind quite thin but tough, making a first-class shipping variety. Pkt. 10c; oz. 20c; ¼ lb. 45c; 1 lb. \$1.25.

ANGELINO—A wonderfully popular variety. Deep red flesh, choice flavor, dark green skin. Extremely early. By watching for the yellow to show through the green you can always make certain of ripeness. Pkt. 10c; oz. 20c; ¼ lb. 50c; 1 lb. \$1.00.

CHILIAN—A remarkably fine Melon. Very brittle, thin-skinned variety of highest quality, especially valuable for the home garden. Slightly oblong. The skin is a deep green, mottled and striped with a still deeper green. The flesh is bright red and the flavor remarkably fine and sweet. Pkt. 10c; oz. 20c; ¼ lb. 45c; 1 lb. \$1.00.

and the layor lenarkably line and sweet. Fat. 10c; 02. 20c; ¼ lb. 45c; 1 lb. \$1.00.

CUBAN QUEEN—One of the finest varieties. The fruit is large and oblong in form. Skin beautifully striped in dark and light green. Rind quite thin but tough enough for shipping. Flesh right red, remarkably solid, peculiarly luscious, crisp and sugary. A good keeper. Pkt. 10c; oz. 20c; ¼ lb. 45c; 1 lb.

\$1.25.

FLORIDA FAVORITE—A very large variety with large, oblong fruit and dark green skin, mottled with a deeper shade. Thin rind; flesh deep red, of fine quality and excellent flavor. The Melon is well suited for table or market. Pkt. 10c; oz. 15c; 1/4

Melon is well suited for table of market. A.v. 100, 1b. 20c; 1 lb. 75c.

GOLDEN HONEY—A delicious Melon with yellow flesh, solid and sweet right up to the rind. Fruit oblong and medium sized. Pkt. 10c; oz. 20c; 1/4 lb. 50c; 1 lb. \$1.50.

CHOICE CANTALOUPES

THE MILLIONAIRE, NAVLET'S WONDERFUL INTRO-DUCTION—Wherever it has been grown it has created a veritable sensation on account of its immense size, a veritable sensation on account of its immense size, delicious flavor, and extraordinary productiveness. Some weigh as high as 9 pounds, and a single Melon is always large enough for an entire family. The flesh is so unusually thick that it leaves only a small hole in the center. It is of a tempting cream color, has a matchless creamy texture, and is as sweet as honey. Fairly melts in your mouth. Pkt. 25c; oz. \$1.00; 1/4 lb. \$3.50; 1 lb. \$10.00.

HACKENSACK, or Turk's Cap—One of the most extensively grown Muskmelons. A reliable and beautiful yielder. Extra early. Fruit very large, the diameter being much more than the length. Ribs large, of irregular width and densely covered with coarse netting. Flesh green, thick, coarse, but very sweet and fine flavored. Our stock is true to the "Turk's Cap" type, and after careful comparison with that of other growers we unhesitatingly pronounce it the best in the country. Per pkt. 10c; oz. 20c; ¼ lb. 50c; 1 lb. \$1.50.

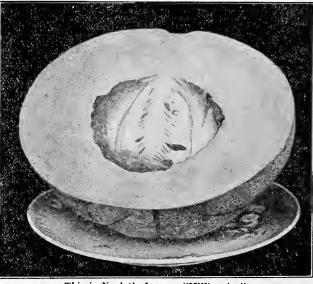

ROCKY FORD, or Netted Gem Muskmelon—A sweet, luscious Melon that has become world-famous for its captivating flavor. The vine is exceedingly healthy and produces an enormous number of Melons during the entire season. Fruit averages 5 to 6 inches in length. The skin is a rich, greenish gold in color and the flesh is of exquisite texture and melting almost to the rind. The seed cavity is very small. Per pkt. 10c; oz. 20c; ¼ 10. 50c; 1 lb. \$1.50.

THE HOODOO—Unlike its unpropitious name, this Muskmelon is one of the best. It is early and prolific. The fruit is of medium size; the seed cavity is very small, the rind very thin indeed, and the edible fleshy part very thick and meaty. It is of orange or salmon color, the type much preferred now. Large pkt. 10c; oz. 20c; 1/4 lb. 60c; 1 lb. \$1.75.

MONTREAL IMPROVED GREEN NUTMEG—A superb Melon of large size and rich aromatic flavor. Fruit round, flattened at both ends, ribbed and covered with coarse netting. Flesh very thick, luscious and melting. Per pkt. 10c; oz. 20c; ¼ lb. 50c; 1 lb. \$1.50.

HEARTS OF GOLD—A Melon that is becoming very popular. The Melons measure about 5½ inches long and 6 inches in diameter. The salmon flesh is of the finest quality. Pkt. 10c; oz. 35c; ¼ 1b. \$1.00; 1 1b. \$3.50.

PERSIAN MUSKMELON—This Melon is large and heavy for its size. From 8 to 10 inches in diameter. Melon very netted, globular in shape, flesh is firm. color bright orange. Flavor different from other Melons, comes out delightfully when Melons are well ripened. Pkt. 10c; oz. 50c; 1/4 lb. \$1.50; 1 lb.

This is Navlet's famous "Millionaire"

Onions for that Piquant Dash of Flavor

A good cook looks to her onions for that elusive "come-again" flavor. And crisp green onions pulled fresh for the salad are unmatched for succulent sweetness. Why not grow your own? It's really very easy.

NAVLET'S "KING OF THE YELLOWS"

Unsurpassed for home and market growing—One of the handsomest, finest flavored, most prolific, best keeping, all-round
home and market Onions ever introduced! Superior to Yellow
Globe and Yellow Danvers. Leader of the yellow skins. Fiesh is
white and fine grained. Uniform in size and shape. Ripens up
hard and solid and is a wonderful variety for shipping. A tremendous money maker for the market grower, being an extremely
heavy producer and an unrivaled seller. Per pkt. 10c; oz. 30c; ¼
lb. \$1.00; ½ lb. \$1.75; 1 lb. \$3.00.

lb. \$1.00; ½ lb. \$1.75; 1 lb. \$3.00.
AUSTRALIAN BROWN—An Onion of Wonderful Keeping Quality. After a thorough test this Onion has proven to be not only the very earliest to ripen, but also the longest keeping variety now cultivated. The bulbs are of medium size with small, hard necks, and a clear, amber brown in color. Per pkt. 10c; oz. 20c; ¼ lb. 60c; 1 lb. \$1.75.
EXTRA EARLY FLAT RED—The first to ripen, and one of the handsomest of the red sorts. It yields abundantly, keeps well is of mild flavor, and the bulbs are very uniform in shape and size. Excellent for boiling, slicing, or pulling young for use in salads. Per pkt. 10c; oz. 20c; ¼ lb. 60c; 1 lb. \$2.00.
EARLY SWEET SPANISH—A very large, mild yellow, globe-

EARLY SWEET SPANISH—A very large, mild yellow, globe-shaped Onion. One of the best for home garden; also an early market Spanish type. Pkt. 10c; oz. 35c; 1/4 lb. \$1.00; 1 lb. \$3.50.

SOUTHPORT YELLOW GLOBE—A popular orange-yellow. Globe shape. Per pkt. 10c; oz. 25c; ½ lb. 75c; 1 lb. \$2.25.

WHITE BERMUDA—A very early variety, used largely in the South, and is an early market Onion, when the seed is sown in the Fall and the Onions are harvested in the Spring. It is mild and of a particularly fine flavor. Per pkt. 10c; oz. 50c; ¼ lb. \$1.75; 1 lb. \$5.00.

WHITE GLOBE—A very handsome silvery-white bell-shaped Onion of large size. Flesh firm, fine grained, of mild flavor, and an excellent keeper. Its even, regular size and globular form, combined with the clear silvery whiteness of the skin, make it one of the handsomest Onions grown. Per pkt. 10c; oz. 25c; ¼ lb. 80c; 1 lb. \$2.50.

onion sets

Plant November to May

The easiest and quickest way to grow Onions is to plant Chas. C. Navlet Co.'s Onion Sets. These are miniature Onions grown from seed. Plant them and you'll have Onions six weeks earlier than if you'd waited for seed to grow. May be used as little green Onions in salads, or allowed to ripen into large Onions. White, 30c lb., postpaid. Yellow, 25c lb.; 5 lbs. \$1.00, postpaid.

Market Growers: Write for special quantity prices.

WHITE PORTUGAL—Or Silver Skin. A splendid white Onion for general culture. Pkt. 10c; oz. 25c; ¼ lb. 75c; 1 lb. \$2.25.
WHITE BARLETTA—Finest of all for small pickles. The bulbs are pure white and generally very small, averaging about 1 inch in diameter. Extremely early and of very mild, sweet flavor. Pkt. 10c; oz. 40c; ¼ lb. \$1.25; 1 lb. \$4.00.
YELLOW FLAT DANVERS—Many growers prefer this to the Globe Danvers as ordinarily it is a very heavy cropper. It is a fine Onion, one you are sure to be pleased with. A heavy yielder, a splendid keeper of beautiful appearance, and sells rapidly in all markets. Pkt. 10c; oz. 20c; ¼ lb. 75c; 1 lb. \$2.00.
YELLOW GLOBE DANVERS—An immensely popular Onion that combines extreme reliability and early ripening with large yield. The shape is round, a little depressed at top and bottom. The color is a rich brownish-yellow, making a most attractive bulb. It is medium in size, but remarkably solid and heavy, producing as much weight per acre as any other variety grown. Per pkt. 10c; oz. 20c; ¼ lb. 75c; 1 lb. \$2.00.
RED BOTTLE SHAPED or Long Italian Red—It is light red and is long and narrow. Early and mild in flavor. Very fine for slicing. Pkt. 10c; oz. 50c; ¼ lb. \$1.50; 1 lb. \$4.50.
LARGE RED WETHERSFIELD—A leading variety from ocean to ocean. Produces colossal crops of enormous Onions. A sure cropper, a long keeper and a splendid shipper. Though well flattened, the Onions are thick through. The outer skin is a deep rich purplish red, smooth and glossy. The flesh is white, lightly tinged with purple-rose, and is as mild in flavor as many varieties with skin of lighter coloring. Per pkt. 10c; oz. 20c; ¼ lb. 60c; 1 lb. \$2.00.
PRIZE TAKER—The Prize Taker attains the enormous size of the famous Spanish Onion, and its mildness and tenderness are unequaled even by the Bermuda varieties. It attains its colossal size under exactly the same conditions that are necessary to the cultivation of other Onions. Per pkt. 10c; oz. 20c; ¼ lb. 60c; 1 lb. \$2.00.

HAVE A GARLIC PATCH!

Plant September to December

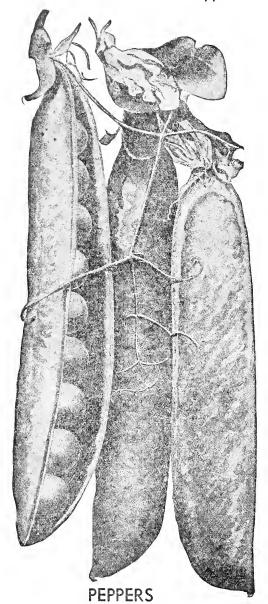

Garlic gives a flavor all its own to salads and meats. Finest Garlie Sets, 25c; 10 lbs. \$2.00, postpaid.

LEEK

Pkt. 10c; oz. 25c; 1/4 lb. 75c; 1 lb. \$2.50 Plant February to April

LARGE AMERICAN FLAG-The favorite variety with market LARGE FLAG (or London)—The sort usually cultivated. Hardy and vigorous.

SHALLOTS-Multiplying Onion. 25c lb., postpaid.

in choice varieties

Plant from February to May

ANAHEIM CHILI—This Pepper yet grows in popularity year after year! The stalks grow from 2 to 3 feet high and support the Peppers well off the ground, and every plant bears 30 to 40 large Peppers from 6 to 10 inches long. Pkt. 10e; oz. 50e; ¼ lb. \$1.50; 1 lb. \$4.50.

CHERRY—A very pungent Pepper, round as a cherry, about 1 inch in diameter, marketed when green. Used largely in pickling and by the foreign trade. There is a profit to the person who will specialize on this and other small pungent Peppers. Pkt. 10c; oz. 45c.

45c.
CHINESE GIANT—This enormous fruiting variety averages 12 to 15 inches in circumference; is very early and prolific. The stocky, well-branched plants, about 2 feet high, carry so many Pepperfs that in some places they seem bunched together. The flesh when sliced as a saint, or for stuffing for "mangoes." When ripe the surface is of a brilliant glossy scarlet. Pkt. 10c; oz. 60c; ¼ lb. \$2.00; 1 lb. \$6.00.
CHILI—A large variety, used in the manu-

oue; ¾ 1b. \$2.00; 1 b. \$6.00.

CHILI—A large variety, used in the manufacture of pepper-sauce. The bright, rich, red pods are about 2 inches long, one-third to one-half inch in diameter at the base, tapering to a sharp point and exceedingly pungent when ripe. The plants should be started quite early in hot-beds. Pkt. 10c; oz. 45c; ¼ lb. \$1.50; 1 lb. \$4.50.

Peas, Fresh and Tender

Here are the best varieties favored by home and market gardener—Laxtonian, Strategem, Telephone and the other big leaders! Sow in the Fall for early Peas and plant up to July for successive crops. A light, moderately rich soil is best. One pound will sow 200 feet of drill, with Peas three to six inches apart. Make rows 30 to 36 inches apart. Plant all year around.

EARLY PEAS

Pkt. 10e; 1 lb. 35e; 10 lbs. \$3.00

Pkt. 10c; 1 lb. 35c; 10 lbs. \$3.00

ALASKA, or Earliest of All—A very early, tall variety, vines 2 to 2½ feet, with smooth small Peas, green seeded, of good qality, and short, well-filled pods. Very popular with canners and market gardeners. Will not rot in the ground if planted in very cold, wet soil.

AMERICAN WONDER—Earliest Wrinkled Pea—This variety is unexcelled in flavor and quality. The vine grows 10 to 12 inches high, and is very prolific in pods of striking form and size. It is of the finest flavor. In maturing it is among the first, being the first of the wrinkled sorts.

DWARF TELEPHONE, or Daisy—Height about 2 feet and vines are exceptionally strong growing and produce freely large, well filled pods. Does extremely well in California.

GRADUS (also called "Prosperity Pea")—This popular large-podded wrinkled Pea of finest quality matures pods only two or three days later than the small-podded round-seeded extra earliest. A very early large podded sort growing 3 to 3½ feet high. Peas are large, of fine quality and light green in color. in color

in color.

LAXTON'S PROGRESS—The largest podded of any extra early dwarf variety. Pods pointed, dark green, well filled and very prolific. A new variety that is rapidly coming to the front for market and shipping.

LAXTONIAN—This is an ideal market and home garden Pea, medium dwarf in habit of growth but with very large pods, averaging 5 to 6 inches in length. Laxtonian seldom has any blank spaces in the pods. PREMIUM GEM, or Little Gem-Very popular dwarf wrinkled variety with the market gardener. Pods good size and filled with 6 to 8 light sweet flavored Peas. Grows about 15 inches high.

THOMAS LAXTON—A fine early tall variety similar to Gradus, but more hardy and not so early. It is also darker in color and has large blunt pods that are well filled with Peas of finest quality.

LATER PEAS

Pkt. 10e; 1 lb. 35e; 10 lbs. \$3.00

STRATEGEM—Seeds green, wrinkled, middle crop, one of the best Peas ever sent out; grows a vigorous and showy vine of branching habit, heavily laden with immense pods containing 10 to 12 Peas of large size.

TELEPHONE PEA—One of the leading Peas with market gardeners, whose trade appreciates fine appearance and high quality. Vine vigorous and produces an abundance of very large pods filled with immense Peas which are tender, sweet and of excellent flavor. It is one of the best sorts for either home or market home or market.

home or market.

YORKSHRE HERO, or Alameda Sweet Pea—(All the Year)—A most popular and extremely productive early and late variety, growing 2½ feet in height. Pods are broad and medium-sized and are well filled with large Peas, which remain in good condition for a long time.

EDIBLE PODDED PEA—Sweet, delicious, tender—A class of Pea, little known in this country, but very popular abroad. They are used in the same way as Snap or String Beans, and can be made ready for the table in 10 or 15 minutes. The pods are very large, sweet, brittle and extremely tender.

STURDY PEPPER PLANTS

CHINESE GIANT, Sweet Spanish, Chili and Bell Peppers—Strong, well rooted plants, ready for delivery in March. Plants 30c doz., postpaid; 100 for \$2.00, postpaid.

LARGE BELL, or Bull Nose-Plant vigorous, compact, very productive, ripening its crop uniformly and early Fruit large, cylindrical, with thick, mild flesh. An excellent quality for use in salads and pickles. Color a bright red when ripe. Pkt. 10c; oz. 45c; 1/4 lb. \$1.50; 1 lb. \$4.50.

LONG RED CAYENNE-A favorite variety having a slim pointed pod about 4 inches long and when ripe of a bright red color. Extremely strong and pungent flesh. Pkt. 10e; oz. 45e; ¼ lb. \$1.50; 1 lb. \$4.50.

PIMIENTO-This is a sweet Pepper, good for salads, either fresh or canned. Used largely by canners and market gardeners. Very thick flesh. Pkt. 10c; oz. 45c; 1/4 lb. \$1.50; 1 lb. \$4.50.

SWEET MOUNTAIN-Vigorous plant, upright growing, with moderately large leaves. Fruit ripens very late. Very smooth and large, often 8 in. long by 2 in. across. Bright deep green color, maturing to rich rcd. Flesh thick, sweet and mild. Excellent for stuffing and salad. Pkt. 10c; oz. 45c; 1/4 lb. \$1.25; 1 lb. \$4.00.

Squash and Golden Pumpkins for the Fall

Plant from March to August

Just when summer vegetables are on the wane, along come squash and pumpkins for the holidays. Navlet's varieties are choice selected species for both home and market gardens.

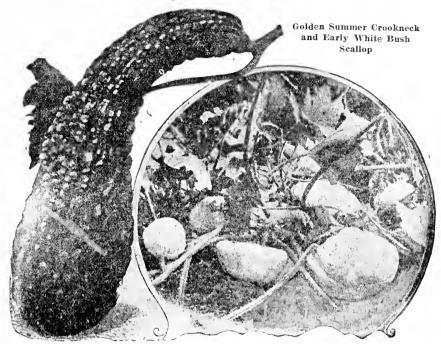

One ounce of early Squash seed will make 50 hills. Plant 1 to 2 inches deep in hills (see directions under Cucumbers, page 15), with hills and rows 3 to 4 feet apart.

An ounce of Winter Squash seed makes 15 hills. Rows of late Squash should be 6 to 7 feet apart.

SUMMER SQUASH

GOLDEN SUMMER CROOKNECK—Early and prolific—One of the most popular Squashes for the table and market. The fruit is of the Crookneck type, heavily warted and light golden-yellow in color. Pkt. 10c; oz. 20c; ¼ lb. 45c; 1 lb. \$1.25.

ITALIAN SQUASH (Cocozelle)—Earliest of All—Although usually eaten when quite small, still it is good for the table when nearly full grown; has a distinct flavor and is very popular. Dark green color at first, changing to a lighter green later. Pkt. 10c; oz. 20c; 1/4 lb. 60c; lb. \$1.75.

Navlet's Famous BUG-PROOF SQUASH

The grandest Squash on earth! We guarantee this Squash to be bug-proof. It grows rapidly, producing colossal crops. KEEPS IN PERFECT CONDITION A WHOLE YEAR. Squash are oblong with rough, hard shells, with flesh inside a rich yellow, very thick, fine grained, sweet. Of unequaled flavor, roasted, boiled, steamed, baked or in pies. Unexcelled, too, for feeding to stock. Plant March to August. Pkt. 10e; oz. 25c; ¼ lb. 85c; ½ lb. \$1.35; 1 lb. \$2.50.

PUMPKINS — 3 BEST VARIETIES

Plant from March to August

NOTE-Be sure to give Pumpkins plenty of room to grow.

"KING OF THE MAMMOTIIS" PUMPKIN—(Potiron)—This is the very best genuine strain of the true Mammoth Pumpkin offered under so many various names by different seedsmen. Fruits grow to enormous size, reaching two feet or more in diameter and from 100 to 200 pounds or over in weight. Salmon-orange skin. Very thick, bright yellow flesh, fine-grained, tender and of excellent quality for pies. To raise the largest pumpkins, vines should be allowed ample room in which to grow. Pkt. 10c; oz. 20c; ½ lb. 60c; 1 lb. \$1.75.

CUSHAW, or Crookneck—This excellent Pumpkin ought to be planted more largely. There is more Pumpkin for its size be-

cause of the small seed cavity. It is excellent for pies, and yields enormously. Pkt. 10c; ¾ lb. 45c; 1 lb. \$1.25, postpaid.

CONNECTICUT
FIELD, or Pie
Pumpkin— Large
yellow. The
hardiest of all
Pumpkins. Produces enormous
crops. CULTIVATED MAINLY FOR FEEDING STOCK.
Pkt. 10c; oz. 20c;
44 lb. 35c; 1 lb.
\$1.00.

Here's a promise of Pumpkin Pie for Hallowe'en.

EARLY WHITE BUSH SCALLOP—The early White Patty Pan or "Cymling" of the South—One of the earliest varieties of Squash and grown almost exclusively for first crop. Of dwarf habit and upright growth. The fruit is a handsome creamy white, tender and delicately flavored, and from the hard texture of the rind, is well suited for shipping. Pkt. 10c; oz. 20c; 14 14 550: 1 19 \$1.25

The Hubbard is probably the most popular winter variety.

WINTER SQUASH

BANANA—This Squash grows from one to two feet in length. Flesh firm and solid, of beautiful orange-yellow and excellent quality. It keeps from one season until another. When quite young it is excellent to cook as a marrow. Pkt. 10c; oz. 20c; ¼ lb. 50c; 1 lb. \$1.50, postpaid.

HUBBARD—A superior Winter Squash. Flesh bright orangeyellow, fine-grained, very dry, sweet and richly flavored. Keeps well throughout the Winter. Boils or bakes exceedingly dry, and is esteemed by many to be as good baked as the Sweet Potato. Pkt. 10c; oz. 20c; ¼ lb. 45c; 1 lb. \$1.25.

PERFECT GEM, or Cream—A long keeping Winter Squash of small rounded form, 4 to 6 inches in diameter, skin cream colored and distinctly ribbed; fine for baking. Pkt. 10c; oz. 20c; ¼ lb. 45c; 1 lb. \$1.25.

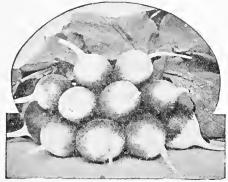

BOSTON MARROW—A large fruited Squash for Fall and Winter use. Fruit is of oval form. The skin is thin and when ripe is a bright orange with a netting of light cream color. The flesh is fine-grained and of excellent flavor, but not as dry as the Hubbard. Pkt. 10c; oz. 20e; 1/4 lb. 45e; 1 lb. \$1.25.

SQUASH FOR STOCK FEED

MAMMOTH—This is the "Jumbo" of the Squash family and attracts great attention wherever grown or placed on exhibition. The Squashes grow from 2½ to 3 feet in length; under good cultivation often attain more than 100 pounds in weight. Pkt. 10c; oz. 20c; 1 lb. \$1.50.

Crisp, Fresh Vegetables

Are all the crisper when you grow your own

Scarlet Turnip White Tip

RADISHES

Plant all year round.

Pkt. 10c; Oz. 20c; 1/4 lb. 35c; Lb. \$1.00

Choice of following well-known varieties:

Early Half-Long Brightest Scarlet

Early Long Scarlet

Early Olive Shaped or Half-Long Scarlet Olive

Early White Turnip Rooted

French Breakfast

Icicle-choice

Long Black Spanish

Mammoth White China or California

Scarlet Turnip White Tip

SUMMER AND WINTER SPINACH

Plant from August to June

NEW ZEALAND—A plant with thick, fleshy texture and soft crystalline leaves. Is not like the ordinary Spinach in appearance, but it is used in the same way. Pkt. 10e; oz. 15e; 1/4 lb. 30e; 1 lb. \$1.00.

BLOOMSDALE SAVOY LEAVED—The earliest variety, and one of the best to plant in Autumn for early Spring use. Plant of upright growth with pointed leaves which are crimped like those of Savoy Cabbage. Pkt. 10c; oz. 15c; 1/4 lb. 25c; 1

LATE PRICKLY WINTER—An exceedingly hardy variety, and will withstand severe weather with only a slight protection of leaves or straw. The seed is prickly and the leaves are oblong or arrow-shaped. Adapted for Fall sowing. Oz. 10c; 1/4 lb. 20c; 1 lb. 50c.

LONG STANDING—Leaves large, thick, fleshy and crumpled. Slow to run to seed. Pkt. 10c; 1/4 lb. 20c; 1 lb. 60c.

ROUND SUMMER THICK LEAVED—This variety is generally preferred for early Spring sowing and is the most popular with our market gardeners. The leaves are large, thick and fleshy. It stands exposure very well and possesses the valuable quality of standing a long time before running to seed. Pkt. 10c; oz. 15c; ¼ lb. 20c; 1 lb. 60c.

SWEET POTATO PLANTS

Good Sweet Potatoes are hard to buy, yet everyone with a lit-tle patch of ground can grow all that are needd for ordinary family use. 25c per doz., postpaid; \$1.50 per 100, postpaid. Ready for delivery in April.

CHOICE VARIETY OF TURNIPS

Plant April to June

EARLY WHITE FLAT DUTCH—Strap leaved. A most excellent table variety. Very early sweet, tender, and of tempting appearance. Root medium size, flat in shape and of a clear ivory-white in color. Pkt. 10c; oz. 15c; ¼ lb. 25c; 1 lb. 75c.

EXTRA EARLY PURPLE TOP MILAN—The earliest of the whole Turnip family. The smooth, flat, symmetrical roots are a beautiful purple-red above ground and a clear white underneath. The flesh is white, crisp and tender. All in all, the Purple Top Milan leaves nothing more to be desired in the way of an extra early table Turnip. Pkt. 10c; oz. 15e; 1/4 lb. 40e; 1 lb. \$1.25.

LARGE YELLOW, or Amber GLOBE—One of the best Turnips for general crop. It is a good cropper and keeps well until late in the Spring. The roots are of medium size, smooth skinned and of pale yellow color. Turnip for table use, equally good for feeding stock. Pkt. 10c; oz. 15c; ¼ lb. 25c; 1 lb. 75c.

PURPLE TOP—Strap leaved. An early Turnip that ranks in favor as a table variety. It is flat in shape, but thicker than Purple Top Milan; of medium size. Color, dark purple above ground and white below. Flesh white, fine-grained and tender. Pkt. 10c; oz. 20c; 1/4 lb. 35c; 1 lb. \$1.00.

PUBPLE TOP FLAT DUTCH—Strap leaf. An early flat variety. White, with purple top. Probably the most popular and generally used garden variety. Large pkt. 10c; oz. 15c; ¹/₄ lb. 25c; 1 lb. 75c.

PURPLE TOP WHITE GLOBE—A globular-shaped Turnip of beautiful appearance and most excellent quality. Equally desirable for table or stock. It is a good keeper and fine market sort. Pkt. 10c; oz. 15c; 1/4 lb. 25c; 1 lb. 80c.

WHITE EGG—Very early variety. A small oval-shaped variety with pure white flesh. A handsome variety and very early. Large pkt. 10c; oz. 15c; ¼ lb. 30c; 1 lb. \$1.00.

The Purple Top is one of the sweetest and tenderest of the turnips

RUTABAGAS

Plant All Year Round.

Pkt. 10e; Oz. 20e; 1/4 lb. 35e; 1 lb. \$1.00

SWEDE PURPLE TOP—A very large, hardy and productive variety. Flesh yellow, of solid texture, sweet and well flavored. Color deep purple above, bright yellow under the ground. Fine for table use and the best yellow-fleshed sort for stock feeding.

SWEET RUSSIAN (or White Rutabaga)—An immense and heavy yielding sort. Flesh white, solid, brittle, sweet and rich. An exceilent keeper. A most desirable variety, for the table or for

SALSIFY

Plant July to May

A Healthful Winter Vegetable—One of the most delicious of vegetables, and also one of the most nuitritious. The flavor is sweet and highly esteemed whether served boiled with butter or other suitable sauce, or sliced and fried, or used in soup. Pkt. 10c; oz. 30c; 1/4 lb. 85c; 1 lb. \$2.50.

CHOICE RHUBARB

Plant February and March

GIANT CRIMSON—This splendid Rhubarb thrives luxuriantly all the year round, and is better during the Winter months than in the Summer. The stems often weight over a pound—and 30 pounds of full-grown stems have been picked at one time from a single plant. An extraordinary producer. Pkt. 20c; oz. \$2.50; ¼ lb. \$7.50.

LINNAEUS RHUBARB—A remarkable early Rhubarb. Tender and fine flavor. Pkt. 10c; oz. 20c; ¼ lb. 50c; 1 lb. \$1.50.

RHUBARB ROOTS

A few roots will serve you well for Rhubarb Sauce and juicy Pies.
GIANT CRIMSON WINTER—(See above)—Small roots 20c each; 12 for \$2.00. Large Roots 35c each, postpaid; 12 for \$2.50. Ready October to May.
STRAWBERRY—Large stalks, very tender and fine. Light pink in color. Of the best quality. Large Roots 20c each, \$2.00 per doz., delivered free.

Tomatoes for Health and Wealth

Plant them abundantly, anytime from February to May

Comparing favorably with the most important fruits in vitamin content and minerals, tomatoes are among the most valuable of all the vegetables. And they possess the rare quality of retaining their health-giving vitamins even after they are cooked. Plant them in plenty! Where early plants are desired, sow early in the season in hotbeds or boxes, and plant out in the garden as soon as danger from frost is over. An ounce of seed will give 4,000 plants. Tomatoes ripen 150 days after seed is sown.

We pay postage to 4th zone on Seeds in pkt. oz., 1/4 lb., 1 lb., and 10 lb. lots

BONNY BEST

An early productive variety, being 10 days earlier than Chalk's Early Jewel. The fruit is round and of a light scarlet color. Very productive and of fine quality. Pkt. 10c; oz. 30c; 1/4 lb. \$1.00; 1 lb. \$3.00.

EARLIANA

"A Very Early Tomato"—This Tomato is not only extremely early but of particularly fine quality, which is very rare in an early Tomato. The flesh is remarkably solid and it has few seeds. It has the habit peculiar to many early sorts of setting the bulk of its fruit close to the center of the plant, so that they are exposed to the sun and thus ripen early. These qualities make it particularly useful for a first crop variety. Pkt. 10c; oz. 40c; 1/4 lb. \$1.30; 1 lb. \$4.00.

GOLDEN QUEEN

"Finest of the Large Yellow Tomatoes"—The superior flavor of the yellow varieties is bringing them into favor as table fruit, and those who think of a Yellow Tomato as a rough fruit of the old yellow sort will be surprised at this smooth, beautiful fruit, which, though large, is as smooth and well-shaped as the best of the red varieties and of a fine and distinct flavor. Pkt. 10c; oz. 30c; ½ lb. \$1.00; 1 lb. \$3.00.

PONDEROSA

A Tomato of Superior Quality—It is massive in size, ponderous in weight, perfect in shape, smooth as glass, solid and meaty as beef steak, prodigiously prolific and succeeds everywhere. It is free from watery cavities—almost seedless—and ripens thoroughly from center to skin, its glowing crimson color permeating the flesh to the heart. Toothsome and rich when sliced—savory and delicious when canned. Unaffected by drought and does not blight or rot. First ripe fruits are often picked in 10 weeks from seed sowing, while late fruits may be gathered until frost. Pkt. 10c; 0z. 60c; ¼ lb. \$2.00; 1 lb. \$6.00.

RED PEAR SHAPED

A Very Popular Preserving Tomato—As the name implies, the fruit is shaped like a pear—small at the stem and enlarged at the top. It is small, about 2 or 3 inches long. It is bright scarlet, is of fine flavor, and makes delicious preserves or salads. Pkt. 10c;

STONE

The Bespect of Its Type in Every Respect — It ripens evenly to the stem without a crack, and is not subject to rot. Vine vigorous and very productive. Fruit round, apple-shaped, very large, very deep red in color and astonishingly heavy. Our stock is distinctly superior to most of that offered under this name, being more uniform, better colored and larger. Pkt. 10c; oz. 30c; ¼ lb. \$1.00; 1 lb. \$3.00.

TROPHY

A Large and Delicious To-mato—The Trophy was the first of the modern improved first of the modern improved Tomatoes. It was of superior color, size and solidity, but lacked smoothness and regularity. By most careful breeding and selection, an improved strain has been developed, and the Trophy now combines all its original good qualities with smoothness, regularity and symmetry of fruit. Vine strong-growing, vigorous and productive. Fruit very large, very solid, fine flavored and a beautiful deep, rich red in color. Pkt. 10c; oz. 35c; ¼ lb. \$1.15; 1 lb. \$3.50.

YELLOW PEAR SHAPED

Small Fruited Golden Yellow variety. Pkt. 10c; oz. 75c.

HERE ARE NAVLET'S TWO FAMOUS VARIETIES

NAVLET'S "EARLIEST OF ALL"

Navlet's Earliest of All is not only the earliest of all Tomatoes, but is beyond question one of the largest, finest, most productive, finest looking, best keeping and choicest all-round Tomatoes in the world.

the world.

The fruits are invariably of immense size and a good, splendid Tomato, producing right through to the frosts. Always smooth, of firm, solid flesh, and a deep, attractive red in color. It is deliciously flavored and is unsurpassed for salad or slicing.

As a Canning Tomato the Earliest of All has few equals and on account of its firmness it is an excellent shipper.

We grow the seeds on our own farms—and seed is taken only from the largest and finest shaped fruits. To make sure of getting the genuine Chas. C. Navlet Co.'s Earliest of All Seeds order direct from us. Pkt. 20c; oz. 75c; ½ lb. \$2.50; 1 lb. \$7.50.

NAVLET'S "SAN JOSE CANNER"

The Next Prolific Towato for the Market Grower.

The Most Prolific Tomato for the Market Grower Situated as we are in the heart of the canning industry, we know the needs of canner and grower alike.

Our San Jose Canner Tomato is already famous as a prolific producer, with well colored, solid, finely flavored Tomatoes of uniformly large size.

For transpadent cannot that will return.

For tremendous crops that will return you a handsome profit, turn to Navlet's San Jose Canner variety this season.

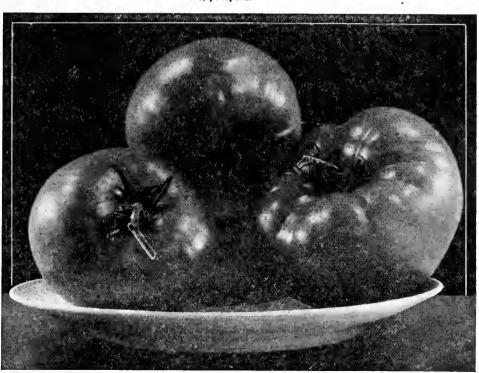

Pkt. 15c; oz. 60c; ¼ lb. \$2.00; 1 lb. \$6.00.

TOMATO PLANTS

All the favorite varieties—Earliest of All, Ponderous, Stone, San Jose Canner, Trophy and Earliana. 25c doz., postpaid: \$1.25 per 100, postpaid. Ready in March.

GROUND CHERRY OR HUSK

Grows like a Tomato; fruits like a Tomato, but the small fruit is enveloped within a husk. It is good for preserves. Pkt. 10c; oz. 40c, postpaid.

Navlet's San Jose Canner gives a fine, heavy fruit of uniform size

Lawns with Their Sweep of Velvet Sward

Make your landscape spacious and restfully green

Repose enters a landscape the minute you contrast masses of shrubbery with quiet, restful lawn spaces. We are listing here many types of lawn seed. Your selection depends upon your particular soil and other conditions. If you will let us know your soil conditions and exposure of your contemplated lawns, we will be glad to advise as to the best choice of grass or mixture. It always pays to get good seed. It is a glaring error to select grass seed on the basis of price alone, since there is a wide variance in the number of seed grains to the pound, and consequently a vast difference in the coverage per pound. Furthermore, the cost of good seed is negligible as compared with cost of putting in a lawn and caring for it over a period of years.

For Instructions in Making and Caring for Lawns, See Page 93

BENT, RHODE ISLAND (Agrostis Tenuis)—Makes a fine close-knit lawn of splendid color. Can well be blended into mixed lawns as it stands wear well and is often used on golf courses. Has not the creeping habit of Seaside and Golf-A-Lawn Bent Like the other Bent Grasses, thrives best in medium type soil, slghtly acid, and is injured by applications of lime. 1 lb., \$2.00; 10 lbs. \$18.00, postpaid.

BENT, SEASIDE (Agrostis Stolinifera Maritima)—Often referred to as Cross County Bent, Cocoos Bent. A true creeping Bent, stoleniferous in habit. Our seed is hand-harvested with great care and runs over 95% in purity. Once established it improves with age. This Bent is used where an unmixed Bent Lawn is desired. The best suited to light soils. 1 lb. \$2.00; 10 lbs., \$18.00, postpaid.

BENT, GOLF-A-LAWN (Agrostis Stolinifera Astoriana)—This strain has a wider range of adaptability and will succeed best on heavier acid type soils. The seed is certified and of 98% purity, especially selected for Putting Greens. Athletic Field Mixtures, and for lawns subject to rough usage. 1 lb., \$2.25; 10 lbs., \$21.50, postpaid.

CHEWING FESCUE (Festuca rubra var. fallax)—A small, hardy, low-growing grass producing very fine dark green leaves which rarely exceed 6 inches in height and in growing has a dense turf-forming habit. A special point in its favor is its durabilty on the poorer types of gravelly and sandy soils. It is a permanent grass and its turf improves with age. 1 lb., 60c; 10 lbs \$5.00 postraid 10 lbs., \$5.00, postpaid.

RED TOP (Agrostis Alba)—Gives a quick growth and succeeds on all soils, doing best on moist soils. Used in blends with other grasses. 1 lb., 45c; 10 lbs., \$4.00, postpaid.

ROUGH STALKED MEADOW (Foa Trivialis)—A very fine lawn grass, especially valuable as an ingredient in shady lawn mixtures, as it excels other grasses in the shade. It is a spreading species with narrow, flat, dark green leaves. It is very much like Kentucky Blue Grass, to which it is related, but starts quicker and spreads faster. 1 lb., 75c; 10 lbs., \$6.50, neethed.

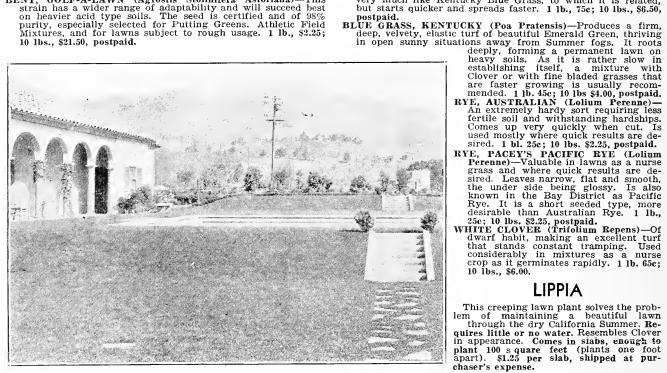

sired. 1 bl. 25c; 10 lbs. \$2.25, postpaid.

RYE, PACEY'S PACIFIC RYE (Lolium Perenne)—Valuable in lawns as a nurse grass and where quick results are desired. Leaves narrow, flat and smooth, the under side being glossy. Is also known in the Bay District as Pacific Rye. It is a short seeded type, more desirable than Australian Rye. 1 lb., 25c; 10 lbs. \$2.25, postpaid.

WHITE CLOVER (Trifolium Repens)—Of dwarf habit, making an excellent turf that stands constant tramping. Used considerably in mixtures as a nurse crop as it germinates rapidly. 1 lb. 65c; 10 lbs., \$6.00.

This creeping lawn plant solves the prob-This creeping lawn plant solves the prob-lem of maintaining a beautiful lawn through the dry California Summer. Re-quires little or no water. Resembles Clover in appearance. Comes in slabs, enough to plant 100 s quare feet (plants one foot apart). \$1.25 per slab, shipped at pur-chaser's expense.

We Recommend These Fine Lawn Mixtures

There are many advantages of well-blended mixtures. The principal reason for such blends is the fact that each grass lives, to a great extent, on different constituents. The season that would completely check the growth of one variety of grass will act as an encouragement to some other variety, so that the complete failure of a mixture is practically impossible.

SAN JOSE HIGH SCHOOL LAWN MIXTURE (Chas. C. Navlet Co.'s)—Contains a variety of grasses which keep the lawn green all the year round. Strong tough grass that will always present a velvety appearance. Lb. 75c; 10 lbs. \$7.50, postpaid.

A-1 SPECIAL MIXTURE—In this mixture we are able to offer a A-1 SPECIAL MIXTURE—In this mixture we are able to offer a combination of grasses containing no coarse leaved or bunch grasses, mostly of imported stock, all fine leaved, long lived, of fine texture and rich green color. There is a portion of Bent Grass in this mixture. There is no Rye or similar short-lived coarse grasses in it. For those who wish a permanent fine lawn we offer this as the best and most carefully blended it is possible to obtain. 1 lb., \$1.35; 10 lbs., \$12.50, postpaid.

NAVLET'S EMERALD GREEN MIXTURE—A carefully blended mixture of the permanent fine leaved deep green grasses without Clover or Rye; will remain green the year round. Will stand both a sunny and partially shaded situation. 1 lb., 75c; 10 lbs., \$7.00, postpaid.

10 lbs., \$7.00, postpaid.

GOLDEN GATE MIXTURE-A popular mixture of hardy grasses with a little Clover, which grows quickly and stands considerable abuse. Thrives in light soils. 1 lb., 50c; 10 lbs., \$4.00,

PANAMA-PACIFIC LAWN GRASS-Our own carefully blended mixture with Clover of varieties which produce a thick velvety turf, permanent and hardy in most soils. This mixture is one of our best sellers and has proven extremely satisfactory. 1 lb., 60c; 10 lbs., \$5.75, postpaid.

SHADY LAWN GRASS-This is a special blend of shade-loving grasses for lawns facing the North without much sunshine and for shady spots under trees and places where there is little direct sunlight. It will quickly produce an abundant and even growth of deep beautiful green grass. 1 lb., 75c; 10 lbs., \$7.00, postpaid.

Navlet's Famous Farm Seeds

Write for Prices on Larger Quantities.

ALFALFA

As a fertilizing, land-enriching crop it is unequaled. One seeding stands for years. Stands drought and dampness. If possible, sow with oats, 20 pounds to the acre. Don't feed green alfalfa to hungry stock as it has bloating effect when they over-eat. 25c lb.; 35c lb., by mail; 10 lbs. \$2.00, express collect.

35c lb., by mail; 10 lbs. \$2.00, express collect.

HAIRY PERUVIAN—A wonderful alfalfa.

Starts to grow while the weather is yet cool and makes at least one additional cutting a season. This gives a much larger tonnage—sometimes 20 per cent more. The leaves and stems are covered with fine downy hairs. Lb. 25c; 35c lb., by mail; 10 lbs. \$2.00, express collect.

Prices Quoted are Subject to Change.

MILLET

HOG-The seed is large for a Millet and makes a rich food. Good for hogs or chickens. The seed ripens while the stem is yet green, so that if cut promptly you can get a crop of seed and also one of fodder or ensilage. Lb., 15c.

RAPE

DWARF ESSEX-A plant of inestimable value to poultry farmers and sheep raisers. Lb., 20c; 30c, postpaid; 10 lbs. \$1.50, express

SESBANIA

Thrives in alkali soils, where other leguminous crops will not grow. Contains abundance of nitrogen-bearing nodules on its heavy taproot. Give plenty of water up to time of maturity and it will produce heavy woody growth in short time. Stalks often 12-14 feet tall and 1 to 3 inches diameter at base. Lb., 20c; 30c postpaid; 10 lbs., \$1.75, express collect.

SUDAN GRASS

Annual forage plant used both for hay and silo. Cut with a mower just after full bloom. Two cuttings are assured, and in some places four. Yields from two to eight tons per acre, depending upon whether irrigated or not. Plant in Spring after frost is past. If drilled in rows 18 inches apart, four to six pounds per acre is required; if in rows 36 inches apart, two to four pounds per acre, and if sown broadcast, 15 pounds per acre. Lb., 20c; 30c postpaid; 10 lbs., \$1.75, express collect.

SUGAR CANE

EARLY AMBER—All kinds of livestock relish it. A heavy cropper and very nutritious. If cut when two feet high it will give several cuttings during the season. Sow 10 pounds of seed per acre in drills and 25 pounds broadcast. Lb., 15c; 25c postpaid; 10 lbs., \$1.00 express collect.

SUNFLOWER

MAMMOTH RUSSIAN—An excellent and cheap food for fowls. Three pounds of seed will plant an acre. Yields from 50 to 70 bushels per acre. Sow as soon as ground is warm. Lb., 20c; 30c postpaid; 10 lbs., \$1.50 express collect.

TIMOTHY

PHLEUM PRATENSE—Grows in any location, but does best in most deep soils. Exceedingly productive. Relished by all kinds of stock: 15 pounds required for an acre. Lb., 20c; 30c postpaid; 10 lbs., \$1.80 express collect.

MELILOTUS

MELILOTUS ALBA (Sweet Clover)—Biennial legume with deep tap-root penetrating hardpan, which no other plant will. Used also as spring cover crop. Lb., 20c; 30c postpaid; 10 lbs., \$1.75 express collect.

MELILOTUS INDICA (Bitter Clover)—Starts very early and makes a good growth during the Winter, being three feet tall when ready to plow under. Use 20 to 25 pounds per acre. Flowers yellow. Lb., 15c; 25c postpaid; 10 lbs., \$2.25 express

BERMUDA GRASS

Valuable for warm climates, as it withstands hot, dry Summers. It germinates slowly. Lb., 50c; 60c, postpaid; 10 lbs., \$4.50, express collect.

CLOVER

BURR CLOVER—The native forage plant of California. Easily cultivated. Grows all Winter and well into the Summer. We offer only "Hulled Seed," which is much easier to grow than in the burr. Lb., 20c; 30c, postpaid; 10 lbs., \$1.50, express col-

LADINO CLOVER—Mammoth white Clover, a rapid grower, furnishing abundance of tender green feed, desirable for young poultry. Plant 8 lbs. to acre. Lb., 80c; 90c, postpaid; 5 lbs.,

\$3.75, express collect.

SAPLING CLOVER—Grows much larger and lasts longer than the common Red Clover. Fifteen pounds required for an acre.

Lb., 45c; 55c, postpaid; 10 lbs., \$4.00, express collect.

COW PEAS

BLACK EYE—Used largely for green manure. It is also valuable if allowed to mature the seed, when the dry vine can be plowed under and the seed used to grind as feed for stock. If for green manure sow broadcast, using 80 pounds per acre. If for seed for fodder, sow in rows 3 feet apart, using 40 pounds per acre. Lb., 15c; 25c, postpaid; 10 lbs., \$1.00, express called. collect.

HORSE BEANS

BROAD WINDSOR—Used extensively for stock feed and for cover crops. Lb., 25c, postpaid; 10 lbs., \$1.00, express collect.

SMALL WINDSOR—Preferred by many for green manuring. Because of smallness of seed requires fewer pounds per acre.

Lb., 15c; 25c, postpaid; 10 lbs., \$1.25, express collect.

KAFFIR CORN

Especially desirable for planting where the Summers are hot and dry. The stalks and blades cure into good fodder and are also desirable to furnish green forage during the Summer months. Lb., 20c; 10 lbs., \$1.50, express collect.

VETCHES OR TARES

Exceedingly nutritious—much more so than Clover—and may be fed with safety to all kinds of stock. Perfectly hardy and remains green all Winter. It should be sown during August and September, mixed with Rye, which serves as a support for the plants, or in Spring with Oats or Barley. Lb., 15c; 25c postpaid.

TREE SEEDS

All may be had also in 10c packet, unless packet price is given differently

Acacia—Per ounce 50c.
California Fan—Per ounce 15c.
California Privet—Per ounce 50c, lb. \$5.
Date Palm—100 seeds 50c.
Edulis—Per 10 seeds 15c; 100 seeds \$1.25.
Eucalyptus (Red Gum)—Per ounce \$1.00.
Eucalyptus (Blu Gnm)—20c per pkt.; \$1.00
oz., \$10.00 per lb.
Madrone—Per packet 25c.
Manzanlta—Pkt. 25c.
Monterey Cypress—Per ounce 50c; \$5.00 lb.
Monterey Pine—Per ounce 50c.
Pepper—Per ounce 20c.
Phoenix Canariensis—Per 10 seeds 15c;
100 seeds 50c.
Sequola Gigantea—Per packet 25c.
Sequola Sempervirens—Pkt. 25c; \$2.50 oz.
Washington Robusta—A robust Fan Palm.
Per ounce 25c; lb. \$2.50.
Wild Cherry—Per ounce 20c; lb. \$2.00. Acacia-Per ounce 50c.

AROMATIC AND MEDICINAL HERB SEEDS

ANISE—Used as a cordial and for gar-nishing and flavoring. Seeds have an agreeable aromatic taste. Pkt. 10c, oz. 30c.

30c.

BASIL—Sweet. The leaves are used for flavoring soups, stews and highly-seasoned dishes. Pkt. 10c, oz. 40c.

BORAGE—The leaves are used for flavoring and the flowers furnish bee pasture. Pkt. 10c, oz. 50c.

CARAWAY—Grown for the seeds, which are used extensively for flavoring of bread, pastry, etc. Pkt. 10c, oz. 25c.

CATNIP or Catmint—The leaves are used for seasoning. It also makes an excellent bee pasture. Pkt. 10c.

CHERVIL—Used in soups and salads. Pkt. 10c, oz. 15c.

CHERVIL—Used in soups and salads. Pkt. 10c, oz. 15c.
CORLANDER—The seeds are used in the manufacture of liquors and confectionery. Pkt. 10c, oz. 25c.
ROSEMARY—The aromatic leaves are used

for seasoning. Pkt. 10c, oz. \$1.00.

DILL—The seeds have an aromatic odor and warm, pungent taste. They are used as a condiment and also for pick-

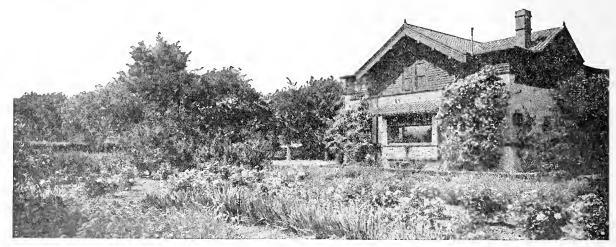

used as a condiment and also for picking cucumbers. Pkt. 10c, oz. 20c.
FENNELL—Sweet. The boiled leaves are used in sauces. Pkt. 10c, oz. 30c.
MARJORAM—Sweet. The leaves and the ends of the shoots are esteemed for seasoning in Summer and are also dried for Winter use. Pkt. 10c, oz. 50c.
RUE—For medicinal purposes. Good for the croup. Pkt. 10c.
SAGE—The most extensively used of all herbs as a seasoning for dressing. Pkt. 10c, oz. 50c.

herbs as a seasoning for dressing. Pkt. 10c, oz. 50c.
SUMMER SAVORY—A hardy annual. The dried stems, leaves and flowers are extensively used for flavoring—particularly in dressings and soups. Pkt. 10c, oz. 75c.
CHIVES—Leaves have a mild onion flavor and are used in soups and salads; perennial. Pkt. 15c, oz. \$1.00.

Navlet's Famous Flower Seeds

Developed to thrive in Western Gardens with masses of colorful bloom

We prepay postage on all flower seed orders.

A Flower Garden! A quaint old fashioned garden, perhaps, with the primness of hollyhocks and the delicate grace of columbine. Or perchance a rock garden with its little trailing vines and sturdy flowerets Or a great sweep of color, with a massing of flowers, row upon row of serried loveliness. . . Anyway, a Garden! A few little packets of Navlet seeds, and the miracle of beauty is warre! beauty is yours!

AGROSTEMMA CORONARIA (H.P.)

(Rose of Heaven)

An attractive free-flowering hardy perennial of easy culture, producing glowing crimson flowers like a single pink; has silvery-white foliage; 2 feet. Sow in Fall or early Spring in boxes to transplant or out of doors. Packet 10c.

ABRONIA (Sand Verbena) (H.A.)

A pretty trailing annual. Thrives in dry locations. The pink flowers are produced in Verbena-like trusses. Plant from September to May. Large packet, 10c.

ABUTILON (Flowering Maple) (P.)

Sometimes known as Chinese Bell-Flower. Growing into small trees in California. Plant from February to May or in September and October. Fine Mixed—All Colors—Large packet 10c.

KEY TO ABBREVIATIONS

H. A.—Hardy Annual

H. P.—Hardy Biennial
H. P.—Hardy Perennial
H. H. P.—Half-Hardy Perennial
T. P.—Tender Perennial

"Tender" plants will not stand

frost.
"Half-hardy" plants will stand a light frost.
"Hardy" plants will stand considerable frost.

For Planting instructions, see Page —

ANEMONE (H.H.P.)

R. BRIDGID—Mixture of semi-double and double flowers. Anemones bloom early in Spring and make a pretty bed or border. Sow seed outdoors from April to June for next Spring's bloom and keep shaded until plants appear. Packet 15c; 1/8 oz. \$1.00.

AMARANTHUS (H.H.A.)

(Plants, Page 55)

Remarkably handsome foliage and interesting flowers. Plant from February to May. Mixed — Assorted Colors — Large packet 10c.

ACQUILEGIA, See Columbine, Page 30

ACHILLEA (The Pearl) (H.P.)

(Plants, Page 58)
Grows about two feet high, covered with heads of double white flowers throughout the entire season. Fine for cutting; will flower the first year if sown early. Sow August to March in boxes to transplant. Packet 15c.

ACROCLINIUM (Everlasting Flower) (H.A.)

Producing white and rose-colored Daisy-like flowers. Much used for wreaths and Winter decorations. Flowers should be gathered when young to be preserved. Plant from January to May. Mixed packet 10c; ¼ oz. 20c; oz. 60.

(African Daisy, See Dimorphothca, Page 30)
(Plants, Page 58)

AGATHEA COELESTIS (H.H.P.)

(Blue Daisy or Blue Marguerite)
Sky-blue flowers with yellow disk growing 1 foot tall. Remaining in bloom all year around. Useful for window boxes. Sow the seed from September to April in boxes to transplant in Spring. Packet 10c; ¼ oz. 50c.

AGERATUM (Floss Flower) (H.H.A.)

For beds and borders. A hardy annual of easy culture, especially valuable for bedding, as it is literally covered with blosoms all Summer. Sow early in Spring, either in boxes to transplant or out of doors and thin to four or six inches.

BLUE PERFECTION—This is the darkest colored of all large flowering Ageratums. Color deep amethyst-blue. Compact growth; fine bedder. Packet 10c; ¼ oz. 30c.

SNOW WHITE-Packet 10c 1/4 oz. 25c.

ALYSSUM (H.A.)

(Plants, Page 58)

Produces an abundance of sweet-scented blossoms. Easy to grow and blooms from early Summer until severe freezing weather. Sow from September to May.

MARITIMUM (Sweet Alyssum)—Fragrant white flowers all Summer. Hardy perennial. Packet 10e; oz. 35c; 1/4 lb. \$1.00.

LILAC QUEEN—Flowers light lilac, well suited for bedding or ribbon bordering, the plants being erect and compact. Packet 10c: 1/4 oz. 25c.

SAXATILE COMPACTUM (Gold Dust)—Single plants easily cover a square foot in a year, and produce many hundreds of bright yellow flowerheads. Grayish foliage. Hardy perennial. One foot. Packet 10c; 1/4 oz. 35c.

ANCHUSA (H.P.)

(Plants, Page 58)

ITALICA GRANDIFLORA (Dropmore Variety)—One of the best hardy perennials, about 5 feet high. Stems are covered all Summer with numerous wide star flowers of intense blue; should be in every hardy border. Packet 15c; ¼ oz. 40c.

CAPENSIS (Cape Forget-Me-Not)—A hardy annual variety, 2 feet tall, with azure blue flowers. Sow seed in boxes in Fall or early Spring and transplant when well started. Packet 10c; ¼ oz. 25c.

ARCTOTIS (African Lily Daisy) (H.A)

(Plants, Page 55)

A remarkable handsome Daisy from Africa with blooms pure white on the upper surface and reverse of petals blue-lilac. Forms branched bushes 2 to 2½ feet in height and breadth; are pure white on the upper surface, reverse of petals pale lilac. Sow the seed in the Fall or early Spring, either in boxes to transplant or outside. Packet 10c; ¼ oz. 30c.

Asters Flash Their Colors on the Fall Horizon

A few packets of Aster seeds planted from February to May will give you a profusion of flowers in the Fall when other pinks and blues are scarcest. Our careful selection and re-selection of strains gives you the most wonderful Asters to be had.

FOUR WONDERFUL VARIETIES (H.H.A.)

(Plants, Page 55)

IMPROVED GIANTS OF CALIFORNIA (Double)—Truly an aristocrat among Asters. In size of flower and length of stem, they vie with the Chrysanthemum! The seed offered this year is from re-selected stock. Your choice of six gorgeous colors—

they vie with the Chrysantnemum: The seed offered this year is from re-selected stock. Your choice of six gorgeous colors—Peach Blossom, Light Blue, Dark Blue, Light Purple, Deep Rose, and White.

These magnificent Asters combine the well-known Crego or ostrich feathered type of flower with the long, non-lateral sturdy habit of the Beauty Aster. Ideal for cut flowers, with stems up to 30 inches in length, and blooms up to six inches across. Separate colors, 15c pkt., postpaid; ½ oz. 85c. Mixture, 15c pkt.

rate colors, 15c pkt., postpaid; ¼ oz. 85c. Mixture, 15c pkt.

IMPROVED GIANTS OF CALIFORNIA (Single)—Imagine if you can, a Shasta Daisy measuring 3 to 4 inches across, with stems 18 to 24 inches, and petals slightly twisted, adding a piquant touch to their beauty and you will have a slight conception of the white Single Giant of California Aster. Imagine further this same bloom in Rose, Light Blue, Purple Lilac and delicate Flesh tints. Separate colors, 15c pkt., postpaid; ¼ oz. 85c. Mixture, 15c pkt.

CALIFORNIA SUNSHINE ASTERS (Anemone Flowered)—Several years' hybridizing and special selection have resulted in an Aster with long, sturdy stems, and blooms of fine size with twisted and quilted petals that are most unusual. All have cushion center of tiny quills in a lighter shade or white. Separate colors, flesh, pink, carmine, lavender, and violet, per pkt., 25c, postpaid. Mixture, 25c pkt.

POMPON ASTERS (Mignon)—These excited tremendous interest in our Cut Flower Department during the past season. Each plant is in itself a bouquet, a compact bush of 14 to 18 inches high, covered with brilliant Rose, fiery Scarlet or Dark Blue blooms. Exceptionally long keepers as cut flowers. Fine for bedding. 15c pkt., postpaid. Mixture, 15c pkt.

OTHER FAVORITE VARIETIES of ASTERS

OMET—Giant Branching—A gorgeous Aster of highest perfection, that wins instant enthusiasm. Flowers are of immense size, often 6 inches across, composed of long, wavy, twisted petals, gracefully formed into loose, yet densely double half globes. Plants grow luxuriantly, attaining 15 inches height, with 20 to 30 flowers on long stems. Excellent for cutting for vases. Carmine—Packet 15c. White—Packet 15c. Rose Pink—Packet 15c. Lavender—Packet 15c; 4 packets 50c. Giant Comet Mixed—Packet 10c; ¼ oz. 75c.

KTRA EARLY EXPRESS. OR EARLY WONDER—These are

EXTRA EARLY EXPRESS, OR EARLY WONDER—These are the earliest blooming Asters, commencing to bloom in June. Flowers are very large and full. The petals are twisted similar to the Comet type. Rose, Blue, Lavender, White, 25c per packet. Mixed colors 20c per packet.

ASTERMUM—The largest flowering type of all Asters, with a Chrysanthemum appearance. Flowers are large and double, well formed of the Comet class, and little earlier than the Crego's. White, Pink, Lavender, 10c per packet. Mixed packet 10c; ¼ oz. 60c.

SEMPLES, or LATE BRANCHING—A magnificent, strong, growing American strain. It forms broad, handsome bushes which are covered with large, long-stemmed and long-petaled flowers that are extremely graceful and feathery in effect. The plant grows 3 feet high. Blooms late in Autumn. White, Pink, Cardinal Rose, Crimson, Purple, Lavender, 10c per packet; ¼ oz. 50c. Collection, seven above separate packets, 50c. Packet mixed colors 10c; ¼ oz. 50c; 1 oz. \$1.50.

IMPROVED CREGO—Plants grow very robust, about 2 feet high. Flowers large, double, well-formed, and bloom in mid-season. The flowers are of the Comet type, very fluffy, and average in size from 4 to 5 inches. Very good for cutting. Pkt, 15c.

ENGLISH PERENNIAL ASTER (Michaelmas Daisy)—(P.)—Our splendid Autumn-flowering Asters, greatly improved as to size. Height 4 feet. Pkt. 15c. Mixed.

With a delicate grace and the charm of double coloring the Arctotils (African Lily Daisy) is easily a favorite.

The Giant California runs the Chrysanthemum a close second for beauty and wealth of bloom.

ASPARAGUS FERN (T.P.)

SPRENGERI—Emerald Feather. An early, easily grown, feathery-leaved variety for hanging baskets. Nothing finer for decorating for bouquet making. Plant from February to May, or from August to November. Pkt. 10c; 100 seeds 50c.

PLUMOSUS NANUS—Fine lace-like foliage, compact and most exquisite. A grand foliage plant. Pkt. 10c; 100 seeds 75c.

AUBRETIA GRAECA (H.P.)

A very dainty hardy purple creeping plant, suitable for rockeries or Spring bedding. Sow the seed in the Summer or Fall. Pkt. 15c; 1/8 oz. 50c.

AUSTRALIAN PEA VINE (H.H.P.)

(Dolichos Lignosus)

Fine climber—very desirable for covering arbors, trelises, and unsightly places. Flowering freely in large clusters of rose blossoms. Sow from February to May, or in September and October. Packet 10c; oz. \$1.00.

BACHELOR BUTTON (H.A.)

(Cornflower)—(Centaurea Cyanus)

(Plants, Page 55)

Flowers from our seed are extra fine and very bright in color. Plant from February to May, or in September and October. Blue, Rose, White or Mixed—Large pkt. 10c.

BALSAM (T.A.)

(Lady Slipper) (Plants, Page 55)

Brittle stems and foliage. Grows about 12 inches high. Flowers both single and double, in bright colors and variation, are wax-like and very attractive. Plant from February to May or September and October. Camelia-flowered, mixed, large pkt. 10c; 1/4 oz. 25c; 1 oz. 75c.

BEGONIA (T.P.)

One of the most beautiful of all window plants, handsome in foliage and bearing great quantities of lovely flowers of wax-like texture and exquisitely soft, delicate shades. Seedlings bloom in from 5 to 8 months' time. Plant February to May.

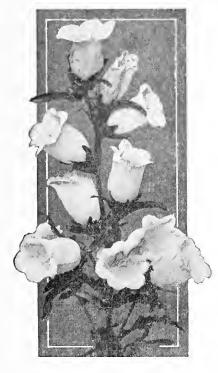

TUBEROUS-ROOTED BEGONIA—Fine single mixed—Large pkt. 35c. Choice double variaties—Large pkt., mixed, 50c. VERNON—Best bedding variety. Produces beautiful scarlet flowers and highly ornamental foliage. Large pkt. 15c.

BOSTON IVY (Ampelopsis Veitchii) (H.P.)

The finest hardy climber. The young growth is a dark purplish-green, changing in the Fall to the brightest tints of scarlet, crimson and orange. Plant from February to May-or in September and October. Pkt. 10c; oz. 50c.

Flower Secd Novelties—Navlet's newest and loveliest, are described on pages 5, 6 and 7.

A Packet of Seeds -- and a Garden Grows!

CALCEOLARIA

RUGOSA MAJOR-H. H. P.)-Self colored-bedding type. Per pkt. 50c.

GRANDIFLORA-(T. A.)-Especially fine annual for greenhouse and window decoration. The immense pocket-shaped flowers are uniquely spotted and blotched, and borne in the greatest profusion through Spring and Summer. Plant from February to Mayor from August to October. Mixed—Choicest Colors—Large pkt. 50c.

(Plants, Page 55.)

CALENDULA (Marigold) (H.A.)

Very hardy annual, 1 foot high, blooming freely at any time of year, including Winter, and for several months. Is of the easiest culture and is desirable for rather inferior soils, where less sturdy flowers do not thrive. Sow seed December to April.

ORANGE KING (Florist Strain)-Very large deep orange-red. Pkt. 10c; oz. 40c.

METEOR-Cream, striped with orange. Pkt. 10c; oz. 25c.

DOUBLE MIXED-A good mixture; some clear colors and some shaded and striped. Pkt. 10c; oz. 25c.

LEMON KING-Large, very double, lemon flowers. Pkt. 10c; oz. 40c.

BALL'S ORANGE (Florist Strain)—Beautiful well-formed double flowers of a deep orange color shading lighter in center. The most desirable for forcing under glass. Known to florists all over the world. Pkt. 15c; ½ oz. 50c; oz. \$1.50.

CAMPFIRE (Sensation)—Glorious large double brilliant orange and scarlet sheen and full yellow center. Strong stems. Pkt. 25c.

CALLIOPSIS (H.A.)

Showy and beautiful free-flowering annuals, of the earliest culture, doing well in any sunny position, blooming all Summer; excellent for cutting and massing. Sow February to June where they are to bloom in Spring, thinning out to stand 6 to 12 inches apart.

ATROSANGUINEA—Dark maroon. Plant is tall and flowers are small. One of the old-fashioned flowers. Pkt. 10c; ¼ oz. 25c; I oz. 75c.

BICOLOR SPLENDENS—Very floriferous with extra large flowers of a golden yellow color with a brown center. Pkt. 10c; ¼ oz. 25c.

GOLDEN WAVE-A large-flowering light yellow variety with maroon eye. Pkt. 10c; ¼ oz. 25e; 1 oz. 75c.

MIXED—A gorgeous mixture of golden yellow, brown maroon and other shades. Pkt. 10c; ½ oz. 20c.

The Canterbury Bell finds its place in every old-fashioned garden.

CANARY-BIRD VINE (T.A)

A dainty vine with beautiful cut leaves and pretty, delicate, clear canary yellow flowers. Sow March to June. Large pkt. 10c; 1 oz. 40c.

CANDYTUFT

(Plants, Page 55)

Valuable for bedding and border planting. Blossoms are borne on long spikes, grow abundantly, and are very fragrant. Very hardy. Attain 6 to 15 inches height.

CARMINE—Branching. Sow seed December to April. Pkt. 10c; 1

CARMINE—Branching. Sow seed December to April. Pkt. 10c; 1 oz. 50c.

LILAC—Branching. Pkt. 10c; 1 oz. 50c.

PURPLE—Branching. Pkt. 10c; 1 oz. 50c.

ROSE CARDINAL—Beautiful well-formed spikes with flowers of a deep rose color. Pkt. 10c; 1 oz. 50c.

GIANT HYACINTH-FLOWERED—Very large heads and long spikes of white flowers. Pkt. 10c; ¼ oz. 25c; 1 oz. 75c.

GIBRALTARICA (Candytuft Perennial)—Lilac, shading to white. Pkt. 10c; ¼ oz. 35c.

MIXTURE OF ALL COLORS—Pkt. 10c; ½ oz. 25c; 1 oz. 40c.

CELOSIA (Cockscomb) (T.A.)

(Plants , Page 55)

CHILDSI or Chinese Woolflower—A novel form of the feathered Cockscomb, growing 2 to 3 feet tall; the bloom starting early with a large central head which is round and globular. Several branches are thrown out, each bearing a ball of wool. Very effective in beds or borders. Crimson and yellow. Pkt. 15c;

effective in beds or borders. Crimson and yellow. Pkt. 15c; ½ oz. 60c.

CRISTATA GLASGOW PRIZE (Cockscomb)—A dwarf crimson variety, 6 or 8 inches high, with very wide combs. Valuable for borders and edging. Pkt. 10c.

PLUMOSA (Feathery Type)—Of pyramidal growth; height about 3 feet; produces feathery plumes of brilliant colors. Yellow—Pkt. 10c; oz. 60c. Crimson—Pkt. 10c; ¼ oz. 60c. Mixed Colors—Pkt. 10c; ¼ oz. 60c.

CASTOR BEAN (Ricinus) (H.H.A.)
(RICINUS COMMUNIS)—A stately plant. Produces beautiful bronze or glossy green foliage. Assorted colors, pkt. 10c; oz. 25c; ¼ lb. 60c. Plant from March to June.

CANNAS (H.P.)

Very showy colors. The Canna is known as the King of Bedding Plants, and it richly deserves the title. Choicest Varieties—Large Pkt. 10c; 1 oz. 40c. Plant from February to June.

CANTERBURY BELLS (H.P.)

(Plants, Page 58)

(Plants, Page 58)

One of the old-time perennials so much in vogue now. Very effective for bedding or table decoration. Note that we offer single colors. Sow seed August to April.

CALYCANTHEMA (Cup and Saucer Type)—In this variety the outer petals form a brim, like a saucer. Dark blue, pkt. 15c; White, pkt. 15c; Rose, pkt. 15c; Lavender, pkt. 15c. Finest mixed, pkt. 10c; ½ oz. 65c.

PERSICIFOLIA GRANDIFLORA—Peach-bell; perennials; 4 feet. Mixed, pkt. 15c; Blue, pkt. 15c; White, pkt. 15c.

PYRAMIDALIS (Chimney Bellflower)—Large flowers on tall spikes; blooms late. Blue, pkt. 10c; White, pkt. 10c; Mixed, pkt. 10c.

CARPATICA (Carpathian Harebell)—A dwarf perennial; 6 inches; for rookeries, edges and beds. Blue, pkt. 10c; White pkt. 10c; Mixed, pkt. 10c.

CAMPANULA MEDIUM—A hardy biennial of easy culture, but preferring rich, moist soil. Grows about 3 feet high and bears single bell-shaped flowers. Dark Blue, White, Rose, Lavender. Any of the above colors, pkt. 10c; ¼ oz. 35c. Single mixed, pkt. 10c; ¼ oz. 25c; oz. 75c.

CALIFORNIA NATIVE FLOWERS

A mixture of the native flowers of California. These are suitable for bedding for broadcasting and make a very showy effect. Pkt. 10c; oz. 50c; 1/4 lb. \$1.50; 1 lb. \$6.00.

The Castor Bean with its interesting bronze foliage is effective for mass planting

Sow these Seeds for a Fragrant Harvest

CARNATION (H.P.)

CHABAUD'S GIANT IMPROVED—A new acquisition in the line of Carnations; coming into bloom 6 months from seed and continuing to bloom throughout the Summer. The plants are of robust upright habit; they form 10 to 20 stalks bearing huge flowers of fine form. They come about 90% double, true and highly clove scented. Per pkt., mixed, 25c; 1/8 oz. \$1.00, postpaid. Sow from October to April.

MARGUERITE—Bloom throughout the year, and the calyx never bursts. Of dwarf, compact and pretty habit, branching closely above the ground. Choice Mixed Colors—Pkt. 10c; 1/4 oz. 40c. Plant from August to November, or from February to May.

CENTAUREAS or SWEET SULTAN (Imperialis) (H.A.)

For an early garden flower, nothing surpasses this superb new Centaurea. Each plant produces scores of exceedingly graceful flowers which are borne on long, wiry stems. The flowers—2 to 3 inches in diameter—are of the most exquisite texture and delightful fragrance, and will keep in good condition for several days. For cutting—for vases—and for corsage wear there is no finer flower. The plant grows luxuriantly as a weed and in any situation. Pure White—Large pkt. 10c. Deep Lavender—Large pkt. 10c. Brilliant Rose—Large pkt. 10c; ¼ oz. 30c. Mixed Colors—Large pkt. 10c; ¼ oz. 25c. Plant from February to Nav. to May.

SUAVEOLENS (Yellow Sweet Sultan or Grecian Cornflower)—Large showy sweet-scented bright yellow flowers. Excellent for use as a cut flower. Pkt. 10c; ¼ oz. 30c.

CHEIRANTHUS (H.H.P.)

ALLIONI (Siberian Wallflower)—9-12" high. Charming to dwarf border, in rockeries, and very striking in beds. Continues in bloom the whole season if pods are removed. Sow from August to March. Excellent in succession to Wallflowers. Dazzling, fiery-orange flowers. Imported seed. 15c pkt.

LINIFOLIUM—The mauve Alpine Wallflower, also known as Erysimum Linifolium. 9 inches high. Excellent for rockeries and small beds. Clear mauve flowers are freely produced on compact plant. Sow from August to March. Imported seed. 25c pkt.

Carnations, with their sweet spicy frag-rance. Plan for Carnations, surely

CINERARIA (H.H.A.)

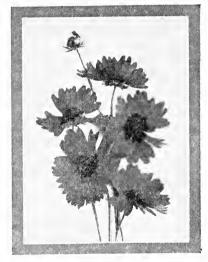

(Plants, Page 55)

Fine for the con-servatory and shad-ed places. The rich and vivid colors of the blossoms range through all the shades of blue purple crimof blue, purple, crimson and pink. Most of the varieties have a well-defined white eye. Plant from February to May.

HYBRIDA (Mixed) — The best variety having large flowers of brilliant colors. Pkt. 25c.

GRANDIFLORA (Dwarf, Mixed) — Pkt. 35c.

For explanation of abbreviations (H. A., H. H. P., etc) see Page 26

Coreposis is always delightful in those old-fashioned "mixed" bouquets

COREOPSIS (California Sunbeams) (H.P.)

(Plants, Page 59)

For a sunshiny yellow bedding flower that blooms a long season, the Coreopsis is unsurpassed. Flowers range from light yellow to orange yellow and are about three inches in diameter, with fringed or plain edges. Sow from August to May.

MAYFIELD GIANT-New strain from Australia-taller and more vigorous plant—longer and firmer stems—large blooms—more perfect corolia, intense golden yellow. Pkt. 25c.

GRANDIFLORA LANCEOLATA—Golden yellow single. Pkt. 10c;

GRANDIFLORA FLORA PLENA-Golden yellow semi-double.

Pkt. 15c; ¼ oz. 50c.

GRANDIFLORA PLENA—This variety produces a high percentage of double flowers; very easy to grow. The appearance of this flower makes it very attractive. Color, golden yellow.

CHRYSANTHEMUM (H.H.A.)

(Plants, Page 55)

(Plants, Page 55)

SINGLE—Exquisitely colored Daisy-like flowers in crimson, gold, maroon, white, etc., with finely cut foliage; good for cutting; also effective as a border plant. Sow seed from January to April. Mixed—Large pkt. 10c; ¼ oz. 20c; 1 oz. 50c.

CARAINATUM—Double Mixed—The flowers come in a great variety of colors and are fine for cutting. This type is far superior to the Coronarium and should be extensively planted. Pkt. 10c; ¼ oz. 25c; 1 oz. 75c.

CLEOME PUNGENS (Giant Spider Plant)

The plants grow 3 to 4 feet tall and are well branched, with head of curious-shape rose colored flowers. Used extensively in the mixed border and among shrubbery. Sow seed in the open when the ground becomes warm. Pkt. 10c.

COBEA SCANDENS (Cathedral Bells)

Elegant rapid growing climber. Attains a height of 20 to 30 feet in a single season. A prolific bloomer—the flowers being large and bell-shaped. Purple—Large pkt. 10c. White—Pkt. 10c. Mixed—Large pkt. 10c. Plant from February to May.

COLEUS (T.P.)

The color combinations are remarkably rich and include all the reds, metallic greens and yellows. Fine for pot culture or for groups and edging outdoors. Pkt., assorted, 25c. Plant from February to May or from July to November.

CYPRESS VINE (T.A.)

: Climber—One of the prettiest vines imaginable. Fine for training to small trelises or to run up poles or strings. Mixed Colors—Pkt. 10c. Plant from February to May.

CLEMATIS PANICULATA (H.P.)

HARDY CLIMBER—It produces attractive glossy green foliage and is covered in August and September—when nearly all other vines have ceased blooming—with a sheet of clustered snow-white flowers of the most delicious fragrance. Plant from February to May or from August to November. Seed slow to germinate. Pkt. 10c.

CLARKIA (H.A.)

This pretty and easily grown annual has been much improved in recent years, and the varieties offered below are now seen as cut flowers in most of the large cities of Europe. They do well either in sun or shade, growing 2 to 2½ feet high, with leafy racemes of double flowers, which all open in water when cut. September to June—Mixed—Pkt. 10c; ¼ oz. 25c; 1 oz. 75c.

CYNOGLOSSUM AMABILE (H.P.)

(Chinese Forget-Me-Not)

BLUE—(A.)—Recently introduced from China. Very hardy, of easy culture, and can be grown successfully in warm climates where the ordinary Forget-Me-Not or Myosotis cannot be grown in the open. Flowers are a beautiful shade of blue and closely resemble the Myosotis. Pkt. 25c, postpaid.

WHITE—A white form, similar in every respect to Amabile Blue.

Pkt. 25c nastpaid

Pkt. 25c, postpaid.

MIXED COLORS—Pkt. 10c, postpaid.

"Purchase a Miracle Here for a Dime"

COSMOS (Single) (A.)

(Plants Page 56)

Sow seed early in the Spring and plants will bloom from July to November. The pure white, soft pink and deep crimson shades are exquisite, and for cutting they have no superior. Plant from February to May.

MAMMOTH PERFECTION—Very large and perfectly round flowers. The foliage is one mass of feathery emerald green. Pure White—Pkt. 10c. Pink—Pkt. 10c. Red—Pkt. 10c; 1/4 oz. 25c. Mixed—Pkt. 10c; 1/4 oz. 20c.

NEW EARLY BLOOMING-This early flowering strain will produce blooms from July to November. Flowers are white, pink, crimson or rose purple. Finest Mixed—Pkt. 10c ½ oz. 20c.

COLUMBINE (H.P.)

(Plants, Page 58)

(Plants, Page 58)

(ACQUILEGIA)—Not only Yellow Columbine, but Violet, Rose, Blue and White. Seed may be planted in the open ground early in Spring and will in most cases bloom the same season; or they may be planted in August or September, and will come up early in Spring and make vigorous plants which will bloom abundantly during the late Spring and early Summer.

CHRYSANTHA (Golden Spurred)-Golden yellow. Pkt. 10c.

COERULEA (Rocky Mountain Columbine)—Violet, blue and white; grow 2 feet tall. Pkt. 15c.

LONG SPURRED PINK HYBRIDS-A beautiful selection of pink and rose shades. Pkt. 25c; 5 pkts. \$1.00.

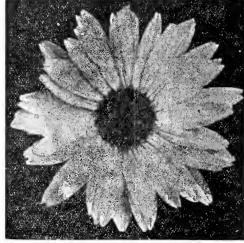

LONG SPURRED HYBRIDS, MIXED—A great variety of colors. Pkt. 15c; 1/8 oz. 50c.

CORAL BELLS (See Heuchera, Page 17)

DIDISCUS (Blue Lace Flower) (H.H.A.)

An easily grown annual which is becoming very popular; the plant grows about 18 inches high and produces attractive, umbelshaped flowers of lace-like appearance. The color is a delicate blue. Sow seeds January to April. Mixed-Pkt. 15c; 1/4 oz. 50c.

For explanation of abbreviations H. P., H. H. A., etc., refer to page 26. For Novelties, pages 5, 6 and 7.

Cosmos, with their feathery grace, are delightful alike in the garden or the house.

(Edgar Guest)

Cosmos (double crested)

(A.)—(Plants, Page 56)

PINK BEAUTY—These double Cosmos are as different from the well-known single ones as though they were a different flower. The center is double with many small petals and a rim of large outer petals. Pkt. 15c;

rim of large outer petals. Pkt. 15c; ¼ oz. 60c.

DOUBLE PURE PINK—This newest Cosmos is double in a different way from the Pink Beauty. The color is the same, but this variety has the outer petals doubled instead of the center. The perfect ones are doubled like a Golden Glow Rudbeckia. Pkt. 15c; ¼ oz. 60c.

WHITE QUEEN—Pure white and double. Pkt. 15c; ¼ oz. 60c.

ALL COLORS MIXED—Pkt. 15c; ¼ oz. 50c.

DIANTHUS (Garden Pink)

Low-growing, extensively used for borders and edging. Free-flowering and fragrant.

and fragrant.

CAESIUS (Chedder Pink)—A splendid rock plant, forming dense tufts 3 inches high, with bright rosy pink flowers in May and June. Pkt. 15c;

14 oz. 50c.

CHINENSIS (Double Chinese Pink)—The flowers bloom in clusters and in great variety of colors. Large pkt. 10c; ¼ oz. 60c; CYCLOPS—Large single and semi-double fringed flowers in various rose and red shades with clove-like fragrance; produced in great abundance. Pkt. 10c; 1/8 oz. 50c.

DOUBLE CLOVE PINKS—Double and semi-double varieties in beautiful colors. Mixed. Pkt. 10c; ¼ oz. 60c.

DOUBLE WHITE CLOVE PINKS—Very fragrant. Pkt. 15c.

GRASS PINK, SCOTCH OR PHEASANT'S EYE PINK—A beautiful single hardy Pink with fringed-edged white flowers with a crimson center. Pkt. 10c; ¼ oz. 35c.

LACINIATUS—Finest single fringed variety, in choice colors. Mixed. Pkt. 10e; ¼ oz. 25c.

IMPORTED VARIETIES

ALLWOODI (New Perpetual-Flowering Hardy Pinks)—A beautiful strain of Hardy Pinks imported direct from England. It is a new hybrid between Carnation and Pink, extremely floriferous, about 75% double. Delicious clove-scented flowers in many colors. They are perfectly hardy and flower continuously from Spring until late in Autumn. 50c pkt., postpaid.

ROCK HYBRIDS (Dwarf Hybrid Pinks)—This imported selection of Hybrid Dianthus is especially adapted for Rock Gardens. Contains all of the choicest varieties of Dianthus in a special blend to give the widest possible assortment. 25c per pkt., postpaid postpaid.

DAHLIAS (H.P.)

(For Dahlia Bulbs see Pages 50 and 51.)

An ornamental favorite. They are remarkably easy to germinate, and from the very seed leaf the plants are stocky and sturdy. Seed sown in the house in February or March will produce flowering plants the following Summer. Some of the finest, largest Dahlias and the richest colors we have ever seen were among the seedlings.

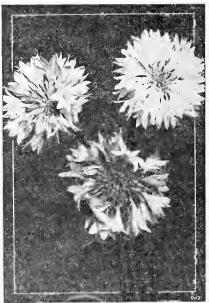

SINGLE VARIETIES MIXED—Very large flowers in a rainbow variety of colors. Pkt. 20c.

DOUBLE VARIETIES MIXED—Will produce large flowered varieties of great beauty. Pkt. 25c.

SELECTED HYBRID — Seeds collected from very choice varieties. Mixed colors. Per pkt. 25 seeds, 75c; 100 seeds,

COLTNESS HYBRIDS (Mignons)—Our selection from the best European strains of bedding Dahlias. These grow easily from seed and bloom the same year. from July until frost. Wide variety of bright. Dahlia colors on low bushy plants, 1 foot to 1½ feet in height. Pkt. 25c.

IMPERIAL CACTUS—Will produce large, double, fantastic flowers in very bril-liant colors. Pkt. 15c. Plant from Feb-ruary to May.

Didiscus (Lace Flower)

outstanding novelty of easy culture. Blooms the first year from seed. A cross between Dianthus Allwoodi and Dianthus Perbatus (Annual Sweet William). About 19 inches tall. Not unlike Sweet William, but distinct in habit, freedom of growth, method of flowering and formation of trusses. Few plants can compare with it for brilliant colorings and markings. Predicted to become as popular as Snapdragons, Asters and Stocks. Our own importation of originators seed. Per pkt. 50c.

DIMORPHOTECA

(African Daisy) (H.H.A.) (Plants Page 55)

AURANTIACA (African Golden Orange Daisy)—Neat branching habit, grows 12 to 15 inches high, and is exceedingly profuse in flowering. The Marguerite-like blossoms are a rich, glossy orange-gold, and measure 2½ inches in diameter. Sow in boxes to transplant from February to May. Pkt. 10c; ¼ oz. 40c, nostraid postpaid.

postpaid.

RINGENS—This is a very fine form of Dimorphotca introduced from South Africa. It has much the same habit of Aurantiaca, only a little more dwarf but more free flowering. The flowers are large, pure white inside, with a blue ring around the center or eye of the flower. Pkt. 25c, postpaid.

Here's an Old Fashioned Garden of Exquisite Blooms

STATELY DELPHINIUM (H.P.)—including Navlet's Exhibition varieties

One of the choicest perennials, growing One of the choicest perennias, growing immense stalks of gorgeous flowers in wonderful shades of blue, and pastel shades. Sow seed in Autumn or very early in the Spring and plants will often bloom the first Summer. Very hardy.

HOLLYHOCK STRAIN (Wrexham Type)
—Spikes of extraordinary length, tapering like spires, thickly covered with florets in rich and varied tints that cover the full range of Delphinium colors. Some are single, some double. The flowering period is unusually long. Pkt. 75c, postpaid.

NAVLET'S EXHIBITION TYPE—This year we are offering re-selections AVLET'S EXHIBITION TYPE—This year we are offering re-selections from the colors offered last year, with seed selected from the most vigorous plants. Gorgeous pastel shades, with blooms spaced more widely on the stalks, to show off the individual beauty of the large double and semi-double florets. Pkt. 50e, postpaid.

BELLADON NA—Beautiful turquoise blue. Spikes strong, tall, and a continuous bloomer. Per pkt. 20c; 1/8 oz.

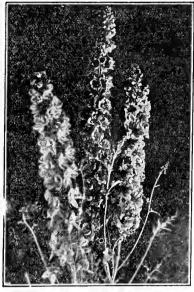

BELLAMOSUM—Same type as the Belladonna, except the color is a dark blue. Per pkt. 20c; 1/8 oz. 60c.

FORGET-ME-NOT (Myosotis) (H.P.)

(Plants, Page 56)

This pretty plant will bloom in eight weeks after sowing and will bring forth its lovely blossoms throughout the whole Summer and Fall, and continue through the Winter if taken up and potted. The small star-like flowers are borne in clusters on long stout stems. Plant from February to May, or from August to September.

PINK—Pkt. 10c; ¼ oz. 35c. WHITE—Pkt. 10c; ¼ oz. 35c. BLUE PERFECTION—Beautiful dwarf indigo-blue, very compact.

The tall blue spikes of Delphinium contrast effectively with a shrubbery massing

CHOICE DAISIES (H.P.)

(Plants, Page 56)

(Plants, Page 56)

PERENNIAL—Plants will bloom first Summer and will continue to flower for years if given slight protection during the Winter. They commence blooming in April and continue to bloom until Summer. They are not very particular as to soil, but should be grown where they have partial shade. Plant from February to May.

SNOWBALL—A very large and double pure white Daisy. The flowers—borne on long stiff stems—are excellent for cutting. The best double white Daisy. Perennial. Pkt. 10c; ½ oz. 50c.

LONGFELLOW—Very large double dark rose flowers. Long and stiff stems. Perennial. Pkt. 10c; ½ oz. 50c.

MAIMOTH WILTE—Flowers very large and of a very strong growth. Pkt. 15c.

MAMMOTH ROSE—Same type as the White. Pkt. 15c. MIXED DOUBLE DAISY—Per pkt. 10c;

1/8 oz. 40c. SINGLE LAWN DAISY—Pkt. 10c; 1/8 oz.

SHASTA DAISY

(Plants, Page 62)

(ALASKA)—Perennial—The flowers are pure white and very large. It is one of the grandest hardy perennials for any garden, blooming well the first Summer from seed if started early. Do not miss them. Plant from September to December. Large pkt. 10c.

CHIFFON DAISY

(Plants, Page 59)

The flowers grow on long stems well above the plants, similar to the well-known Shasta Daisy. The flowers are pure white and the petals are twisted and the ends cut, which gives each flower a very fluffy appearance. Chiffon Daisy keeps very well after cutting. A very heavy bloomer. Per pkt. 25c.

EUPHORBIA (T.A.)

Ornamental foliage and small inconspicuous flowers. Suitable for beds of tall plants or mixed borders. Sow seed January to

MARCH.

HETEROPHYLIA (Annual Poinsetta, Mexican Fireplant)—Grows

2 to 3 feet high, with glossy leaves that turn bright scarlet in

Summer. Thrives in warm localities. Pkt. 15c.

VARIEGATA (Snow on the Mountain)—Attractive foliage, veined with white. Pkt. 10c.

FOUR O'CLOCK

The funnel-shaped flowers are white, red, yellow or striped with these colors. They open about 4 o'clock in the afternoon and remain open all night and generally perish before noon the next day. The French call it "Belle de Nuit," "Beauty of the Night." Choicest Mixed—Large pkt. 10c; 1 oz. 25c. Plant from February to May.

FOXGLOVE (Digitalis)

(Plants, Page 59)
One of our special favorites. If plants are not allowed to seed, they are crowned for months by long pyramidal spikes of lovely thimble--shaped bells in snow white, rosy blush with rich purple. Plant from February to May, or August to October. August to October.

PINK-Pkt. 10c; 1/4 oz. 40c. WHITE-Pkt. 10c; 1/4 oz. 40c. PURPLE-Pkt. 10c; 1/4 oz. 40c. MIXED COLORS-Pkt. 10c; 1/4 oz.

For Feverfew, see Pyrethrum, Page 62.

The Chiffon Daisy, with its fluffy blooms of snowy white,

GEUM (H.P)

(Plants, Page 59) 3 Splendid Varieties

RS. BRADSHAW — A showy hardy perennial with large double brilliant scarlet flowers borne on long stems. Useful for cutting as well as for growing in borders. Sow seed September to March. Pkt. 15c; ¼ oz. 75c.

ADY STRATHEDEN—Fine rich golden-yellow flowers which match in other respects the popular scarlet variety, Mrs. Bradshaw. Pkt. 15c; 1/8 oz. 75c.

Bradshaw. Pkt. 15c; 1/2 oz. 75c.

"ORANGE QUEEN"—This very fine English novelty is a new shade of Geum, intermediate between that of Mrs. Bradshaw and Lady Stratheden, a bright orange scarlet, and one which we believe will share the popularity of these two fine varieties. The plants are of similar habit to both these sorts, and are quite as large and free blooming. 25c pkt., postpaid.

For Navlet's New Flower Secd Novelties and Specialties, turn to pages 5, 6 and 7

Navlet Seeds, Selected for California Soils

GODETIA (Satin Flower) (H.A.)

(Plants Page 59)

A handsome plant with satiny blooms in the rose shades, and particularly useful because it will grow in shady places where so few really fine flowers can be grown. Height 1 to 2 feet. Sow seed in open ground. It blooms for a long time and so profusely that the foliage is almost hidden by the large, open-wide flowers. Plant from February to May, or from August to October.

DWARF SINGLE—Pkt. 10c; 1/4 oz. 25c. TALL DOUBLE—Pkt. 10c; 1/4 oz. 25c.

TALL DOUBLE AZRLEA-FLOWERED (Double Schamin)—Carminea Type—A lovely pink with striking markings, and very long stems, fine for cutting. Pkt. 25c.

DWARF DOUBLE-AZALEA FLOWERED—Dwarf form of the tall double. In full bloom the entire bush is a mass of flowers. Pkt. 25c, postpaid.

GOURDS (Oranmental) (T.A.)

Those well-known climbers produce the most fantastic and grotesque fruit imaginable. Fine for covering sheds, training over fences and brush piles. Sow outside where they are to remain when the ground becomes warm. Plant from April to June.

MIXED ORNAMENTAL VARIETIES-Pkt. 10c; 1 oz. 25c.

GYPSOPHILA (Baby Breath) (H.P.)

ELEGANS—Grows 2 to 3 feet high, and bears a profusion of small star-shaped white flowers. Sow the seed outside in the Fall or in Spring. Plant from February to May or from August to November. Packet 10c, Pink, 10c packet.

SINGLE PERENNIAL (Paniculata Alba)-Pkt. 10c.

The Gailardia with its strong colorings is especially appropriate in a Spanish setting.

GAILLARDIA (H.P.)

(Plants, Page 59)

Remarkable for the profusion, size and brilliancy of their flowers. In bloom from early Summer until November. Excellent for beds and borders or for cutting. Plant from February to May, or from August to November.

or from August to November.

PORTOLA HYBRIDS—(P.)—Superb new strain of Gaillardias with very large flowers, the colors ranging through shades of bronze-red, with gold-tipped petals. Excellent as cut flower. Pkt. 20e; ½ oz. \$2.00, postpaid.

GRANDIFLORA SUPERBA—(P.)—This is aptly called the Chrysanthemum Gaillardia. The flowers—enormous in size and perfectly double—are borne in great profusion all Summer, and the colorings and variegations are the most brilliant and beautiful imaginable. Large mixed, pkt., 10c; ½ oz. 25c; 1 oz. 75c.

DOUBLE MIXED—(A.)—Per packet 10c; ½ oz. 25c.

DOUBLE MIXED—(A.)—Per packet 10c; ¼ oz. 25c. SINGLE MIXED-(A.)-Per packet 10c; 1/4 oz. 25c.

HEUCHERA SANGUINEA (H.P.) (Coral Bells)

Very desirable dwarf compact bushy plants growing 1½ to 2 feet high and bearing loose graceful spikes of small coral-red bell-shaped flowers. Excellent for the border or rockery and also very useful for cutting. Sow seeds November to Marchh. Large packet 25c.

GILIA (H.A.)

Sow the seed in the open either in the Fall or Spring. California Wild Flower.

ACHILLAEFOLIA—Small lavender-blue flowers in dense heads on graceful slender stems. 1 to 1½ feet. Pkt. 10c; 1 oz. 35c.

CAPITATA (Blue Gilia)—A slender branching plant 1½ to 2½ feet high; flowers light blue in dense globular heads. Pkt. 10e; 1 oz.

GLOXINIA

Beautiful hot-house plants, with large, bell-shaped blossoms, which come in rich, velvet-deep and bright colors, some of which are heautifully marked. Plant from September to March.

HYBRIDA GRANDIFLORA— A superb strain containing the spotted hybrids as well as the self-colored sorts.

HONESTY SATIN FLOWERS

(H. P.) (Moon Plant)

The flat silvery seed pods are used for Winter decoration. Freeflowering, hardy biennial. Two feet. Pkt. 10c; 1/4 oz. 30c.

HELIOTROPE (H.H.A.)

The flowers—borne in graceful clusters—are very fragrant. orms a large plant and requires a roomy situation. Plant from Forms a large pla February to May.

MME. BRUANT (Dwarf Giant Flowered)—A very fine improved variety of dwarf habit with immense heads of flowers 6 to 8 inches in diameter in various shades of blue. Pkt. 25c.

FINEST MIXED—A mixture of the ordinary true type. Pkt. 10c; 1/8 oz. 30c.

HELICHRYSUM (H.A.) (Everlasting)

A free-flowering, hardy, perennial, growing 4 to 5 feet high and bearing beautiful straw-like flowers in a great variety of shades and colors. The stems are long and the blossoms large. It is the best and most satisfactory of the everlasting flowers and makes a very handsome dried bouquet. Plant from February to May. MIXED-Large pkt. 10c.

HOLLYHOCKS (H.P.)

(Plants, Page 60)

Plant from February to May or from August to October. Single Mixed—Large pkt. 10c.

DOUBLE MIXED—Large pkt 10c. Double in separate colors; Rose, Pink, Scarlet, Blood Red, Canary Yellow—Large pkt. 10c.

ALAMEDA PINK—A beautiful strain of varying light pink shades of the Allegheny type. If seeds are planted in protected spot and transplanted early, plants will blossom the first year. While this variety is an annual, will blossom the second season. Pkt. 15c; ½ 0z. 75c.

son. Pkt. 13c; ½ 07. 75c.

DOUBLE IMPERATOR—(H. P.)—A striking, entirely original variety. Flowers 5½ to 6½ inches across, suggesting a giant crested Tuberous Begonia. Unusual tints of striking beauty; cerise-salmon with rosy-cream center; delicate pink with rosy-yellow center; light yellow flushed rose with canary center, etc. Branched from base, so that lateral stems can be utilized in vases for decorative purposes. Our own importation of originator's seed, Per pkt. 35c.

Turn to Pages 5, 6 and 7 for Novelties and Specialties

stately, old fashioned charm that is reminiscent of Grandmother's Day

Hollyhocks have a

"A Garden Is a Lovesome Thing"

and here are Flower Seeds to make it lovelier

HELIOPSIS PITCHERIANA (H.H.P.)

Grows 3 to 4 feet high. Flower early in the season and continuing the entire season. The flowers are deep golden-yellow about 2 inches in diameter; of thick texture and very graceful for cutting. Packet 10c.

HOP VINE (H.A.)

HUMULUS JAPONICUS—A rapid growing, tender climbing perennial with dense leaves. Will grow 20 to 30 feet in a season and is very valuable for covering a trellis. Sow January to April. Packet 10c; ¼ oz. 25c.

HUNNEMANNIA (T.A.)

(Santa Barbara Poppy)
Buttercup yellow blossoms from July till frost. Plant February to early May. Pkt. 10c; ¼ oz. 25c.

HYACINTH BEAN (Dolichos) (T.A.)

Rapid growing climber. The handsome purple or white flowers—produced in clusters—are followed by ornamental seed pods.

Plant from February to June. Choice Mixed—Pkt. 10c; oz. 25c.

IBERIS (Hardy Candytuft) (H.P.)
GIBRALTARICA HYBRIDA—A dwarf evergreen variety, growing
from 6 to 10 inches high, covered with blooms of white tinted
lilac in Spring and early Summer. Excellent for rockeries or
borders where bright dwarf masses are wanted. Sow seed February to May, August to November. Imported seed, 15c pkt., postpaid.

IMPATIENS (Zanzibar Balsam) (T.P.)

HOLSTII HYBRIDS—A very attractive plant for pot culture. The branches are semi-transparent and the foliage waxy green. A continuous bloomer. Flowers come in different shades of pink, red and purplish violet. Pkt. 15c.

INCARVILLEA (P.)

VARIABILIS HYBRIDS—New border perennial, flowers yellow, white and pink, trumpet shape. Blooms entire Summer. Plant early in Spring. Pkt. 25c.

KENILWORTH IVY (H.P.)

A trailing plant with small lavender or purple flowers, especially adapted for hanging baskets or trailing over walls. Pkt. 15c; 1/8 oz. 50c.

LARKSPUR (H.A.)

Grows 2½ feet high with profusion of blooms. Of very easy culture. Sow in Fall or Spring.

Double Stock-Flow ouble Stock-Flow-ered — In light blue, bright rose, pink and white, separate colors, 15c pkt.; ¼ oz. 50c; or one each of the four col-ors for 50c. Mix-ture of all col-ors: 10c pkt.; ¼ oz. 25c; 1 oz. 75c.

FRANCE-Exceptionally vig-orous, with sal-mon-pink flow-ers. Pkt. 25c, postpaid.

LOS ANGELES NS ANGELES—A new variety with a type of growth similar to the La France. The foliage is a darker green, making the large rich salmon (overlaid with rose) flowers stand out more prominently. Pkt. 35c, postbaid. postpaid.

TRICHOPHYLLA—Easily grown, sown thinly in Spring, soon forms a cypress-like hedge of lively green and of prfect symmetry; by midsummer it attains a height of about three feet, and on the approach of Autumn the whole plant becomes a deep red. Plant from January to March. Pkt. 10c; ½ oz. 30c;

KUDZU VINE (T.P.)

(Pueraria Thumbergiana)

The fastest-growing, hardy climber. Will grow 8 to 10 feet the first year. After it becomes established, 50 feet in a single season not unusual. Its foliage is large, splendid for covering permanently verandas dead trees, etc. Plant from February to May. Pkt. 10c; oz. 60c.

LANTANA (T.P.)

(Plants, Page 60)

Seed will produce fine flowering plants in 2 or 3 months. A tender perennial, often becoming shrub-like. 2 to 3 feet high, bearing Verbena-like clusters of flowers in orange, rose and other colors. Blooms constantly all Summer. Plant from February to May, or from August to October. Mixed—Pkt. 10c.

LATHYRUS LATIFOLIUS (H.P.)

EVERLASTING PEA—A hardy perennial climber, flowering first year if seed is sown in Fall. Flowers resemble Sweet Peas, but are borne on strong stems, with 8 to 10 blossoms to stem. Not fragrant, but hardy to showy and thrives in any good soil. Sow seed February to May, August to November. Mixed, pkt. 10c; White Pearl, pkt. 15c; Crimson, pkt. 10c; Pink Beauty, pkt. 10c.

LAVENDER (H.P.)

(Plants, Page 60)

Aromatic, Medicinal Herb. Bears pretty spikes of pale blue flowers that yield, when dried, a delightful perfume. Pkt. 10c; oz. 75c. Plant from February to May, or from August to October.

LEPTOSYNE (H.H.A.)

(See Dahlia)

MARITIMA—Rich lemon yellow flowers resembling Marguerites, borne on long stems and good for cutting; 2 feet tall, and has succulent divided foliage. Blooms in about six weeks from seed. Sow January to April. Pkt. 10c; ¾ oz. 40c.

A massed planting of Larkspur and Delphinium

LAVATERA (Mallow)

ASSURGENTI-FLORA (Tree Mallow)—(H. P.) Grows about 10 feet high and covered with rosy - crimson cup-shaped flowers. Much used hedges or for wind - breaks about San Francisco. Sow seed February to May or August to November. Pkt. 10c; oz. 35c.

SPLENDENS— (H. A.)—Showy and free-flowering, growing, 3 to 4 feet tall. Bril-liant rosy carmine flowers. Splendid for large beds, where they bloom all Summer; fine for cutting. Sow in April where they are to bloom. Pkt. 10c; oz. 35c.

Color from Spring to Early Winter

when these hardy seeds come into blooming

LINARIA (H.A.)

Sow Seed January to April

DALMATICA-A very striking perennial with clusters of golden yellow flowers resembling Snapdragons. Spikes 18 to 20 inches in length. A very valuable addition to the perennial garden. Pkt. 25c, postpaid.

MAROCCANA HYBRIDA MIXED-Very desirable for edgings and rockeries as it only grows about 9 inches high. It comes in a variety of colors. Blue, purple, red, white, primrose, pink and lavender. Exceptionally meritorious as a ground cover around Tulips or Lilies. Pkt. 25c, postpaid.

The Lupin is one of California's delights.

LUPIN

Conspicuously ornamental. Produces long and exceedingly beautiful spikes of variously colored pea-shaped flowers. Very valuable for mixed flower borders and beds. Of the easiest sulture iest culture.

NANUS—(A.)—Little blue-and-white wild flower. Carpets the fields in late May. Grows 10 to 12 in. tall. Sow seed February to April. Pkt. 10c; 1 oz. 30c; ½ lb. \$3.25. Mixture of all Colors—Pkt.

MIXTURE OF ALL COLORS—A R. 10c; 1 oz. 20c.
POLYPHYLLUS— (P.)—Mixed
—An extra fine Lupin.
Flower-spikes are tall, leaves bright glossy green. Very attractive. Sow seed August to November, February to April. Pkt. 10c; 1 oz. 50c.

LINUM (Scarlet Flax)

(H. A.) (Plants, Page 60)

Of slender and graceful appearance. The bright red flowers—borne on smooth stems—are produced with great liberality. Plant from February to Mey: erality. to May.

RUBRUM (Scarlet Flax)-Pkt. 10c; 1 oz. 30c. (PERENNIAL FLAX — Blue. Pkt 10c; ¼ oz. 25c.

MARIGOLDS (H.A.)

(Plants, Page 56)

These showy golden flowers have been developed to wonderful size. Plant from February to May, or August to November.

LOBELIA (H.H.A.) (Plants, Page 56)

Quick-growing charming little plants that bloom very quickly from seed and continue all through the season. Nothing prettier for beds, edgings, baskets and pots. Liquid manure during bloom greatly improves the flowers. Plant from February to May.

CELESTIAL BLUE—Very large blue flowers, borne well above the plants; growth dwarf and compact. A free bloomer. Finest blue for edging. Pkt. 15c; % oz. 60c.

CRYSTAL PALACE COMPACTA—Used most for borders, where dark blue is desired. Height 4 inches. Flowers deep blue, dark foliage. Pkt. 10c; % oz. 50c.

WHITE GEM-Growth very compact, with snow-white flowers covering the plant. Pkt. 10c; 1/8 oz. 40c.

CHOICE MIXED COLORS—Large pkt. 10c; 1/8 oz. 40c.
CARDINALIS (Perennial)—The blossoms are produced on tall showy spikes, 3 feet high. Color deep crimson, foliage dark red. Does well in moist ground. Should be cultivated more extensively. Pkt. 25c.

GRACILIS-Light blue; trailing, light-green foliage. Pkt. 10c.

LYCHNIS (H.P)

(Rose Campion, Jerusalem Cross) (Plants, Page 60)

Handsome hardy perennials of easy culture, for massing in beds and borders, bloom first year if sown early. Sow seeds August to November, February to April.

CHALCEDONICA-Fine for scarlet flowers; 2 feet. Pkt. 15c; 1/4

HAAGEANA—Brilliant orange, scarlet, crimson, etc.; in mixture; 1 foot. Large pkt. 15e; ½ oz. 50e.

VISCARIA SPLENDENS—Bright rose-red, very showy. Pkt. 15c; ½ oz. 50c.

LYTHRUM (H.P.)

(Plants, Page 60)

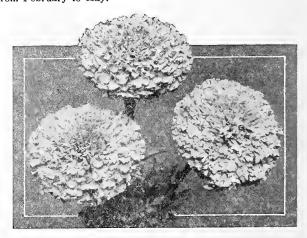

Grows in marshes and wet places. Flowers produced in the garden are very fine. They flower freely in the Autumn months and can be propagated from divisions. Large spikes of bright rose-colored flowers. Sow seed August to November, February to

MARGUERITE (Painted Daisy) (A.)

They remain in blossom throughout the year, and are of easy culture. It succeeds in almost any kind of soil and is a great favorite wherever grown. The large single and semi-double flowers are star-shaped, and the foliage is beautifully cut. Pkt. 10c. Plant from February to May.

MAURANDIA (T.P.)

Giant flowering. Beautiful climber for either garden or greenhouse decoration and for hanging baskets; gemmed with Gloxinia-shaped flowers of rich purple white and rose. Fully double the size of the older well-known sorts. Mixed—Pkt. 15c. Plant from February to May.

The big African Marigold is like a ball of sunshine.

Nasturtiums are the Pollyannas of the Garden

Any old place, any old time, any old soil, Nasturtiums are always bright and cheery and abundant. The dwarf varieties are excellent for window boxes, and the climbing varieties might lend a flash of color to your rockery. We offer the leading strains of both types.

NAVLET'S CHOICE NASTURTIUMS (T.A.) Tall or Climbing Varieties

Suitable for rockeries, low fences or shrubbery. Flowers are showy and profuse, and foliage is lovely. Pkt. 10c; oz. 20c; ¼ lb. 40c; 1 lb. \$1.25. Six pkts., your choice of colors, 45c, postpaid.

VARIEGATED NASTURTIUMS

Climbing variety with leaves variegated with yellow, white and green. Flowers rich scarlet maroon. Pkt. 10c; oz. 25c; 1/4 lb. 75c.

MIGNONETTE (Little Darling) (H.A)

No garden is complete without Mignonette. We pride ourselves on our choice strains of this popular flower and know that no finer seed can be procured anywhere. Sow early in the ground for Summer blooming and in pots any time for the window.

ALLEN'S DEFIANCE—Spikes from 12 to 15 inches long. Spikes have been kept three weeks after cutting, retaining their fragrance and grace. Large pkt. 10c; 1/4 oz. 25c.

COMMON SWEET or Reseda—One of the most popular varieties. Very attractive and exceedingly sweet. Large pkt. 10c; 1 oz. 25c. Plant from August to November, or from February to May.

GOLDEN MACHET—Plants are of a strong habit, bearing long massive spikes of golden-yellow blossoms. Large pkt. 10c; 1/4

PURE MACHET—Well adapted for pot culture. Dwarf pyramidal growth, bearing numerous flower stalks. Highly colored and very fragrant. Large pkt. 10c; 1/4 oz. 25c.

MOONFLOWER (Ipomea) (H.A.)

The most quick-growing vine, with beautiful and varied flowers; for covering walls, trellises, arbors or stumps of trees. Soak the seed in warm water over night to assist in rapid germination. Sow seed January to April.

GRANDIFLORA (Moonflower)—At night and during dull days the plants are covered with large pure white fragrant flowers. 5 to 6 in. in diam. It grows very rapidly and will cover a large surface. Pkt. 10c; ½ oz. 30c; 1 oz. 50c.

RUBRO COERULEA (Heavenly Blue)—Large sky-blue flowers, free bloomer. Pkt. 10c; ¼ oz. 30c.

BONA NOX (Evening Glory)—Large fragrant violet flowers, opening in the evening. Pkt. 10c; 1 oz. 50c.

MOMORDICA (Balsam Apple) (T.A.)

MOMORDICA BALSAMINA—A curious climbing annual, growing 10 feet high, with round yellow, warted apple-shape fruit and glossy leaves. Thrives in warm localities. Plant in late Spring when ground is warm. Pkt. 10c.

For Myosotis, see Forget-Me-Not,

MORNING GLORY (H.H.A.)

Sow Seed February to May

GIANT IMPERIAL JAPANESE—The flowers, of exquisite beauty and enormous size, range in color from pure white to rose crimson and carmine through blues and purples to almost black—some being mottled, striped, penciled and bordered in enchanting ways. The foliage is also often richly marbled and varlegated. Pkt. 10c; oz. 25c.

TALL MORNING GLORY—Produces an abundance of foliage and gay blossoms. Mixed—An almost endless variety of colors gay blossoms. N Pkt. 10c; oz. 20c.

DWARF MORNING GLORY—Flowers are about two-thirds the size of other varieties and remains open all day in sunshiny weather.Pkt. 10c; oz. 20c.

MIMULUS (H.H.P.)

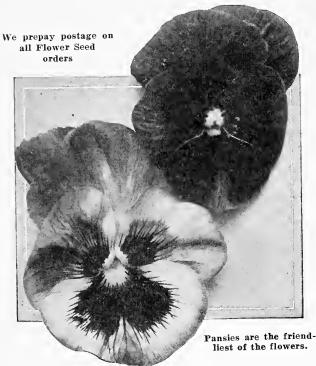

Large brilliantly-hued flower, spotted or striped in many odd ways. Thrives best in rather moist situations. If sown early, will bloom the first year. Assorted colors—Pkt. 15c. Plant from February to May.

SCHATUS or Musk Plant—Annual—Fragrant plant with small yellow blossoms spotted lightly with brown. Pkt. 15c. Plant from February to May. MOSCHATUS or Musk Plant-

MINA LOBATA (H.H.A.)

Tube-shaped flowers, produced in the greatest profusion. In color they are particularly attractive, the buds being first of a bright red, but changing through orange-yellow to creamy-white, when fully expanded. The foliage is very handsome, dense and luxuriant. Of vigorous growth. Attains height of 12 feet. Pkt. 10c; 1/4 oz. 75c. Plant from February to May.

Pansies Lift Up Happy, Smiling Faces

PANSIES (H.A.) Choice Strains and Mixtures

(Plants, Page 57)

GIANT RUFFLED PANSIES—A remarkable strain of Pansies of unusually large size, with gorgeous ruffled petals like fluted velvet. Flowers are borne on strong stems well above the foliage and include new tints and blendings. Chas. C. Navlet Co.'s Mixture-Pkt. 50c.

MAMMOTH FLOWERED PANSIES in separate colors: Mammoth Flowered Light Blue—Mammoth Heliotrope—Mammoth Flowered Dark Blue—Mammoth Flowered White—15c each pkt., or 1 of each (4 in all) for 50c.

New Pansies (H.A.)

ROGGLI'S GIANTS—Re-selected strain, excels all other Swiss strains in rare combinations of deep, rich colors and fine substance. Our own importation. Mixed colors, per pkt. 75c.

SWISS ALPENGLOW—Wonderful bright garnet-red shades of enormous size. Very striking and attractive. Per pkt. 50c.

SWISS ULLSWATER (Thuner Sea Blue)—Giant flowers of solid blue with blue-black center. Largest and most magnificent of all blue pansies. Per pkt. 50c.

JUMBO—This new Giant surpasses any Pansy we have ever seen in size of blooms. Average 3½ inches across. Many colors; blooms held on long stems. Per pkt. \$1.00.

See Page 5, 6, 7 for Magnificent New Varieties

Pansy Mixtures

MASTERPIECE (Giant)—A giant strain of the five-spotted class, with enormous flowers, perfectly round. Unique colors. Mixed colors-Pkt. 25c.

CHAS. C. NAVLET CO.'S INCOMPARABLE MIXTURE—Made up with Masterpiece and Trimadeau varieties blended. Mixed col-

Navlet's Choice Pansy Mixtures

NAVLET'S FAVORITE MIXTURE—We blend this mixture ourselves.

Assuring you an even distribution of the richest pansy flowers are large and velvety with beautifully ruffled Pkt. \$1.00, postpaid.

NAVLET'S PRIVATE STOCK MASTADON MIXED—Great jewels of flowers in magnificent red and gold colorings. Very velvety and of fine size. Pkt. 75c, postpaid.

VIOLAS (See page 40)

NEMESIA (H.A.)

(Plants, Page 56)
Large flowers varying in color from creamy white to deep orange and carmine; fine for bedding; 18 inches. Mixed colors, 15c pkt., 1/8 oz. 75c. COMPACTA (Blue Gem)—Clear Forget-Me-Not blue flowers of

the most pleasing color in fine, compact heads. Height 1 foot. This is a bright blue flower. Pkt. 20c; % oz. \$1.00.

NEMOPHILIA (Baby Blue Eyes) (H.A.)

California wild flower having small cup-shaped blossoms in white and lovely shades of blue. Grows about 6 inches high. Insignis Blue. Large pkt. 10c; oz. 30c; ¼ lb. \$1.00. Plant from September to May.

NICOTIANA (Flowering Tobacco)(H.H.A.)

Sow Seed January to April

AFFINIS HYBRIDS—New large flowering variety with various bright colored blossoms. Pkt. 10c; ¼ 0z. 25c. SANDERAE—Rosy carmine blooms. Pkt. 10c.

NIGELLA (Love in a Mist) (H.A.)
Showy in foliage, flowers and seed pods. The singular appearing flowers are surrounded and partially hidden by a delicate wreath of needle-like fibers. Assorted Varieties—Pkt. 10c; oz. 30c. Plant from February to May.

OENOTHERA (Evening Primrose) (H.P.)

A hardy variety growing wild in California. The flowers are yellow and 2 to 4 inches in diameter; 3 feet tall; succeeds best in a sunny location. Pkt. 10c. Sow seed August to November, February to April.

ANNUAL—An attractive dwarf variety, producing numerous bright rose colored flowers. Height 6 inches. Sow seed January to April. Pkt. 15c.

PAMPAS GRASS

ERIANTHUS BAVENNA—Perennial—The exquisite blooms resemble the Pampas. Flowers the first season if sown early. Large pkt. 10c. Plant from February to May.

PASSION FLOWER (Passiflora) (H.H.P.)

A hardy perennial climber, shedding its leaves in Winter.

Grows luxuriantly either from cuttings or seed. A very satisfactory climber for immense growth, as it will cover a porch or small cottage in one Summer. Pink-Pkt. 10c. Blue—Pkt. 10c.

White—Pkt. 10c. Mixed colors—Pkt. 10c. Plant from February to

PENTSTEMON (H.P.)

(Plants, Page 61)
Produces freely spikes 2 feet high; flowers first season from seed. Blossoms freely with flowers of bright colors, including pink, blue, lavender, rose, etc. Flowers somewhat like the Foxglove. Beautiful and very satisfactory. Plant from August to March. Mixed Colors—Pkt. 10c; ½ oz. 40c.
Petunias and Phlox on following pages.

PHYSALIS FRANCHETI (T.A.)

(Chinese Lantern Plant)
Has bright yellow or scarlet seed pods. The fruit inside the pod is sometimes made into preserves. Sow seed February to April. Pkt. 10c.

PHYSOSTEGIA (H.P.)

Very pretty. Forms dense bush 2 feet high. Blooms very freely through the Summer on leafless spikes. The flowers are tubular. Good for cutting. Sow seed August to November, February to

APIII. VIRGINICA—Lilac-pink. 15c per pkt. VIRGINICA ALBA—Large white. 15c per pkt.

PHLOX (H.A.)

(Plants, Page 56-61)

The Dazzling Flame Flower—With Phlox a show of brilliant flowers can be had from June until November, as they are perennial bloomers Perfectly hardy. Plant February to May, or August to November.

August to November.

FIRE BALL—Flaming scarlet flowers. Very, very handsome.

Flowers are large and heads massive. Pkt, 10c.

SNOWBALL—Pure white flowers. Perfectly hardy and when once established will bloom year after year with little or no attention. Pbt 10c.

estadished will bloom year after year with little or no attention. Pkt. 10c.

DRUMMONDI—Cuspidata—Of dwarf habit. The flowers have a regular star-like form, with broad white margins. Pkt. 10c.

PERENNIAL—Fine for a permanent flower bed. Some of the flowers range from pure white to crimson or rose, while others are striped, mottled or blotched. Pkt. 15c.

A Page of Colorful Garden Favorites

SINGLE AND DOUBLE PETUNIAS (T.P.)

Plant Petunias in the open ground from February to May

RUFFLED GIANTS OF CALIFORNIA—This strain is of incomparable size, luxuriance and beauty. Nearly all the flowers are ruffled or fringed, and measure from 4 to 5 inches across. The great variety of colors, blotchings, stripings and veinings make fantastic and beautiful combinations—some with deep throats of yellow, white, black, green or maroon, running off into intricate veins. Mixed, large pkt. 25c.

GIANT DOUBLE—Our new fancy flowering strain. This is unquestionably the finest and most valuable strain of Petunias in existence. The colors range from pure white through the delicate shades of rose to deep pink. Our mixture is made with care, so that a fine collection of distinct varieties, double and fringed, can be raised from a single packet. Sure to satisfy. Mixed pkt. 50c.

SUPERFINE MIXED PETUNIAS—Magnificent varieties for bedding. Flowers of large size and in all colors known to Petunias. Large pkt. 15c.

Two Gorgeous Varieties

DWARF CALIFORNIA GIANTS—Low-growing plants that in blossom time are a mass of velvety Petunias of extraordinary size, with beautifully crinkled edges and open throats gracefully veined. Pkt. 25c, postpaid. CARNATION FLOWERED—These are mostly very full and double, looking much like carnations, but in the beautiful Petunia colors, ranging from magenta to purple. Very floriferous. Pkt. 25c, postpaid.

BEDDING PETUNIAS (Small Flowered)

ROSY MORN—Bears a great number of flowers which are a bright rosy pink with white flowers. The plants are small and compact and flower most freely. Pkt. 10c; ½ oz. 50c.

VIOLACEA—Low compact growth. Flowers of a deep violet color. Pkt. 10c; ½ oz. 50c.

1/8 oz. 50c.

PRIMROSE

(Plants, Page 61)

GARDEN PRIMROSE (Polyanthus)—Showy, early Spring, free-flowering plants. Exceptionally fine for borders. Single Flowering—Assorted colors—Pkt. 15c. Plant from August to November, or from February to April.

CHINESE PRIMROSE (Primula Chinensis)—One of the finest Spring blooming pot plants. Easy to grow, pretty in leaf, handsome in flower, and continually in bloom for months at a time. Mixed-Pkt. 35c.

OBCONICA GRANDIFLORA MIXED—Very free-flowering. Easy culture in the greenhouse, also do very well in the open garden for borders during the Summer. Sow in well-drained soil during February to April; blooms same year. Pkt. 15c.

MALACOIDES—A very early and profuse bloomer. Flowers small and of a light lilac color. Seed sown in January will bloom in May. If sown in August a fine display can be had through the Winter. Pkt. 15c.

PYRETHRUM (Feverfew) (H.P.)

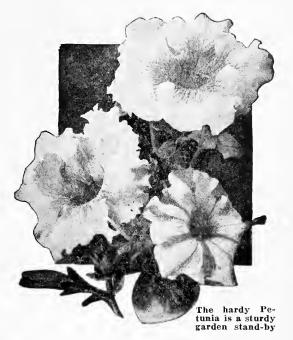

Fine border plants that are always in flower. They bloom quickly from seed and are extra good for cutting. They also make fine plants for Winter blooming in pots. Sow seed August to November, February to April.

AUREUM (Golden Feather)—A beautiful gold-leafed bedding variety. Used largely for ribboning. Pkt. 10c.

ROSEUM—Large flowering single mixed, hardy perennial. Large Daisy or Cosmos-like flowers, ranging in color from pink to deep red, with bright yellow centers; blooms in may and June and again in the Fall and is a very graceful and long-lasting cut flower; grows 2 feet. Pkt. 15c.

The Oriental Poppy is like a scarlet flame.

POPPIES (Annuals)

Plant from February to May or August to October

CALIFORNIA POPPY (Eschscholtzia)—State flower of California. One of the hardiest and most easily grown of our annuals. Silver foliage finely cut and handsome. Deep rich orange flowers exceedingly showy, large and freely produced. Large pkt. 10c; oz. 25c; ¼ lb. 75c; I lb. \$2.50.

DOUBLE CARNATION—One of the most brilliant. Beautifully fringed flowers. Sure to grow and make a gorgeous blaze of color. Large mixed pkt. 10c; oz. 25c.

DOUBLE POPPIES MIXED—Poppies grow so rapidly and flower so quickly that they may be planted anywhere for a showy mass or for cutting. Large packet of Poppy Seed, mixed, at 10c; oz. 39c.

PRICKLY POPPY (Argemone)—Showy, free-flowering. Prickly leaves and large, Poppy-like flowers of satin texture. Choice Mixed Colors—Large pkt. 10c; oz. 30c.

SHIRLEY—Single—Bright and showy blossoms in an endless variety of colors; white, pink, salmon, rosy carmine, crimson, etc. Exquisite Mixed pkt. 10c; oz. 30c.

elasting FLANDERS POPPY—Single—The famous poppy of Flanders fields. Red blood color. Pkt. 10c; ½ oz. 25c.

IERICAN LEGION—New—Brilliant orange scarlet with yellow anthers. Flowers three times the size of ordinary Shirley. Grow about 2 to 3 feet high. Plant where they are to flower. Excellent for massing and bedding. Pkt. 10c; 1/4 oz. 25c.

DOUBLE SHIRLEY—Eldorado—A new and lovely species in a variety of won-derful colors. Each flower has many petals giving the double appearance. Sure to please you. Pkt. 10c; ¼ oz. 25c.

POPPIES (Perennials)

ICELAND—Perennial—A graceful delicate variety with flowers that range from sulphur-yellow through different shades of yellow to chamois and salmonrose. These Poppies bloom the first season from Spring-sown seed. The fragrant, elegant, crushed satin-like flowers are produced in never-ceasing succession from the beginning of June to October. Mixed colors—Large pkt.

ORIENTAL—Perennial—Enormous flowers of flashing scarlet with a black blotch on each petal. Very showy. Hardy perennial. Large pkt. 10c; 1/4 oz.

PORTULACA (H.A.)

The Portulaca will stand more abuse than almost any other flower. Fine for bordering walks, rockwork and bedding. Can be transplanted even in full bloom. Single Flowering—Mixed—Pkt. 10c; 1/4 oz. 25c. Double Flowering—Mixed—Pkt. 10c; 1/4 oz. 50c. Plant from February to June.

Wealth of Beauty in These Little Brown Seeds

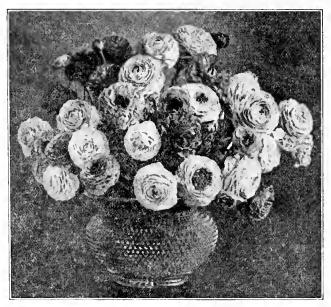

RANUNCULUS (H.P.)

These late Spring-blooming plants grow about 9 inches high and should be planted in a cool, partly shaded position. The flowers are double and semi-double and come in a very wide range of attractive colors. Sow the seed outdoors from April to June for next Spring's bloom and keep shaded until plants appear. Superb mixture. Pkt. 15c; 1/4 oz. 50c.

REHMANNIA (H.H.P.)

(Plants, Page 62)

Beautiful large, rosy-purple gloxinia-like flowers. Suitable for pot culture or outdoors in a sheltered situation; 3 feet tall. Sow in boxes to transplant from December to March. Pkt.

Ranunculus is always fat and cheery

RHODANTHE (Everlasting Flower) (H.A.)

One of the finest and most beautiful of everlastings; for Winter bouquets the blossoms should be gathered before fully expanded, and if dried in the shade will retain their brilliancy for years. Plant from February to April. Rose and white mixed—Pkt. 10c; 1/4 oz. 30c.

ROMNEYA COULTERI (Calif. Tree Poppy) (H.H.P.)

Also known as Matilija Poppy. Has pure white flowers 4 to 5 inches across, crinkled like crepe paper, with yellow stamens. Seed takes 3 to 9 months to germinate. Sow seed from December to April. Pkt. 10c. seed from

SALVIA

(Plants, Page 57-62)

Tender. Blooming the first season from seed. It stands heat and drought remarkably well, and its colors are very showy and intense. Sow annual seed January to April; Plant August to November, January to March.

AZUREA GRANDIFI.ORA—A hardy perennial variety, producing during August and September spikes of pretty sky-blue flowers in great profusion; 2 to 3 feet. Pkt. 15c.

BONFIRE—(Annual)—One of the finest Salvias ever introduced.
Its erect spikes of brilliant scarlet stand clear above the bright green foliage and completely cover the plant. Large pkt. 10c; ½ oz. 60c.

ARNACEA—A perennial variety, but best grown as an annual; seed sown in the open ground in May, blooming from July to frost. The fine light blue flowers are borne on long spikes held above the foliage; makes a good blue line; 2 to 3 feet. FARINACEA-Pkt. 10c. the "Scarlet Sage' 'is red; unlike the latter, however, it is not

PATENS (Blue Sage)—(Perennial)—In color this is as blue as useful for bedding, but it is a beautiful plant for the border or greenhouse; 2 feet. Pkt. 25c.

SPLENDENS—(Annual)—Large flowering scarlet. This "flame-colored beauty" is one of the most gorgeous of all plants. Produces great spikes of bloom, which completely conceal the foliage. Pkt. 10c; 1/4 oz. 75c.

SCABIOSA (Morning Bride) (H.P.)

(Plants, Page 57-62)

Scabiosas are also known as Pincushions. Flowers are very large, come in lovely colors, and are unexcelled for cutting. Bloom from June till frost. Sow seed in boxes in the Fall and transplant in Spring, or sow out-of-doors in the Spring.

FOUR IMPROVED VARIETIES

COLUMBARIA—The beautiful Scabiosa with rosy-mauve blooms. Flowers are very large, measuring 2 to 2½ inches across, and foliage is lacy and decorative. Excellent for cutting. Pkt. 50c; ½ oz. 75c, postpaid.

CAUCASICA (Blue Bonnet)—Handsome hardy percanial, lilac-blue, plants grow to 3 feet. Start seed in hotbed from Sep-tember to February. Pkt. 15c.

PEACH BLOSSOM—Flowers are a wonderful shade of peach blossom pink, and are very large and borne on long strong stems. Commended by the Royal Horticultural Society of Great Britain. Pkt. 25c, postpaid.

SHASTA—A pure white Scabiosa of huge size, the flowers measuring 3½ inches across. Very long strong stems. Pkt. 25c, postpaid.

MAMMOTH LARGE FLOWERING DOUBLE

MIXED-All colors mixed, per pkt. 10c; 1/4 oz. 20c; 1 oz. 60c.

SALPIGLOSSIS (H.H.A.)

(The Velvet Flower) (Plants, Page 57)

This half-hardy annual is exceedingly beautiful, and an extra fine and brilliant bedder. Some of the trumpet-shaped flowers have the appearance of being sprinkled with gold dust. Very valuable as a cut flower. Plant from February to May or frome August to October.

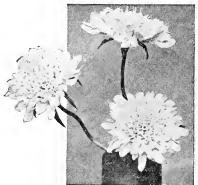

Brown and Gold, Crimson, Crimson and Gold, Blue and Gold, Rose and Gold, Violet, White and Yellow, Yellow—All colors, 10e per pkt.; 3 or more of each at the rate of 3 for 25c.

FINEST MIXED-10c per pkt.; 1/4 oz. 40c. GLOXINIFLORA MIXED—Vein varieties, very fine. Pkt. 25c.

SCARLET RUNNER BEANS

(T. A.)

A great favorite, not only as an ornamental climber, but for the delicious edible beans which succeed the bright scarlet pea-shaped blossoms. Plant from March to August. Large pkt. 10c.

Scabiosa Columbaria

SCHIZANTHUS (H.A.)

Showy large butterfly-like blossoms. Plant from September to May. Mixed pkt.

STATICE (H.P.) (Everlasting)

(Plants, Page 62)

Sow Seed August to November, January to April

SINUATA—Statice is one of the finest everlasting flowers because of its long stems and free-flowering habit. Blooms from mid-summer until late Fall. Flowers can be dried and used in vases in Winter. Pkt., mixed, 10c.

CASPIA—Delicate small flowers for bouquet work. Pale lavender color. Pkt.

SMILAX (T.P.)

Climbing. Largely used for decorating. Much esteemed for its long, delicate sprays of bright green and glossy foliage. Plant from February to May, or August to November. Pkt. 10c; ¼ oz. 25c; 1 oz. 75c.

All the Colors of the Rainbow Here

SNAPDRAGON (Antirrhinum) (H.A.)

(Plants, Page 62)

EXTRA TALL, FLOWERED, GROWING 24 TO 36 INCHES HIGH

One of the most satisfactory flowers for cutting. Blooms during entire Summer and into Fall. Plant in any fairly dry soil December to April.

EIGHT MAGNIFICENT COLORS
ENNIE SCHNEIDER—New; a beautiful Columbia Rose Pink, early bloomer, with fine stem and large flower. Pkt. 25c, postpaid.
All other varieties in this group, pkt. 15c, postpaid. JENNIE SCHNEIDER-New

SNOWFLAKE—Pure white, yellow tube.
Collection of last six colors listed, 85c, postpaid. Mixed colors, pkt. 25c.

ANOTHER GROUP OF EIGHT GORGEOUS COLORS
All Varieties in this group, pkt. 10c; ½ oz. 25c
OTHELLO—Dark maroon, satin sheen.
FIRE KING—Orange-scarlet, white tube.
HARMONY—Terra cotta orange, shaded rose.

QUEEN VICTORIA—Pure white.
ROSE QUEEN—Soft pink. ROSE QUEEN-Soft pink.

Collection of 8 packets, one each of above, 65c FINEST MIXED—All colors. Per pkt. 10c; ¼ oz. 20c.

CHOICE VARIETIES OF STOCKS

(Plants, Page 57)

The Stock or Gilliflower is one of the most popular annuals, either for bedding or pot culture; for brilliancy and diversity of color, fragrance, profusion and duration of bloom it is unsurpassed. Sow the seed in Spring in boxes or hotbed and transplant to 1 foot apart. Save weaker seedlings as they generally produce double flowers.

MAMMOTH NICE STOCKS

A splendid class that can be used for Summer flowering, but for Winter flowering is most valuable. They form much branched plants about 2 feet high and have numerous spikes of large double flowers. For Winter bloom sow from June to August.

Abundance—Silvery rose-lilac.
Beauty of Nice—Flesh pink.
Belle de Naples—Salmon-rose.
Crimson King—Brilliant crimson.

Son.

All colors, per packet 15c. Collections of the above 8 sorts, \$1.00. Mammoth Nice Mixed—Pkt. 10c, ½ oz. 50c.

LARGE-FLOWERING 10-WEEK STOCKS

The leading class for bedding out for Summer blooming. colors: Blood Red, Light Blue, Bright Pink, Flesh Pink, Purple, Pure White, Canary Yellow. All colors, pkt. 10c. Collection of the above 7 sorts, 60c.

Mixed—Double large-flowering. Pkt. 10c; ½ oz. 40c.

WINTER STOCK

BROMPTON STOCKS—Large Winter flowering sorts. A very handsome Stock. Grows about 20 inches high, has numerous spikes of double flowers and is extensively used for bedding as well as for cutting purposes. Crimson King—Very beautiful. Large pkt. 15c. White Lady—Pure white. Large pkt. 15c.

SWEET WILLIAM (H.P.)

(Plants, Page 63)

The plants grow about a foot high, produce very large florets in a great variety of rich colors, including blood-crimson, salmon-pink, white and cerise. Many of the flowers have large white eyes, and all are sweetly scented. Plant from February to May, or from August to October. Single Flowering. Mixed—Large pkt. 10c; ¼ oz. 25c. Double Flowering. Mixed—Large pkt. 10c; ¼ oz. 50c.

THUNBERGIA (H.A.)

(Black-Eyed Susan)

Rapid growing climber, a pretty vine for trellises, fences, rockeries, etc. Sow seed January to April. Mixed colors, pkt. 10c; 1/2 oz. 75c.

TITHONIA (H.H.A.)

Native of Mexico, Central America and Cuba. Cultivated for its orange-colored flowers—growing to a height of 8 to 10 feet and of free branching habit. Blooms continuously until cut down by extreme frost. Seed should not be sown until April. When plants are 6 to 8 inches high, plant out. Pkt. 15c.

STRAW FLOWER

Mixed varieties, will supply an abundance of dried flowers for Winter use. Pkt. 10c; 1/4 oz. 25c.

Exceptionally fine strain of Summer Stocks. Growing 24 to 30 in. tall, of exceptional branching habit. Very early bloomer. Splendid for cutting. Colors: Canary Yellow (Golden Ball); Chamois—Ivory, tinted old rose; Fiery Blood-Rcd; Rose—Deep rose pink: Flesh; White, Lavender, Dark Blue. All colors, per packet 10c.

Collection, one each of 8 colors, 65c.
Mixed—Choicest varieties—15c per pkt.; 1/8 oz. 60c.

FOUR LATEST NOVELTIES (Stocks)

ANTIQUE COPPER—Rich Hellebore red, overlaid with copper, the whole giving a very pleasing reddish antique copper effect. The strain is very double, with individual florets two inches in diameter on long stems. Pkt. 30c, postpaid.

BISMARCK—Especially meritorious. These Stocks are giants, growing 24 to 30 in. tall, of branching habit, producing large spikes measuring 12 to 14 in. long, coming into bloom in 10 to 12 weeks. Pkt., mixed colors, 25c, postpaid.

EARLY GIANT IMPERIAL "ELK'S PRIDE"—A new shade, being an intense royal purple, attaining a height of 24 to 30 inches. Very early blooming: the florets are quite large and sweetly scented and very double. Pkt. 25c, postpaid.

GOLDEN ROSE—A rich light rose enhanced by a pleasing golden effect in the center of each individual floret. Very double, large flowers on long stems. A wonderful cut flower. Pkt. 30c, postpaid.

Sweet William has an old fashioned charm:

STOKESIA (H.P.) (Cornflower Aster)

(Plants, Page 63)

CYANEA—Bearing profusion of lavender blossoms like Cornflower. Seed slow to grminate. Sow seed August to No-vember, January to March. Pkt. 10c.

SUNFLOWER (T.A.)

Sow Seed January to April (Helianthus)

CHRYSANTHEMUM FLOWERED — A new variety of an old favorite. The very double bright orange-yellow blossoms resemble large Chrysanthemums. Pkt. 10c; oz. 40c.

ERKEO, or Cut-and-Come-Again—A charming variety of the Miniature Dwarf. The plants form compact bushes about 12 inches high by 14 inches through. Pkt. 10c; ¼ oz. 25c. PERKEO.

STELLA—This fine variety is well branched and bushy. The flowers are of purest golden-yellow with black disks; are borne on long stems. Plant from February to May. Pkt. 10c; ½ oz. 40c.

RED SUNFLOWER—Some are solid red of a deep maroon shade; others are red with petals gold-tipped, and a variety of other pleasing combinations of red and gold. Pkt. 10c; 1/4 oz. 20c;

Seed that Unfold to a Wealth of Color

TRANSVAAL DAISY (P.)

(Plants, Page 62) (Gerbera)

Intense vermilion. Flowers 4 inches across on tall stems $1\frac{1}{2}$ feet high. Do not over-water. Very beautiful. Sow seed February to May. Pkt. 25e.

TRUMPET VINE (P.)

This is one of the most superb Climbing Vines in existence. Plant from February to May. Pkt. 10c.

UMBRELLA PLANT (A.)

(Cyperus Alternifolius)

Excellent for growing in water or damp places. Makes a very ornamental house plant, always presenting a green and attractive appearance. Plant from February to May, or from August to November. Pkt. 10c.

VALERIAN (H.P.)

(Plants, Page 63)

Showy plants for mixed borders or shrubberies, bearing large corymbs of bright flowers; bears shade and moisture well. Grows $2\frac{1}{2}$ feet. Flowers bright red and white. Sow seed August to November, January to April. Crimson, Rose or Mixed—Pkt. 10c.

VERBENAS (H.H.P.)

(Plants, Page 63)

For constant and profuse flowering and for brilliancy and beauty of colors, the Verbena is unsurpassed. Sow seed December to March.

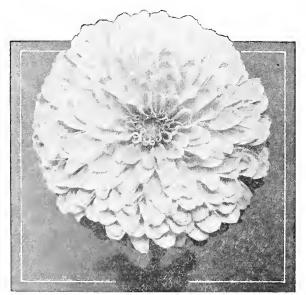

MAMMOTH FLOWERED-Various colored flowers. Mixed, large pkt. 10c; ¼ oz. 50c.

MAMMOTH PURPLE, PINK, WHITE, or RED—Each color in a separate packet. Pkt. 10c; ¼ oz. 60c.

ETNA—The trusses are very large, color intense red with small creamy yellow eyes. The individual florets are over one inch in diameter. This is the largest truss and florets we have known. If you are an admirer of the Verbena, do not fail to include a packet of Etna with your order. We are positive you will be well pleased. Pkt. 25c, postpaid.

GOLDEN QUEEN—The deep yellow flowers are of medium size and borne on vigorous plants of an everbearing nature. One of the earliest of flowers and develops throughout the growing season, making a valuable plant for bedding purposes. 25c pkt., postpaid.

GRANDIFLORA ROBUSTA—Immense trusses, the individual florets measuring one inch in diameter. Per pkt., mixed colors, 25c each.

Dahlia Flowered Zinnia

TRIGRIDIA PAVONIA (H.P.)

(Mexican Shell Flower)

(Novelty)—Lily-like blooms of unusual beauty, thriving in full sun. Colors run from salmon-pink, the throat usually shading to canary or orange-yellow tiger spotted with blotches of rich brown. Grows 2 feet high. Blooms throughout the Summer. Sow seed August to November, January to April. Bulbs 20c each; \$2.00 per doz. Seed, 25c per pkt.

VIOLAS (Viola Cornuta) (H.A.)

Sow seed January to April

JERSEY GEM—The flowers a deep violet blue with occasional slight variations in tint, and may be relied on to come about 70% true from seed. Wonderful power of resisting drought, the plants continuing to produce long after other varieties are withered. Long blooming season and fine large blooms. Imported seed, 35c pkt., postpaid.

APRICOT—Popularized by Sutton. A beautiful rich apricot shade, tinged with orange towards the center. Per pkt. 25c.

APRICOT QUEEN—Color intense pretty apricot, shaded yellow with golden brown center and deep eye. Very striking. Per pkt. 25c.

VIRGINIA CREEPER

An ornamental climber. The leaves turn to crimson and yellow in the Autumn. Plant from February to May. Pkt. 10c; oz. 50c.

VIRGINIAN STOCKS (Malcolmia) (H.A.)

MALCOLMIA MARITIMA—Better known as Virginia Stocks. Native of the south of Europe. White or purple flowers deposited in Racemes. Grown from seed in the Spring. 10c per pkt.; oz. 25c.

WALLFLOWER (H.P.)

(Plants, Page 63)

A fine, old-fashioned flower. Will bloom the first year from seed. Grows from 1 to 2 feet high and bears long stems of graceful flowers. Plant early in boxes and transplant. Plant from February to May, or August to October. Double Flowering—Mixed, large pkt. 15c; ¼ oz. \$1.00. Single Flowering—Mixed, large pkt. 10c; ¼ oz. 25c.

XERANTHEMUM (Everlasting) (H.A.)

Silvery foliage with silky flowers in rose, white, purple. Sow seed January to April, Pkt. 10c; $\frac{1}{4}$ oz. 30c.

DAHLIA FLOWERED ZINNIAS (H.H.A.)

(Plants, Page 57)

Navlet's Gold Medal Giant Dahlia-Flowered Zinnias produce blooms of tremendous size, in the greatest range of gorgeous Zinnia colors. Unmatched for size and beauty, wherever Zinnias are grown. Plants full 3 feet high, bloom all Summer till frost. Sow seed February to April.

EXQUISITE-Light rose with deep rose center.

OLD ROSE—Truly old rose, very charming.

GOLDEN-STATE—Rich orange-yellow, turning a true orange when in full bloom.

CRIMSON MONARCH—Best of the reds. Often 8-inch diameter. METEOR—Very dark red, reaching a large size.

LEMON BEAUTY—Golden yellow on brown, light pastel shade.

ORIOLE-Orange and gold bi-color.

DREAM-Fine, deep lavender, turning to purple.

POLAR BEAR-Pure white, the best yellow yet developed.

BUTTERCUP—Deep creamy yellow.

All varieties listed above: Per pkt. 15c; 1/4 oz. 75c; 10 packets (one each of above) 81.25.

DAHLIA FLOWERED MIXED-Mixed colors, pkt. 15c, postpaid; 1/4 oz. 60c.

PICOTEE TYPE—Petals outlined in contrasting color that harmonize with body of flower. All colors mixed, pkt. 15c; 1/4 oz. 50c.

LILLIPUT TYPE-Small, round double flowers. Mixed colors, pkt. 10c; 1/4 oz. 50c.

Spencer Sweet Peas

Flash their myriad rainbow colorings to make your Garden gay and fragrant

The Spencers have the delicate grace of Orchids, with the same fragile perfection of form.

Every garden has a place for Sweet Peas, especially Spencers, with their strong, slender stems, their gracefully frilled blossoms, and their glorious colorings. Plant them along the fence, against the garden gate, let them climb over trellised screens—anywhere and everywhere, Sweet Peas are a spot of beauty. And the Navlet strains are exceptionally fine.

PLANTING INSTRUCTIONS

Early Flowering: plant in September and October

Regular Varieties: plant October, November and December

Deep digging and thorough mixing in liberal amount of Grozit, Bonemeal and Calcium Sulphate essential. Sow seed thinly about 1 inch deep, firm soil well. Thin plants 6 to 8 inches apart. Provide supports when 6 inches high. Keep soil moist and surface loose by stirring with rake or hoe. Liquid manure applied weekly and dally picking necessary for best blooms.

Price of all varieties listed on this page: Pkt. 10c, Ounce 35c, 1/4 lb. \$1.00

Early Flowering Spencers

Plant in September, and they'll bloom by Christmas

HERE ARE 4 CHOICE SPECIES OF EARLY FLOWERING SPENCERS

Per pkt. 25c postpaid

- EARLY APOLLO-(Long Stem)-The color of this variety is a soft salmon-cerise, a charming and appealing shade blending perfectly with most pink and lavender shades. The flowers are unusually large, nicely waved, splendidly placed and the stems are very long.
- EARLY FANDANGO-(Duplex)-Those who grow the early flowering type of Sweet Peas will greatly appreciate this bright rose addition to the early duplex class. The flowers are extremely large, magnificently frilled and bold yet sustain the daintiness associated with Sweet Peas.
- EARLY PAL—(Long Stem)—A lively scintillant pleasing rich rose crimson Early Sweet Pea. The stems are long and strong; the flowers are of excellent form, large and bold. The vines are vigorous in growth and very free flowering.
- EARLY VOGUE-The flowers of this variety are large, beautifully waved and well placed on fine stems. The standard is lavender, flushed rosy lavender with wings of clear lilac lavender. A special feature of Early Vogue is its refreshing rich, old-time Sweet Pea perfume. When cut and put in water, Early Vogue retains its lovely fresh color.

DUCHESS OF YORK—(H. T.)—Flowers large, very full, bud deep golden yellow, opening to a shrimp pink center and gold base.

E. G. HILL—New)—Great massive blooms of deep maroon, velvety on inside and glistening outside; very perfumed with old rose fragrance.

FEU JOSEPH LOOYMANS—(H. T.)—Stiff erect plants with splendid glossy foliage, and extremely long pointed buds of glowing apricot and old gold, opening to large, richly tinted yellow blooms of splendid form and fragrance. One of the finest new Roses.

MAUD CUMMINGS—(H. T.)—A vigorous bushy grower. The buds are long and tapering. Flowers are a rich peach-pink shaded coral. A very heavy bloomer.

PRESIDENT HERBERT HOOVER—(H. T.)—It is remarkable for its vigorous growth, healthy, hybrid tea foliage, rigid stems, long pointed buds, and productiveness. Color—A blend of orange and pink, varying from coppery-red in the bud, to glowing orange-yellow at the base of the petals, suffused with vivid rose-pink. At all stages is very attractive. Was awarded the American Rose Society's Gold Medal; Massachusetts Horticultural Society Silver Medal; Award of Merit, Royal Horticultural Society.

SOUVENIR DE MME. BOULLET—(H. T.)—A full deep yellow rose, almost orange in the center of the bud. Buds are long and open into a cup-shaped flower. A very beautiful rose.

TALISMAN—(H. T.)—The most astounding novelty in Roses produced in many a year. Its brilliant orange-red buds open to a large, fragrant, high pointed bloom of glowing golden yellow stained with copper-red and orange-rose on the inside of the petal. It is the most magnificently colored flower we have ever seen and arouses astonishment and admiration everywhere. The plants have proved vigorous and healthy outdoors and have withstood severe Winters unprotected. It is especially good in Spring and late Autumn.

VILLE DE PARIS—(H. T.)—A clear sunflower yellow rose which won a Gold Medal at Paris. It does not fade. Very long stems, almost thornless. The plant is a very vigorous $e^{-\epsilon}$ grower, with glossy reddish green foliage.

- CUBA—(H. T.)—A very strong growing plant with excellent foliage. Cuba produces enormous semi-double blooms of blazing red-orange.
- DAME EDITH HELEN—(H. T.)—One of the largest and most perfectly shaped bright pink Roses known. Blooms abundantly, with long, strong stems. One of the most perfumed of all pink Roses. Has attracted admiration everywhere.
- ETOILE DE HOLLAND—(H. T.)—Very floriferous and vigorous. Flowers are gigantic in size and of a rich velvety crimson which are produced with great freedom throughout the season. Unquestionably one of the best reds of the Hybrid Tea group.
- IMPERIAL POTENTATE—(H.T.)—One of the finest new brilliant pink Roses. Very vigorous grower of free-flowering habit.
- LADY FLORENCE STRONGE—A distinct and novel color; a reddish prawn to violet old rose shading to yellow at the base and pink towards the edge, the inner surface of the petals heavily veined and flushed scarlet. The flowers are large.
- LADY MARGARET STEWART—(H. T.)—Plants are strong and erect, with immense copper orange buds, opening to bright golden yellow, flowers are of wonderful shape and luscious color. This rose will become very popular.
- MARGARET McGREDY—(H. T.)—Much was xpected of Margaret McGredy—she won everywhere with flying colors. Brilliant red petals on hinges of deep gold. Buds upright. Seldom out of bloom.
- MRS. HENRY MORSE—(H. T.)—Flowers bright pink with silvery shadings, incessantly produced on low branching bushes. Buds very attractive. Is rapidly becoming very popular.
- MRS HERBERT NASH—(H. T.)—Beautiful dark red flowers borne on strong stems, the flowers resembling the Hoosier Beauty in color. Good foliage. Growth of bush strong.
- MRS. LOVELL SWISHER—(H. T.)—One of the latest varieties. Immense in size, flowers very heavy and of a pale flesh-pink, fine grower, with strong erect stems.
- THERESA LANDBAD—Strong robust growing bush. The flowers are a striking salmon-pink. Very charming when in bud.

- BETTY—(H. T.)—Copper Rose, shaded to golden yellow at the base. Buds long and pointed. Flowers large, partially double; deliciously perfumed.
- GOLDEN EMBLEM—(H. & T.)—A most beautiful clear yellow, occasionally flaked with coppery orange on the outer petals, wonderfully well-shaped buds and flowers on long stems, with rich glossy green foliage.
- JOHN RUSSELL—(H. T.)—A vigorous grower with large flowers, borne singly on top of long stems. A rich crimson-scarlet, shaded with black, and one of the most perfectly formed flowers we have ever seen at all stages of the bloom. It blooms continuously from June until frost.
- MME. ABEL CHATENAY—(H. T.)—Light pink shaded salmon. A very heavy bloomer. Habit of growth of bush is spreading, buds medium in size.
- MRS. HENRY BOWLES—(H. T.)—Magnificent flowers are bright pink with silvery shadings. Bushes low branching habit. Very large and artistic buds. Rapidly becoming very popular.
- MRS. JOHN LAING—(H. P.)—Plants grow very erect, healthy, produce exquisite cup-shaped, soft pink, fragrant flowers throughout the season.
- QUEEN ALEXANDRIA—(H. T.)—A remarkable flower. Petals vermilion, reverse side old gold. Base of flower golden yellow. Glossy foliage. Low growing plant.
- REV. F. PAGE ROBERTS—(H. T.)—Marvelously colored flowers of golden yellow stained with copper and reddish buff on the outside. One of the most popular roses, and planted in great quantities each year.
- SOUV. DE CLAUDIUS PERNET—(Pern.)—Large, elongated and beautifully formed buds. Clear brilliant yellow, shaded warmer in the center.
- WINNIE DAVIS—(H. T.)—Outside of petals carmine rose; reverse side shell-pink with prominent veins. A grand freegrowing variety with long stems. Foliage larger than average and healthy growth.

Madame Edouard Herriott

- AARON WARD—(H. T.)—Long buds on erect stems; flowers large and full; color coppery-orange, golden yellow when partly de-veloped, pinkish fawn of lovely shade when fully opened.
- AMERICAN BEAUTY—(H. P.)—A magnificent perpetual bloomer. Largest, sweetest and most popular of all hardy Roses. Color a deep, brilliant rosy carmine, exquisitely shaded.
- AUSTRIAN COPPER—(Hybrid Brier)—Bright coppery red, reverse of petals golden-yellow. Very attractive. Good bloomer.
- BETTY UPRICHARD-(H. T.)-Buds are cop pery red and as the flowers open the outside of the petals are orange carmine, inside a delicate salmon pink, flowers semi-double and very fragrant. The colors are sufficient reason why this Rose should be in every corden.
- CECILE BRUNNER—(D. P.)—The Baby Rose, the smallest of all Roses. The compact, fairy-like, rose-pink flowers are very double and very fragrant.
- HATEAU DE CLOS VOUGERT—(H. T.)— Beautiful rich brilliant scarlet shaded fiery red, changing to dark velvety crimson. Per-petual bloomer. Very double and intensely fragrant.
- COLUMBIA—(H.T.)—The open flower measures six inches across. Color true pink, deepen-ing as it opens to glowing pink. The shades all become more intense until full maturity of the open flower is reached, and its color is enduring.
- DIADEM-(H. T.)-A large, fragrant double flower of copper orange, tinted salmon and flame pink. Foliage good. A good variety for cutting.
- EDWARD MAWLEY—(H. T.)—One of the best dark velvety crimson Roses. Flowers large and double.
- E L D O R A D O—(H. P.)—Splendid, vigorous plants, large, solid, golden-yellow buds, opening to very double handsome, bright yellow blooms. One of the most perfumed of the yellow Roses.
- GENERAL JACQUEMINOT-(H. P.)-ENERAL JACQUEMINOT—(H. P.)—It is of vigorous growth and an abundant bloomer—literally a mass of bloom when at its best. The flower are of grand size—rare beauty—and an intense crimson in color. One of the most satisfactory Roses to grow.
- GENERAL McARTHUR—(H. T.)—Strong, vig-orous, healthy growth, branching freely, it produces its wonderful crimson scarlet blooms profusely from May until October. Every shoot carries a large, double, well-formed flower of exquisite fragrance.

- O. DICKSON—(H. P.)—Vigorous grow with magnificent blackish crimson blooms.
- LDEN OPHELIA—(H. T.)—Medium size flower of perfect form. Golden yellow in the center, paling slightly towards the outer petels.
- GORGEOUS—(H. T.)—Very large, full and exquisitely formed, produced in endless profusion. Deep orange flushed copper-yellow, and heavily veined with reddish copper.
- HADLEY—(H. T.)—This matchless Rose is a strong, rapid grower and a most profuse bloomer. The deep velvety-crimson flowers are very double and very fragrant. Begins to flower early in the Spring.
- HENRY V. MACHIN—(H. T.)—Intense rich scarlet-crimson. Gorgeous large size flowers, carried on rigid steady stems, with ideal foliage. A vigorous, strong grower.
- HOOSIER BEAUTY—(H. T.)—A dark, rich velvety crimson. Flowers double and pointed. Long stems; heavy bloomer; sweetly scented.
- INDEPENDENCE DAY—(H. T.)—Buds are sunflower yellow overlaid with orange apri-cot, with colors blending as the bud develops into full bloom. Buds are a graceful oval shape and the flowers are well formed. Glossy, dark green foliage.
- IRISH ELEGANCE—(H. T.)—A single Rose of apricot color, shading to bronzy orange and pink. Buds particularly handsome and of little deeper shade than the open flower. Always in bloom.
- IRISH FIREFLAME-(H. T.)-A very large, single flower of maddery orange, passing to rich satiny, old gold veined with crimson.
- LIET—(Hybrid Brier)—Pretty combination of scarlet, gold and salmon. Blooms best in early Spring and late Autumn. The color-ings make this variety a very attractive
- KAISERIN AUGUSTA VICTORIA-(H. T.)-Pure white, very often tinted with cream at the centers. Strong, healthy grower. Well formed buds with splendid foliage.
- K. OF K.—(H. T.) Strong, bushy plants with semi-single, scarlet star-shaped flowers in great profusion. An excellent bedder.
- LADY HILLINGDON-(T.)-A beautiful Tea Rose which has created quite a sensation. Bright saffron-yellow with coppery-orange shades. One of the most attractive in its color. Buds long and pointed.
- LA FRANCE-(H. T.)-Satiny silver-rose. Very well known, one of the old favorites. Very popular for its fragrance.

Two Pages of Exquisite Roses

Choice Blooms of the Loveliest and the Most Satisfying of all the garden flowers

If you want a real thrill, visit the Navlet Rose Fields in blooming season. You'll find acres upon acres of wonderful Roses—masses of glorious color, each rose perfect of its kind, and yet thoroughly hardy despite its fragile grace. The Navlet Rose Fields are at our Highway Nursery, on the San Francisco Highway between Santa Clara and Sunnyvale. The first blooming season is about May 1st.

Roses on This and the Opposite Page Are Offered for the 1932 Season at

(All Roses Delivered Free)

- LOS ANGELES—(H. T.)—A wonderful Rose. The growth is very vigorous and produces a continuous succession of long-stemmed flowers of a luminous flame-pink, toned with coral and shaded with translucent gold at the base of the petals.
- LOUISE CATHERINE BRESLAU—(H. P.)— Low spreading plants with brilliant orangepink, double flowers. Very attractive.
- MADAME CAROLINE TESTOUT—(H. T.)—A grand Tea Rose. Color, a brilliant, shimmery Rose, deepening at the center to a clear cherry red. The petals are exquisitely edged. Both buds and flowers are extra large and beautiful.
- MADAME EDOUARD HERRIOTT—(H. T.)—Or Daily Mail Rose—The new French Rose which won the \$5,000 offered by the London Daily Mail. Long, pointed buds, of a deep coral red shaded with yellow at the base. Opens into a flower of a beautiful shade of rosy scarlet tinged and flushed with yellow. The wonderful coloring is a revelation to all who first see it.
- MISS LOLITA ARMOUR—(H. P.)—Double, globular blooms of orange-pink shading to coppery-yellow at the base. Very fragrant.
- MME. BUTTERFLY—(H. T.)—A new and splendid sport of Ophelia with all its good characteristics. Flowers are a brilliant pink suffused apricot and gold.
- MRS. CHAS. RUSSELL—(H. T.)—A brilliant rosy carmine with a beautiful scarlet center. The blooms are very large and wonderfully formed, the petals being of unusual substance. The stems are long and slender, but very stiff and strong.
- MRS. S. K. RINDGE—(H. P.)—Buds are well shaped and the flowers when open are semi-double. Flowers open a soft yellow, turning to a soft pink very rapidly.
- NILES COCHET—(H. T.)—Cherry red on outer petals; shading very much lighter to center.
- OPHELIA—(H. T.)—Salmon flesh shaded Rose with chamois center. The buds and flowers are beautifully formed and colored, enhanced by a rich velning on the petals. Profuse bloomer.
- PADRE—(H. T.)—There is a charm of coloring in this Rose, being a brilliant coppery-red flushed with yellow at the base. A strong upright grower and exceedingly free flowering. One of the most novel bedding Roses of recent introduction.
- PAPA GONTIER—(T.)—A grand Tea Rose. Dark, carmine-crimson flowers—very full and sweet. Robust grower. Free, constant bloomer. A charming Rose—one of the handsomest and best for open ground.

- PAUL NEYRON—(H. P.)—Color, a beautiful pink that no other Rose excels. Immense and superbly formed flowers—very double and of great depth and substance. Hardy, perpetually in bloom, very showy and somewhat fragrant.
- PINK MAMAN COCHET—(T.)—The superb flowers open perfectly double, are extra large and of splendid substance. Hardy in every section of the country; clear rich pink, changing to silvery rose.
- PREMIER—(H. T.)—Rose-pink. Very fragrant. Flowers are borne on stiff, thornless stems; very strong grower and free bloomer.
- RED RADIANCE—(H. T.)—Clear cerise-red, The flowers are well formed and full. Very large. An exceptional garden variety.
- ROSE MARIE—(H. T.)—A grand Rose of very high type. Very rich pink (like watermelon), that will be a favorite for a long time.
- SHOT SILK—(H. T.)—Orange cerise suffused with gold. Flowers of medium size. Free producer, very fragrant. A very charming Rose with a color that is hard to describe.
- SOUV. DE GEORGES PERNET—(H. T.)—Stout, branching plants with large, brick-red buds opening to pink flowers of gigantic size. A splendid bedding Rose.
- SUNSTAR—(H. T.)—Lemon yellow, petals edged and velned with Rose and vermilion. Semi-double flowers. Buds long, borne on long stiff stems.
- ULRICH BRUNNER—(H. P.)—Rich, glowing. Large, highly perfumed flowers globular shaped. The blooms are produced on long stems—two or three feet in length. This is one of the most prolific varieties known to the Rose world.
- WHITE AMERICAN BEAUTY—(H. P.)—This Rose is the largest and best white Rose grown. It is an extra free grower and branches freely with the vigor and hardiness of an oak.
- WHITE MAMAN COCHET—(T.)—Identical with its parent, Maman Cochet, except in color, which is snowy-white, with sometimes a faint tinge suggesting pale blush. Magnificent form of buds and flowers. Vigorous and hardy everywhere.
- WM. F. DREER—(Hybrid Tea)—Soft, silvery shell pink, base of petals golden yellow, beautiful in all stages, foliage robust and unique, growth vigorous and free flowering; a good garden Rose.

Climbing Roses Are the Gypsies of the Tribe

Wandering over fences and walls in a gorgeous riot of bloom, the Climbing Rose is a glorious vagabond. The 25 varieties listed on this page are all our own stock—two years old, field grown, well budded and strongly pranched. They will bloom the first season.

THE STAECHELIN

This most unique climber was discovered in Spain, and has recently been awarded the John Cook Medal for the most outstanding climber. Hardy, vigorous grower, with crimson buds opening to large, perfumed pale pink flowers.

BEAUTY OF GLAZENWOOD (San Rafael Banksia)—A charming combination of copper, crimson and salmon yellow. Fascinatingly beautiful. A grand climber.

BELLE OF PORTUGAL—(H. G.)—Originated at the Botanical Gardens at Lisbon, Portugal. Foliage glossy, buds are truly remarkable, sometimes attaining a length of four inches, soft salmon-pink and borne usually singly on such long lateral shoots that stems two feet long can often be cut.

CHAS. C. NAVLET CO.'S CLIMBER—This is a sport we found in our Rose Field last year. The flowers are medium size, a light canary yellow in color, with a suggestion of pink on the edge of the petals. Stock is limited.

CLIMBING AMERICAN BEAUTY—A strong, healthy, vigorous grower, frequently making shoots 10 to 12 feet long, blooming freely with good sized flowers. Color a rich rosy crimson, of splendid form and good substance.

CLIMBING CECILE BRUNNER—(Poly.)—Color rosy-pink, rich creamy white ground.

CLIMBING HADLEY—(H. T.)—A true sport of the bush variety, color of flower and foliage same as the Bush Hadley. Beautiful deep velvety crimson, retaining its color all season. Flowers large and full.

CLIMBING HOOSIER BEAUTY—(H. T.)—Like the bush form in all respects, it is a vigorous climber with rich, velvety scarlet blooms.

CLIMBING HUGH DICKSON—(H. P.)—Color, brilliant crimson, shaded scarlet. Flowers are large and fine form, opening well in all weathers. Very sweetly scented.

CLIMBING LOS ANGELES—(H. T.)—Exactly the same rose as the bush Los Angeles is a strong, vigorous climber. The glorious flame pink color and the freedom of bloom are just as marked as in the bush.

CLIMBING MARECHAL NEIL—(T.)—Deep golden-yellow, immense flowers sweetly scented. Conceded to be the best Rose of its color in existence. Particularly attractive when in bud.

CLIMBING MRS. AARON WARD—(H. T.)—Long buds borne on erect stems; flowers very large and full, and the color is coppery-orange in the opening bud; golden-orange when partly developed; pinkish fawn of lovely shade when fully open.

CLIMBING MME. CAROLINE TESTOUT—(H. T.)—A rampant climber. In flower identical with Mme. C. Testout. Beautiful glowing pink. You can't beat it.

CLIMBING MME. EDOUARD HERRIOTT—(H. T.)—A climbing rose with the sensational copper colorings of the bush variety. The flowers are produced in profusion all during the Summer, and are just as bright in color and even better in shape than the bush. The plant is a true climber, with long, vigorous shoots.

CLIMBING OPHELIA—(H. T.)—A little lighter in color than the bush Ophelia, being a pinkish cream, but with the same exquisite form of bud.

CLIMBING PAPA GONTIER—(T.)—After discarding this favorite climber for a time, popular demand has led us to grow it again. It is a long lived and satisfactory climber, with well formed, cherry red blooms.

Paul's Scarlet

CLIMBING PINK MAMAN COCHET—(T.)—Blooms all through the year, producing large, magnificent pink flowers on stems that are as long as those on the bush variety.

CRIMSON RAMBLER—(Poly.)—A grand climber—a peculiar and lovely crimson. The flowers form in magnificent pyramidal clusters, each cluster a perfect bouquet of Roses in itself. The foliage is a bright green, and contrasts finely with the flowers.

PAUL'S SCARLET CLIMBER—(W.)—The flowers of this superb Rose are vivid scarlet, shaded with bright crimson, and are produced in the greatest profusion in large clusters of medium sized semi-double blossoms. This variety surpasses in brilliancy of color any other Climbing Rose and the flowers remain unusually long in good condition.

 $\label{eq:pillar} \textbf{PILLAR OF GOLD--(T.)--} A \ \ \textbf{glorious climbing yellow Rose.}$

RAMONA—The new red single Cherokee—a sport of the famous Pink Cherokee. The color is one unusual in Roses; rich carmine overlaid with a lustrous sheen which is impossible of reproduction with the artist's brush. During the Spring months the plants are literally covered with blooms.

SINGLE CHEROKEE—Large, clear white, single flowers, full of bright yellow stamens in the center. Very odd. Dark rich carmine foliage.

SUNBURST—(H. T.)—The flowers are of a rich orange-yellow with touches of golden and coppery yellow. The beautiful petals lighten toward the tip.

TAUSENDSCHOEN—(Pol.)—Thousand Beauties)—The flowers upon first opening are of the most delicate shade of pink ever seen in a Rose; might be described as a white delicately flushed pink, changing to rosy-carmine. It gets its name from its many flowers and the variations in coloring.

WHITE MAMAN COCHET—(T.)—In form and substance the flowers are identical with the Pure White Maman Cochet—but on account of its vigorous habit, the climbing variety is larger and more beautiful than the bush.

Navlet's 1932 Rose Bargains

Two wonderful special values for those who buy by the dozen

BARGAIN NO. I

Strong, 2-year-old Rose Bushes

Our selection, delivered free

Russell, and Independence Day. All two-year-old bushes, field grown, that will bloom the first season.

For complete details of Bargain No. 2 turn to the Outside Back Cover.

CLASSIFICATION OF ROSES

In the preceding pages, the abbreviations T., H. T., H. P., etc have been used. These refer to the various classifications or Roses, as follows:

- H. T.—(Hybrid Tea)—A class of recent origin, which has become the most important of all. Perpetual blooming, with delicate blending of colors, vigor and great hardiness. Many have tea scent very strongly.
- Pern.—(Pernetiana)—A very recent class, the result of a cross between Persian Yellow and Hybrid Perpetual. A wonderful group with startling color effects.
- D. P.—(Dwarf Polyantha)—Low-growing, the flowers in clusters, blooming all Summer.
- W.—(Wichuriana)—A trailing Rose. Has long pllable shoots which are easily trained. Very hardy and an exceptionally heavy bloomer in the Spring months.
- T.—(Tea)—As a general rule the growth is slender and not very vigorous. Foliage always very glossy. They bloom continuously. Require considerable pruning, good soil, and proper care, for which this variety will well repay you.
- H. P.—(Hybrid Perpetual)—Hardy, very resistant to cold. Growth vigorous and upright, with long, unbranched canes. Stems long; flowers borne erect; foliage rough; fragrance very distinct.
- Cher.—(Cherokee)—Climbers, very glossy evergreen foliage, mainly single flowered. Often used for hedges if trained on wire.
- Pol.—(Polyantha)—Small flowers borne in large clusters. Very rampant growth and bloom only in the Spring.

HINTS TO ROSE GROWERS

- WHEN TO PLANT—December 1st to April 1st is Rose planting season for California, with preference given to early planting.
- WHERE TO PLANT—Roses require an airy, sunny location, sheltered from the wind. However, in the hot inland valleys, it is well to give them shade part of the day.
- HOW TO PLANT—Unpack plants Immediately and soak roots in water for 3 or 4 hours. Prune roots to 5 or 6 inches, cutting off any bruised parts. Leave 3 branches to shape the plant, cutting back to about 8 inches. Plant carefully, so union of bud and root stock will come just below the surface. Fill with surface soil to 4 inches from ground level. Tramp down, and fill this basin with water. Fill in the next day with surface soil. Heavy loam is best, well fertilized, but never with fresh manures.
- PBUNING—Prune between December 15th and March 1st. Prune to 3 main shoots the first winter, cutting these back about one-half. Remove all growth originating below the bud union. In early summer, after first blooming season, prune lightly for fall blooming.
- DISEASE AND INSECTS—For mildew (appears as grayish-white spots, then dark areas that cause shoots and leaves to curl and become stunted) dust with finely ground sulphur every 10 days until disease disappears. For rose aphids (green plant lice that suck the sap, thus stunting growth) dust at once with Navco Nicotine Dust 6N, or spray with Evergreen (see page 82). If mildew is present at the same time, dust with NAVCO NEUTRAL BRAND DUSTING SULPHUR. (This is a combination package containing one of Sulphur and one of Nicotine Dust. They can be mixed, if desired.)

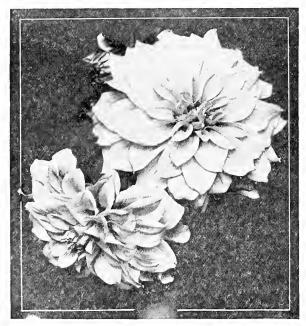

Dahlias Burst Into Late Summer Glory

The Dr. Tevis is a giant Dahlia, with blooms that average 9 to 11 inches across.

THE NEW JANE COWL a decorative dahlia you will love to grow

One of the sensations of the New York show, and justly so. It is an immense glistening bronzy buff, and old gold with just enough twist to the broad petals to make it graceful. Strong stems, free blooming and excellent for cutting and show purposes. \$1.50 each, postpaid.

This is the Jane Cowl, in a glorious bronze-gold coloring.

Dahlias are easy to grow and will generously repay you for the little care they require.

These two pages contain a choice selection of the loveliest varieties; gorgeous Exhibition, stately Cactus, lovely Peony, and charming Pompoms—popular standbys and beautiful new creations—all of them grown in our own proving grounds before being offered for sale. Plant a variety of these beauties and your gorden will be a mass of colors. garden will be a mass of colors.

Special Discount: You may deduct a discount of 10% on orders for 6 tubers, and of 15% on orders for 12 or more.

Planting Instructions

Set tubers out as soon after frost as possible. For mass planting, place them four feet apart; in rows, plant them $2\frac{1}{2}$ to 3 feet apart. Lay tuber on side in hole about six inches deep, cover with about five inches of soil, patting gently. Gradually fill hole as shoot grows. If tubers seem shriveled, soak in water for a short time.

NAVLET'S DECORATIVE DAHLIAS

- A. L. KORAN—Immense golden yellow with a slight wave in each petal, which adds grace to the flower. Excellent stems. This is a recent prize winner. 75c each, postpaid.

The Famous "Turners" Favorite of Florists

Colossal in Size-Perfect in Form

20c EACH POSTPAID

\$2.00 POSTPAID

MRS. WM. TURNER-World's Largest Chrysanthemum-White-The largest Chrysanthemum in the world. Prize-winner of the Panama-Pacific Exposition at San Francisco in 1915. Measure 10 inches in diameter, ball shapedkeeps 15 days after cutting, with proper care. It is one of the strongest of growers and the flowers are supported on cane-like stems 4 to 5 feet long.

YELLOW TURNER-A Magnificent Yellow-This superb new Yellow Turner defies description. In size, form and habit resembles the Mrs. Wm. Turner. Instead of being white it is a beautiful bright canary-yellow. The blooms are borne on long strong stems and keep for days without losing their freshness.

PINK TURNER-One of the world's best-It is one of the strongest of growers. Exceptionally large flowers, supported on cane-like stems 4 to 5 feet long. Will last 2 or 3 weeks after cutting in water. Color of a most pleasing pink. Deserves a place in every garden.

BRONZE TURNER-Same characteristics as the other Turners. Large beautiful flowers of an indescribably rich golden bronze hue that never fails to elicit admiration. Long, stiff stems. A true exhibition variety.

"NAVLET'S" LARGE FLOWERING BEAUTIES

15c EACH \$1.50 DOZEN POSTPAID

WHITE

JEANNE NONIN—Fine incurved variety.
Globular white flowers. Without a rival for November and December blooming. Silver cup winner. Grand exhibition or commercial variety.
OCTOBER QUEEN—Purest white. Very early. Large size flowers. Very good exhibition variety.
WHITE BONAFFON—A prolific bloomer, strong stems, large, incurved pure white flowers.

RED

HARVARD—Dark crimson reflex. Take bud about September 5th. Mature November 15th on.

MINNESOTA (Single)—A blood red single Chrysanthemum, wonderfully effective. Grown in hedge form or massed. It cannot be surpassed.

PINK CHIEFTAIN—Of the same habit as the White Chieftain. The flowers are very large and incurved. Very good commercial variety.

ROSE PERFECTION—Seedling of Chieftain. A very rich pink in color. Excellent exhibition variety.

SMITH'S SUBLIME—Soft shade of pink, maturing in September. Takes an early bud in August.

BRONZE

EDGAR SAUNDERS—Latest deep bronze we have. This variety is a wonderful bronze and deserves a place in every garden where a bronze is desired.

YELLOW

COL. D. APPLETON—Mammoth incurved. Wonderful shade of yellow. Long stems. Thousands used each year by football rooters. Gigantic in size and at their fullest beauty in November.

MAJOR BONAFFON—A rich incurved canary-yellow. An abundant bloomer. The flowers grow to an immense size, with long stems.

with long stems.

MARIGOLD—A monster flower. Matures
October 5th on. The wonderful yellow
is used for commercial purposes or ex-

hibition.

MRS. WM. DUCKHAM—Large reflex yellow. One of the old favorites. A wonderful exhibition variety.

For full information on planting and care of Chrysanthemums, see page 91

ENORA (White—Penciled with bright red)—Narrow foliage, long stems, flowers large, freely produced. Very clear-cut and beautiful, keeps like an everlasting flower; ships better than any other variety. Even growers who have been prejudiced against "flaked" varieties admire and grow the Benora, because it pays handsomely for its keep, and is a pleasure to

CTTY LOW—This variety is a beautiful cerise-pink. The stems are long, stiff and very heavy. The flowers are large. Grown for the florist trade very extensively. BETTY LOW-

C. W. WARD (Pink)—A perfectly formed Carnation with full center. Immense size, beautiful pink shade, free-blooming.

DONALD—Another prize-winner. Best glossy dark crimson Carnation grown. Flowers are borne on long stiff stems. A very free bloomer.

MORNING GLOW-This beautiful light pink flower, shading to a light pink, has won a place in the Carnation world. Stems long and very strong.

ROSELIND—A mammoth flowering variety. Flowers bright cerise color. This Carnation deserves a place in every garden. Its color is beautiful. A free bloomer and a very strong grower.

SPECTRUM—Spectrum is one of the very best scarlet Carnations to be placed on the market. We are positive if you are partial to this color you will be more than delighted.

SUNSET (Variegated)—A superb novelty. The broad, saw-edged golden yellow petals have wide carmine stripes running through the center, and are also flaked with carmine. The flowers—of mammoth size—are borne on long, stiff stems, and will last from 10 to 15 days after cutting. A wonderfully free bloomer bloomer.

PLANTING SUGGESTIONS

A sunny location is preferable. The ground should be worked at least 12 inches deep. If the soil is heavy, burnt ashes will improve the conditions considerably, and if possible a little sand mixed in will be of additional help. If, on the other hand, the ground is sandy or light, add loam and well-rotted manure and mix well to a depth of at least 12 inches.

DO NOT, when planting, bury the plant any deeper in the ground than they were in the pots, or they may die from "stem rot." Do not plant them any nearer than 18 inches, and carefully stake the plants when sufficient growth warrants staking.

Water frequently. When taking off dead blooms, cut the stems off as far back as possible, which will induce new growths and help to keep the plants bushy. If large blooms are desired, only one or two buds should be allowed to each stem.

Carnation plants may be left in the open throughout the Winter, having been cut back to within 6 to 8 inches of the soil.

THREE CHOICE VARIETIES 35c each; \$3.50 doz., postpaid

GROUP OF 3 One Each of These Three Choice Varieties

\$1.00

ROYAL PURPLE—A very beautiful Carnation, out of the ordinary because of its rich color. Plant in semi-shade.

FAIRY QUEEN—A salmon-pink Carnation deeper in color than Laddie. Its flowers are enormous in size, borne on very stiff stems. This Carnation is very popular with the florists.

CHAS. C. NAVLET CO.'S NEW SCARLET—A perfectly formed large flowering scarlet Carnation, with strong sturdy stems. It has a vigorous growth, and is a prolific bloomer.

Navlet's Hardy Annual Plants

Break into a swift riot of color in your summer garden

Literally acres of Plants! This photograph shows just a corner of one of our lath houses, where thousands upon thousands of shrubs and flowering plants are grown annually.

On this and the following pages will be found a list of the most popular, easily grown and valuable plants for home garden culture. The list has been carefully revised, and each variety selected for its special merits. Our plants are all grown in the Santa Clara Valley under ideal climatic conditions, and the result is an incomparable stock of strong, hardy, healthy plants that never fail to grow and give satisfaction and delight.

be following pages will be found a list of the most grown and valuable plants for home garden culhas been carefully revised, and each variety sepecial merits. With Annuals, There's Variety

in the Garden from Year to Year

Annuals give opportunity for flexibility in the planting scheme, for that bit of whimsy that makes this year's garden a fresher delight than last year's even. Against a background of Shrubs, and with the Perennials as a nucleus, you can vary the garden delightfully with the introduction of gay, vivacious Annuals.

PETUNIAS

THE MOST SUPERB STRAINS IN EXISTENCE

Petunias commence flowering early and continue a mass of bloom during the entire season. They are easy to grow and repay one a thousandfold for the effort

SINGLE VARIETIES

RUFFLED GIANTS OF CALIFORNIA—Single—A wonderful mixture. These huge Single Petunias are unrivaled for beauty, size and luxuriance. Most of the flowers are exquisitely ruffled or fringed on the edges, and are of enormous dimensions—literally as large as saucers They come in a tremendous variety of colors, markings, veinings, blotchings and stripings, and with most beautiful and grotesque combinations. Some are rich and gorgeous—others are lovely and delicate. 4 for 30c; 75c per doz., postpaid; \$5.50 per 100, delivered free.

ROYAL PURPLE PETUNIAS—A new and strikingly beautiful Single Petunia of a royal velvety purple color. 15c each, postpaid; 6 for 80c; \$1.50 for 12; \$10.00 for 100, delivered free.

DOUBLE VARIETIES

MAMMOTH FLUTED GIANTS OF CALIFORNIA—Double—A gorgeous mixture. The flowers of these wonderful Double Petunias are as large as Hollyhocks and as double as double can be. Their petals are fluted and crinkled in ways that intensify and vary the colors with high lights and dark shadows, and give the flowers the richness and appearance of crumpled velvet. Some are in self-colors—other are veined, blotched and margined. Propagated from imported novelties. 15c each, postpaid; 6 for 80c; \$1.50 per doz., postpaid; \$10.00 per 100, delivered free.

Free-flowering annuals; white, carmine, lilac, maroon; effective for garden decoration and valuable for cutting. Blooms from early July until frost. Height 2 to 2½ feet. 6 for 30c; 50c per doz.; \$3.50 per 100.

SALVIA (Scarlet Sage)

For a showy border or an effective bed, the fiery red Salvia is unsurpassed. Plants grow from 2 to 3 feet high and bloom from early Spring until late in the Fall. In protected locations, Salvia will bloom two to three years.

SPLENDENS-Long spikes of scarlet flowthrough entire ers through entire season. 6 for 40c; plants 75c doz.; 100 for \$5.50, postpaid.

ZURICH—Dwarf Salvia, blooming 10 days earlier than other variety. Plants, 6 for 40c; 75c doz.; 100 for \$5.50, postpaid.

Salvia Splendens

Petunias

SALPIGLOSSIS

A half-hardy annual, growing about 3 feet high and bearing trumpet-shaped blossoms of rich shades and colors, all beautifully veined. It is valuable for bedding and massing, and its long stems make it excellent also for cut flowers. 6 for 30c; 50c per doz.; \$3.50 per 100, postpaid.

ZINNIAS Large as 'Mums

Wonderful new strains with immense double blooms. A very showy bedding plant, flower very double and are supported by stiff stems and are excellent for bouquets or decorations. In the garden they are beautiful on account of their continuous blooms, brilliant colors and varieties of shades-white, golden yellow, scarlet, purple. 6 for 30c; 50c per doz.; \$3.50 per 100, postpaid.

GIANT RUFFLED PANSIES

—a joy in any garden

12 plants 50 plants \$1.25 postpaid 100 plants \$2.25

The Perennial Garden

has an old fashioned charm that's a perennial joy

Perennials—blooming on from year to year, almost without attention—what a joy they are to the lover of gay, old fashioned flowers! The Perennials have an average life of three years or more, propagating readily from seeds or from off-sets. You will find listed here all the old garden favorites, grown in our own Nurseries,—fine, sturdy plants that will give your garden the perpetual delight of gracious flowering.

For further information on Perennials, see the Planter's Guide, pages 85-93.

We guarantee satisfactory delivery of all Mail Orders.

ANCHUSA (Italica)

The rich blue tones of its flowers are much in demand during their flowering period of May and June. It forms much branched specimens, 3 to 5 feet high, each branch terminating in a large pyramidal graceful spike. Of easy culture in any good garden soil and a sunny position. Very effective either in solid beds or in the hardy border. 15c per plant; 3 for 40c; \$1.50 per doz., postpaid.

ARMERIA MARITIMA (Sea Pink)

An evergreen border requiring no trimming. The flowers are lilac-pink and are borne on stems about 12 inches high above the plant. 6 for 20c; 35c per doz.; \$2.25 per

AQUILEGIA (Columbine)

No other plant has so airy a grace as the Columbine, is more generous of bloom, or more effectively adapted for cut flowers. Columbines are among the most beautiful and popular of all hardy plants. Large showy flowers blooming in Spring or early Summer. Plants 6 for 40c; 12 for 75c, postpaid; 2-year-old; 20c per plant; \$2.00 per doz., nostpaid.

ASCLEPIA

CURASSAVICA—Very tall growing, mostly of a hardy herbaceous character. Remarkable for their curious flowers and the silky substance, which fills the seed pods. Orange-scarlet flowers. Useful for mixed borders in Summer. Strong clump 25c each; 3 for 65c; \$2.50 per doz., postpaid.

ASPIDESTRA

A popular house plant, grown for its stiff, shining, beautiful foliage, which is sometimes striped. Leaves are irregular, long and gradually narrow to the end. Plants with 2 to 3 leaves 50c each; 4 to 6 leaves, \$1.50 each, postpaid.

ASTILBE

DAVIDII-Hardy herbaccous plant The dark green cut leaf foliage forms a handsome tuft, from which rise crowded panicles of feathery violet-blue flowers. Fine for cutting. 50c each, 3 for \$1.35; \$5.00 per doz., postpaid.

CHELONE BARBATUS

A hardy perennial with long coral-red spikes like Pentstemon. Blooms during July and August. Strong plants. 15c each; 3 for 55c; \$1.50 per doz., postpaid.

The Astilbe, with its feathery grace, is excellent as a cut flower.

ACANTHUS MOLLIS

A handsome, stately plant for planting as single specimens on the lawn or in the border, or for grouping with other plants for sub-tropical effect. Deeply toothed, heart-shaped leaves, 2 feet long by 1 foot wide. Produces 3-foot spikes of curious rose-colored flowers during August and September. The ornamentation of the Corinthian column is said to have been suggested by the leaf of this plant. 25c each, 3 for 65c; \$2.50 per doz., postpaid.

ACHILLEA (Yarrow)

FILIPENDULINA—Flat heads of brilliant yellow flowers; finely cut foliage. Plants suitable for dry, sunny places. Bloom all Summer. 25c each; 3 for 65c; \$2.50 per doz., postpaid.

AGAPANTHUS

UMBELLEATAS—For centerpieces for the lawn the Agapanthus cannot be excelled. In a season it grows 2½ feet high. The foliage is somewhat like Amaryllis; it never dies, and is in bloom nearly all the year round. 25c each postpaid; \$2.50 doz.

AGATHEA COELESTIS (Blue Daisy)

A favorite pot plant and useful for bedding protected places. Leaves alternate, entire or dentate. Heads usually long-peduncled, the corolla blue or white, the disk yellow. 20c per plant; 3 for 55c; \$2.00 per doz., postpaid.

ALYSSUM (Saxatile)

An ideal hardy plant excellent for rock work. Flowers in May; showy, golden-yellow flowers. 20c each; 3 for 55c; \$2.00 per doz., postpaid.

ANEMONE (Windflower)

A very pleasing perennial, producing large pink flowers; few plants compare with them in beauty; fine for bouquets. 20c per plant; 3 for 55c; \$2.00 per doz., postpaid.

BEGONIA VERNON

Ready for immediate delivery. Both varieties; 15c per plant; 3 for 30c; \$1.00 per doz.; 100 for \$6.00.

SINGLE BEGONIA VERNON—Of cheerful appearance and perpetually blooming, it is one of the most popular and charming plants. Colors: Delicate pink, pure white, and bright red. Strong plants.

SEMPERFLORUM HYBRIDA—A charming variety distinguished by the splendid coloring of its foliage and flowers. The latter are bright orange-carmine and contrast beautifully with the foliage, which, when exposed to the sun, changes into a deep olive-green, shaded and edged with bronze. Grows to a height of 18 inches. Splendid for bedding and pot culture. Strong plants.

CANTERBURY BELLS

White, Pink, Blue or Assorted Colors
A fine perennial of lovely colors; particularly glorious when planted in large groups. 2 for 20c; 75c per doz., postpaid. 2-year-old plants 20c each; 3 for 55c; \$2.00 per doz., postpaid.

For Coral Bells see page 60

Navlet's Perennials are "Lucky"

tall and stately, is Delphinium, rowed d from the garden Grandmother's day.

CHIFFON DAISY

The Chiffon Daisy has pure white flowers with a multitude of twisted petals that give it a very fluffy appearance. Plants grow about eight inches high and bloom continuously from early Spring until Fall. Flowers are held on long stems high above the foliage. Showy in borders, also excellent as a cut flower. Plants 50c each; 3 for 55c; \$2.00 per doz., postpaid.

COREOPSIS

This is one of the finest hardy plants, This is one of the finest hardy plants, with large, showy bright yellow flowers, produced in the greatest abundance from June till frost. As a cut flower they stand near the head among hardy plants, having long stems and lasting in good condition a week or more. 15c per plant; 6 for 30c; 50c per doz., postpaid; \$3.00 per 100, postpaid.

FOXGLOVE (Digitalis)
GLOXINIA FLOWERED—Red, white,
pink or assorted colors. These improved flowers are very showy,
hardy plants for the garden, massed

beds, or very effective for borders in imprisoned sunshine driveways and parks. 2 for 20c; 75c per doz., postpaid; two-year old, 15c each; 3 for 40c; \$1.50 per doz., delivered free.

The

GAZANIA—Ready for Delivery

ORANGE FLOWERS—Plants very dwarf; grow close to the ground, 6 to 10 inches high; produced in the greatest abundance in the Spring and early Summer. For making borders, where there is a lack of water. This plant cannot be beat. 6 for 30c; 50c per doz., \$3.50 per 100, delivered free.

CANARY YELLOW—A new Gazania. Large flowers. 6 for 30c; 50c per doz., \$3.50 per 100, delivered free.

GRANDIFLORA—Very showy flowers, 3 inches in diameter; these useful plants flower freely from early Summer until frost. 6 for 30c; 50c per doz., postpaid; \$3.50 per 100, delivered free.

SUNSET—A variety that should be in every garden! Its beautiful semi-double flowers, which are very massive, are borne on long stiff stems. The petals are thick and leathery. Flowers measure 3 inches in diameter. Each flower runs from bright shades of bronze to scarlet and gold on the ends of each petal. One of the best cut flowers in the San Francisco market. 20c per plant; 3 for 40c; \$1.50 per doz.. postnaid. doz., postpaid.

GOLDEN GLOW (Rudbeckia)

This is a glorious yellow-flowering plant. Grows 6 to 8 feet high. If set out in the Spring will produce hundreds of flowers during July and August. The flowers are perfectly double like Roses. 20c per large clump; 6 for 60c; \$1.00 per doz.

Grown in our own Nurseries, from hardy stock especially selected for its adaptability to California climate and soils, our Perennials seem always to "turn out well," to take firm root and grow into buxom plants with years of generous bloom.

NAVLET'S EXHIBITION DELPHINIUM

These flowers run in every shade of light blue and delicate pastel shades. The spikes grow from 6 to 10 feet; flowers semi-double. READY FOR DELIVERY—Well known and popular old-fashioned flower. Very fragrant. 6 for 30c; 50c per doz., postpaid; §3.50 per 100.

VERBASCUM (Mullein)

MISS WILLMOTH—Hardy perennial, very stately. Height 4 to 6 feet. Large leaves, above which rises a pyramid of pure white flowers. 20c each; 6 for 55c; \$2.00 per doz., postpaid.

YUCCA (Spanish Bayonet)

YUCCA FILAMENTOSA—"Adams Needle"—Forms a clump of bold, stlff swordshaped leaves, 3 to 4 feet high, surmounted in Spring with a large flower stalk.

35c each: 6 for \$2.00; \$3.50 per doz., postpaid.

YUCCA WHIPPLEI—"Spanish Bayonet"—The finest of all yuccas, the magnificent flower stalks bearing thousands of waxy white flowers, rising 10 to 15
feet above the low rosets of narrow leaves at the base. 50c each; \$5.00 per doz.,

postpaid.

VIOLET PLANTS—(3 Wonderful Species)

MARIE LOUISE—A Magnificent Double Violet—This beautiful Violet is a great favorite. It is a prolific bloomer and will thrive in shady places where most plants will not do well. The foliage is extremely luxuriant and of a pleasing, glossy green. The large double blooms are exequisitely perfumed and are borne on long, strong stems Plants: 6 for 40c; 12 for 75c, \$5.00 per 100, postpaid.

PRINCESS OF WALES—A glorious and very fragrant variety of fine habit—Sturdy growth and justly famous for its early and continuous blooming and the immense number of flowers it bears. It is a distinct type of the California Violet—being a lighter purple. The flowers average larger than a silver dollar, and are borne on gracefully poised stems from 12 to 14 inches long. Plants: 6 for 30c; 12 for 50c; 100 for \$3.50, postpaid.

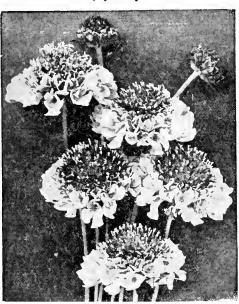

PURPLE KING—For size, order Princess of Wales—for profusion of flowers, order the Purple King. You have never seen a Vlolet bear so abundantly as this. It is a perfect marvel. And while the blooms are of only medium size, they are, nevertheless, perfect in form with a soft velvety sheen that is Indescribably attractive. One of the chief features is the fact that they will keep a week after picking. 6 choice plants 30c; 12 choice plants 50c; 100 plants for \$3.50, postpaid. postpaid.

VIOLA (Tufted Pansy)

JERSEY GEM—A variety with pure violet-blue flowers. Plant compact, sturdy habit of growth and the flowers are borne on good stems. Ideal for cutting. Desirable plant for the rockery. Each 20c; 3 for 55c; doz., \$2.00.

Sweet William, quaintly old-fashioned.

Scabiosa (Grandmother's Pincushion) Page 62

Here are Cedars with Their Age-Old Mystery

And Cotoneaster, massed with crimson berries

CEDRUS (Cedar)

The Cedars are among the most beautiful evergreen trees and are adapted to all the Pacific Coast.

*ATLANTICA ("Mt. Atlas Cedar")—(Con. E. T.)—Resembles the C. Lebani; the foliage is a lighter bluish green. 1 to 1½ feet, 75c; \$7.50 per doz., delivered free; 2 to 3 feet, balled, \$2.50; 4 to 6 feet, balled, \$3.50.

DEODORA ("Deodar")—(Con. E. T.)—A magnificent, stately evergreen conifer of pyramidal form. Foliage beautiful silver green. Most rapid grower of all Cedars. I foot, 75c; \$7.50 per doz., delivered free; 1½ to 2 feet, \$1.50; 3 to 4 feet, \$3.00 ach; 5 to 6 feet, balled, \$6.00.

*LEBANI ("Cedar of Lebanon")—(Con. E. T.)—Native of West Asia. Makes a tall pyramidal tree resembling the Deodora, when it has attained a large size. Foliage darker and more irregular and open habit. 1 to 1½ feet, 75c each; \$7.50 per doz., delivered free; 2 to 3 feet, \$1.50, balled; 4 to 6 feet, \$3.00,

CHAMAECYPARIS (Lawson Cypress)

LAWSONIANA ALUMNI ("Blue Lawson Cypress")—(Con. E. T.)

—The most popular Lawson Cypress. Color is a metallic silver blue foliage and habit of growth is symmetrical. The branchlets are flattened, very close together, plant forms an upright pointed column. Very slow grower; will ultimately reach a height of 12 to 15 feet, which will take many years. 2 to 3 feet, balled, \$3.00 each; 3 to 4 feet, balled, \$3.50.

*LAWSONIANA VIRIDIS ("Green Column Cypress")—(Con. E. T.)—Ornamental and distinct. Similar to Cy. Lawsoniana Alumni. A compact, symmetrical, pyramidal plant, very rich green in color. 1 to 2 feet, seedlings, 75c, delivered; 2 to 3 feet, balled, \$3.00 each; 3 to 4 feet, \$4.50 each.

CHOISYA (Mexican Orange)
TERNATA—(E. S.)—A useful shrub with bright green, clean-cut foliage; flowers white, fragrant, and borne in clusters. Thrives in most any situation. 1 to 1½ feet, delivered free, 75c.

CINNAMOMUM (Camphor Tree)

CAMPHORA AFFICINALIS—(E. T.)—Fine in groups or for street planting. Foliage is very dense, compact, light green. 2 to 3 feet, \$1.00, delivered free.

COPROSMA

BAUERI—(E. S.)—Fine as a bushy border against a wall or porch. Round, glossy foliage. Flowers small and followed by showy yellow berries. 1½ to 2 feet, 75c, delivered free.

CORONILLA

GLAUCA—(E. S.)—A beautiful blooming shrub with fine, gray-green foliage. Flowers pea-like, deep golden yellow, intensely fragrant by day but scentless at night. In gallon containers. 1 to 1½ feet, 75c each, delivered free.

CORNUS (Dogwood)

CAPITATA—(D. S.)—Medium size shrub with lovely cream color blooms; berries blue. 75c; 2½ inch pot, 25c each; delivered free.

COTONEASTER

Red or Orange Berried Shrub

An exceedingly dsirable shrub largely used for its foliage effect
in banking and massing, also for their brightly colored orange
or red berries, borne in Fall and Winter. Very hardy and fast
growing, ranging from small to medium in height.

growing, ranging from small to medium in height.

ACUMINATA—Himalayas—(E. S.)—Six feet. Grows erect; medium size pointed leaves; pinkish-white flowers; large showy red berries. 1½ to 2 feet, 75c, delivered free; 2½ to 3 feet, balled, field grown, \$1.50 each.

*FRANCHETTI—China—(E. S.)—Six feet. This is a fast growing, spreading variety with upright arching branches. Leaves medium size, dark green on top and silvery beneath. Many orange-red berries scattered on the branches in Winter. 2 to 3 feet, 60c each, delivered free; 2½ to 3 feet, balled, \$1.00.

FRIGIDA—Flowers small and white, in flat clusters. Valuable because of its brick-red berries. Leaves 2 to 3 inches long. Half deciduous. 3 to 4 feet, 75c each, delivered free; 4 to 5 feet, \$1.00 each, balled, field grown.

HARROVIANA—(E. S.)—New variety, of tall, graceful branching habit. White flowers, with berries a rosy red, borne in large masses. 1 to 1½ feet, 75c each; balled, 1½ to 2 feet, \$1.25 each.

*HORIZONTALIS ("Rock Cotoneaster")—(E. S.)—Two feet. One of the very best trailing shrubs, growing flat on the ground. Very small, dark green leaves. The great quantities of small bright red berries produce a beautiful effect. 1 foot, 75c each, delivered free.

Very small, dark green leaves. The great quantities of small bright red berries produce a beautiful effect. 1 foot, 75c each, delivered free.

*MICROPHYLIA ("Rockspray")—Himalayas—(E. S.)—Four feet. A low-growing dense shrub with small round leaves, dark green in color. Berries borne along the stem are bright red. 1 to 1½ feet, 75c each, delivered free; 1 to 2 feet, balled, field grown, \$1.00 each.

PANNOSA ("Silverleaf Cotoneaster")—Himalayas—(E. S.)—Eight feet. One of the best and most useful. Foliage soft graygreen. Under sides of the leaves silvery in color. Flowers are white and bloom in the Spring, followed by great masses of silvery red berries which remain all Fall and Winter. Fast growing and of a loose growing habit. 2 to 3 feet, 75c each, delivered free; 3 to 4 feet, balled, \$1.50 each.

*SALICIFOLIA ("Willowleaf Cotoneaster")—China—(E. S.)—Two feet. A fast growing creeping variety with dark green leaf; branches horizontal and drooping. Flowers are white, followed by many red berries. 1 to 1½ feet, 75c each, delivered free; 2 to 3 feet, balled, field grown, \$1.50.

*THYMIFOLIA (Rockspray)—(E. S.)—A low growing dense shrub with small round leaves, shining dark green in color. Berries bright red, borne along the stem. Gallon containers. 1½ to 2 feet, 75c each.

Shurbs, 25c ea.

All shrubs marked (*) can be purchased in 2½-inch pots, ready to be set out. 25e each, postpaid.

The fascination of a Nursery Salesyard is suggested in this corner of our Prevost Street Nursery in San Jose

Evergreens Lend a Depth of Shadow

The tall Italian Cypress lends height to the formal landscape plan.

DASYLIRION

A highly ornamental plant for isolated A highly ornamental plant for isolated specimens on lawns, staircases and similar uses in formal style of landscaping. The leaves are very narrow, in countless numbers, forming a dome or globe shape. They have an individuality all their own. The flower stalks grow 8 to 10 feet high, giving a strong impression of the desert. 1 to 2 feet, 75c each, delivered free; 4 to 6 feet, balled \$2.50 each. balled, \$3.50 each.

DRACAENA (Palm)

INDIVISA—(E. T.)—Strong, slender trunk. Foliage narrow and drooping, varying from green to bronze. 1½ to 2 feet, \$1.00 each, delivered free; 4 to 5 feet; \$4.00 each.

ESCALLONIA

Hardy evergreen shrubs with rounded dark glossy green foliage, producing flowers in white, red and pink in large terminal panicles during the entire Sum-

growing shrub of erect habit, 8 to 10 feet tall. Dark green glossy foliage. A continuous bloomer and one of the best shrubs for grouping. 1 to 2 feet, 75c each, delivered free; 4 to 6 feet, balled, \$1.50.

**MONTEVIDENSIS—(E. S.)—Most handsome of the white flowering varieties.
Flowers borne in large terminal cymes
in Fall and early Winter. Leaves
notched. 2 to 3 feet, 75c; \$7.50 for 10,
delivered free; 3 to 4 feet, 5-gallon cans,
\$1.50 acch. \$1.50 each.

\$1.50 each.

*ROSEA—(E. S.)—Growth strong and upright. Leaves rough, serrate and with resinous glands beneath. Flowers pink, in conspicuous terminal racemes. Very handsome species. 2 to 3 feet, 75c each, gallon can, delivered free; 2 to 3 feet, field grown, balled, \$2.00.

*RUBRA—(E. S.)—Hardy evergreen shrubs with rounded dark, glossy green foliage, producing flowers in red in large terminal panicles during the entire Summer. Of compact growth. 2 to 3 feet, 75c, delivered free; 3 to 4 feet, balled, \$2.00.

CYPRESS (Cupressus)

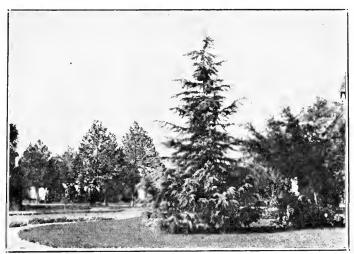

*ARIZONICA (Arizona Cypress)—(E. T.)—Handsome tree, with brilliant silvery blue foliage. Growth rather compact, with somewhat stout branches. Bark red. 2 to 3 feet, 75c each, delivered free. 3 to 4 feet, balled, \$1.50.

*MACROCARPA (Monterey Cypress)—(E. T.)—The well-known Cypress tree of California. Valuable for hedges, windbreaks, and as a shelter along the sandy seashore. Does well in all sections of the Pacific Coast. Gallon cans, 2 to 3½ feet, 75c each; \$7.50 doz., delivered free; 4 to 5 feet, balled, \$1.50 each.

SEMPEYIRENS FASTIGIATA (Italian Cypress)—(E. T.)—Tall, tapering, branches erect, growing parallel with trunk; branches frond-like. Leaves smooth, deep green. See illustration. Used generally on each side or entrance or no outside corners of homes, 1/2 to 2 feet, 75c, delivered free; 2½ to 3 feet, \$2.00; 3 to 3½ feet, \$2.50; 4 to 6 feet,

DAPHNE

DAPHNE—(E. S.)—A low growing shrub, fine for grouping and borders. Fragrant, white or pink flowers. 6 to 8 inches, \$1.00 each, delivered free; 1 to 1½ feet, balled, \$3.00 each, delivered free; 2 to 3 feet, balled, \$5.00 each.

Illustrated: The stately Cedrus Deodara soars rapidly to an inspiring height.

DIOSMA (Breath of Heaven)

ERICOIDES—(E. S.)—An old favorite. Foliage very fine and delightfully scented. Flowers pure white, small and borne in great profusion. 2½ inch pots, 25c each, delivered

ERICA (Heather)

*MEDITERRANEAN—(E. S.)—One of the most popular and hardy Heaths. Forms densely branched perfectly globular shrub, with dark green leaves. In Winter it is covered with tiny pink flowers. 1 to 1½ feet, 75c, delivered free.

MELANTHERA—(E. S.)—Another splendid Winter-blooming Heath. Finest for decoration as a cut flower. Flowers a little larger, rosy color. A wonderful bloomer. 2 to 2½ feet, balled, \$2.50 each.

each.

CARNEA — (E. S.) — Dwarf growing Heather, flowers bright rose, bell-shaped. Very dainty. 1 foot, 75c each; 10 for \$7.00, delivered free.

ELAEGNUS (Silverberry)

ARGENTEA—(E. S.)—Erect growing shrub to about 12 feet. Reddish-brown branches. Leaves oblong; silvery on both sides, often with brown scales scattered beneath. Flowers axiliary, yellow within, very fragrant. Fruit oval or roundish oval, densely covered with silvery scales. 1 to 2 fect, \$1.00 each, delivered free; 2 to 2½ feet, field grown, balled, \$2.00.

EUGENIA

HOOKERIANA—(E. S.)—Very dark green leaves. Inclined to spread. If trimmed occasionally will make a very compact and beautiful shrub. Fast growing, slightly tender. 2½ inch pots, 25c each, delivered free.

Heather offers a delicate charm.

Shrubs, Glossy and Dark or Delicately Flowered

Fuchsia, with its graceful drooping flowers in royal color combinations is always a favorite flowering shrub.

FUCHSIA

BALLET GIRL—Sepals pure white, with vivid carmine corolia. 20c each; \$1.50 per doz., delivered free.

BLACK PRINCE—Very large, double, beautiful flowers. Sepals bright waxy-carmine—corolia pink. 20c each; \$1.50 per doz., delivered free.

MRS. E. G. HILL—Sepals bright crimson—large, white corolia. Perfectly double. 20c each; \$1.50 per doz., delivered free.

PHENOMENAL—Double flowers. Tube and petals bright carmine—corolia rich crimson-purple. 20e each; \$1.50 per doz., delivered free.

ORM KING—Of dwarf habit. Sepals dark carmine—corolia white, shaded rose. 20c each; \$1.50 per doz., delivered free. STORM KING-

HAKEA

LAURENA—(E. S.)—Ten feet. A Winter blooming shrub, with foliage similar to the blackwood Acacia, bearing curious heads of crimson flowers with white stamens. 2 to 3 feet, in containers, \$1.00, delivered free.

SALIGNA—Eight feet. Flower clusters white, small but numerous; leaves pale green, a good drought resistant. 2 to 3 feet, 75c each, delivered free.

SUAVEOLENS—(E. S.)—A large rounded bush with curious needle-like leaves bearing white flowers exhaling a sweet fragrance. Easily grown. Wants very little water, hence excellent for dry grounds. In gallon containers. 1 foot, 75c, delivered free.

HYPERICUM (Gold Flower)

HENRYI—(S.)—Tall, bushy shrub; foliage blue-green; flowers golden yellow, flat, 2 inches in diameter. 1 to 2 feet, 75c each, delivered tree.

ILEX (English Holly)

AQUIFOLIUM—(E. S.)—Ideal Xmas Holly. Foliage dark green and prickly. Flowers small, followed by an abundance of bright red berries. Seedling to 1½ feet, \$1.00; 1½ to 2 feet, field grown, balled, \$2.00; delivered free.

LAUREL

ENGLISH LAUREL—(E. S.)—Fine, large glossy leaves that are never attacked by insects. Effective Summer and Winter. Excellent for hedges, group planting for screening, and as individual specimens. Respond to trimming extremely well. 1 to 1½ fect balled, \$1.50; 2½ to 3 feet, \$2.50.

EUONYMUS

Ornamental evergreen shrubs, very desirable for hedges, also very effective when planted alone.

*ALBA MARGINATUS—(E. S.)—Upright growth. Foliage narrow, margined silvery white. 1 foot, 65c each; \$5.00 for 10, delivered free; 1½ to 2 feet, field grown, \$1.00.

⁴AUREA ARGENTEA—("Golden Margined")—Leaves are marked and edged with gold. Grows tall. 2 to 3 feet, field grown,

AUREA MARGINATUS—(E. S.)—Compact dwarf variety. Foliage yellow towards the ends, and mottled with dark and light green in center. 1 to 1½ feet, 75c each; \$6.50 for 10 delivered free; 1½ to 2 feet, balled, \$1.75.

*DUC D'ANJOU—(E. S.)—Dark green leaves, striped with light green and yellow in center. Very hardy. 1½ to 2 feet, 75c each; 10 for \$6.00, delivered free; 2 to 3 feet, balled, \$1.00.

JAPONICUS—(E. S.)—Ornamental evergreen shrub, desirable for hedges as they stand pruning well; also very effective when planted alone. Dark lustrous green leaves of dense upright habit. 1½ to 2 feet, 75c, delivered free; 2 to 3 feet, field grown, \$1.50.

PRESIDENT GAUTHIER—(E. S.)—Of upright growth, foliage silvery, margined pink. 1 to 1½ feet, 75c each, delivered free; 2 to 3 feet, field grown, \$1.25.

*PULLCHELLUS ("Small Leaved")—(E. S.)—A dwarf form with small dark green foliage, growing 1 foot high; fine for low edging. 1 foot, 75c each, delivered free; 1 to 1½ feet, balled, \$1.25.

FEIJOA (Guava)

PINEAPPLE—Attractive free or large shrub. Will grow 15 feet high, but can be made into a small shrub by pruning. Leaves glossy green, under side, silvery-gray. Flowers white-purple with red stamens. The oval fruit is delicious to eat, and has a delightful aroma. 2 to 3 feet, \$1.00 each, delivered free; 2½ to 3 feet, field grown, balled, \$2.00.

STRAWBERRY GUAVA—(S.)—A fine glossy leaved shrub or small tree, producing an abundance of luscious fruit about the size of a strawberry, round and deep reddish-brown color. The fruit is highly prized for table use when fresh, and has few equals for jams and jellies. Quite hardy, and easily grown. In gallon containers. 1 to 2 feet, 75c each; \$6.50 per 10.

FREMONTIA

CALIFORNICA—(D. T.)—Named after General Fremont, who discovered it in '46. Ornamental, beautiful, golden yellow flowers. Grows 10 to 20 feet high. 2 to 3 feet, \$1.00, delivered

GREVILLEA

OBUSTA—(E. T.)—A very large tree with fern-like foliage. Covered with orange colored flowers late in Spring. The flowers are a great source of honey for bees. Does well in all parts of California. One of the most stately trees for avenue planting. Thrives with scarcely any water. 3 to 4 feet, 75c each, delivered free.

JUNIPER

SABINA TAMARISCI-FOLIA — (Con. S.) — Low growing, densely branched, trailing; foliage feathery and bright. Fine for rock work, banks, etc. work, banks, etc. Balled, 1 to 1½ feet, \$1.50; 1½ to 2 feet, \$2.00 each.

CHINENSIS PFITZERI-ANA (Pfitzer's Juni-per)—One of the fin-est Junipers in culti-vation. Has bushy widespread horizontal branches and forms an immense flat irregular head of bluish green foliage, very graceful in outline. Balled, 1½ to 2 feet, \$2.00; 2 to 3 feet, \$2.50. branches and

INENSIS MASCULA (Pyramidal Chinese Juniper) — (E. T.) — A fine, medium sized CHINENSIS A fine, medium sized fast growing tree, attaining height of about 20 feet. Similar to above, but more dense and compact with darker bluegreen foliage. 1 to 1½ feet, \$1.25.

This splendid Boxwood specimen, ready for shipment, gives an idea of the care with which Navlet's shrubs are balled.

Rustling Palms and Feathery Pampas

whisper exotic hints of distant climes

LAURUSTINUS (Viburnum)

*TINUS—(E. S.)—A shrub with rather small, wavy margined leaves. Flowers in broad clusters, pinkish in bud, white when fully open. 1 to 2 feet, 75c, delivered free; 1½ to 2 feet, field grown, \$1.00; 2 to 3 feet, field grown, \$1.50 each.

LEMON VERBENA

LIPPIA CITRIODORA—(E. S.)—A fast growing shrub with delightfully fragrant foliage. Bears minute flowers in delicate pyramidal spikes. In gallon containers. 3 to 4 feet, 75c.

*LEONATUS (Lion's Tail)

(E. S.)—A soft wood shrub with hairy stems; flowers brilliant orange tassel-like at each joint of the stem. Very distinctive, fast grower. 1 to 1½ feet, 60c each, delivered free.

LEPTOSPERMUM (Australian Tea Tree)

- *LAEVIGATUM—(E. S.)—Large shrub with graceful arching branches, foliage grayish-green, white flowers. Rapid grower. 2 to 3 feet, 75c each, delivered free; 2 to 3 feet, \$1.00 each; 3 to 4 feet, \$1.50.
- *SCOPARIUM-(E. S.)-Of spreading habit; flowers delicate pink. 21/2-inch pot 25c, delivered free.

LIBROCEDRUS

DECURRENS (Incense Cedar)—(E. T.)—Native to California and Oregon. Vigorous habit, close growth, with conical outline. Fine as a specimen or planted in groups. 1 to 1½ feet, \$1.00 and delivered force. each, delivered free.

LIGUSTRUM (See Privet) LONICERA

ITIDA—(E. S.)—A handsome shrub with closely set, dark green leaves about a half inch long. Stands trimming well. 1 to 1½ feet, 60c each, delivered free; 2 to 3 feet, field grown, \$1.00.

LOQUAT

(E. T.)—A beautiful green and creamy white foliage. Does best in the shade. Our stock is grown in 5-gallon cans. 5 to 6 feet, \$4.00, transportation charges collect.

MAGNOLIA

GRANDIFLORA—(E. T.)—A handsome tree. Foliage bright, glossy green. Flowers pure white. 3 to 4 feet, \$1.50 each, delivered free.

MYRTLE (Myrtus)

- *COMMUNIS (English)—(E. S.)—(S.)—A beautiful shrub with small glossy aromatic foliage and white spicy-scented flowers. Grows about 10 feet. 1½ to 2 feet, 75c, delivered free; 2 to 3 feet, field grown, \$1.50.

 COMMUNIS VARIEGATA—(S.)—Foliage marked and striped. Very free fruiting and flowering. 2 feet, field grown, \$1.50

MELALEUCA

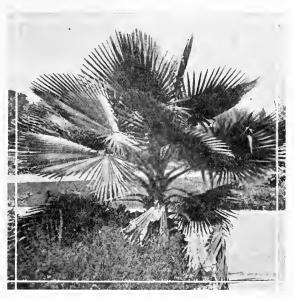

- *ARMILLARIES—(E. S.)—Large shrub; foliage needle-like and light green in color. Flowers white, borne in spikes. A rapid grower. 3 to 4 feet, 75c each; \$6.50 per 10.
- DECUSSATA—A tall shrub with grayish leaves, adorned with lilac colored flowers on short spikes. Easily grown. $1\frac{1}{2}$ to 2 feet, 75c each, delivered free.
- DIOSMAFOLIA—(E. S.)—Resembles Armillaries very much, except for the leaves, which are much broader. 3 to 4 feet, 75c each, delivered free.
- HYPERICIFOLIA—(S.)—Flowers of good size and orange-scarlet in color; foliage oval flat, opposite and slender. 1½ to 2 feet, 75c each, delivered free.
- NESOPHILA—(S.)—Shrub of bushy habit; foliage a pleasing shade of green; oblong flat; flowers lavender-purple. 2½-inch pot 25c, delivered frce.

NANDINA

DOMESTICA—(E. S.)—(S.)—A leafy shrub resembling a dwarf bamboo in looks; foliage pink-tipped in Summer, in Winter a bronzy-red; berries scarlet-red. Fine as a tub plant and in the garden. 1 to 1½ feet, 75c each, delivered free.

OLEANDER

NERIUM—(E. S.)—Pink-salmon or white. Large bushy shrubs, free bloomer, foliage bright green. All parts of the plant are poisonous if eaten. 2 to 3 feet, 75c each, delivered free.

With our characteristic Spanish architecture, the Palm is a happy choice as a specimen tree. This is the Gracilis

OSMANTHUS

ILLICIFOLIA—(E. T.)—Grows 10 feet, a beautiful bush with small, white flowers almost everblooming. Large dark green foliage. Prefers partial shade. Called "Sweet Olive." 1 to 1½ feet, \$1.25 each, delivered free.

PALMS

- PHOENIX CANARIENSIS—"Ornamental Date Palm"—easily the best and most popular palm for general planting in California and the Southwest. Thrives under all sorts of conditions, quite hardy and grows very rapidly. Dense, immense crown of beautiful curving leaves, each 15 feet long and of pleasing dark green color. Very stately. 1 foot, 75c each, delivered
- WASHINGTONIA GRACILIS—(W. Robusta)—Very tall, stout trunk, surmounted with large fan-shaped leaves, with very few of the thread-like filaments characteristic of other varieties. Gallon containers, \$1.00 each; \$9.00 for 10, delivered free.

PAMPAS GRASS

CORTADERIA ARGENTEA (White or Sliver-leaf)—(E. S.)—The Pampas Grass of the Argentine plains, appreciated for its beautiful silvery plumes. In 2½-inch pots, 25c, delivered free. ROI DES ROSES—Similar to the above except for plumes, rosypurple when first open, fading to faint lavender pink. In gallon cans, 75c, delivered free.

PARKINSONIA

ACULEATA—(Jerusalem Thorn)—(E. T.)—Interesting shrub; foliage double pinnate, small thorns on leaf stalks; flowers yellow, fragrant, and borne in racemes. Drought resistant and hardy. 1 to 1½ feet, \$1.00 each, delivered free.

PEPPER TREE (Shinus)

(E. T.)—A popular shade and ornamental tree, with fine, feathery foliage, producing clusters of reddish berries in the Fall; fine for street or avenue planting. 2 to 3 feet, 65c; 3 to 4 feet, 75c; 86.50 per doz., delivered free; 5 to 6 feet, \$1.50 each.

PHILLYREA (Mock Privet)

2. S.)—Ornamental, compact-growing, hardy evergreen shrub. Strikingly handsome bright green leaves with axiliary clusters of white flowers, which are followed in the Autumn by oliveshaped reddish purple fruit. Is valuable for its adaptation to seaside planting, and is specially recommended for planting in the cities. 1 to 1½ feet, 60c, delivered free.

NAVLET'S 1932 SHRUB BARGAINS

bring unusual values in Shrubs by the dozen. Turn to page 71 for details.

These Evergreens Enrich the Winter Landscape

PINUS (Pine)

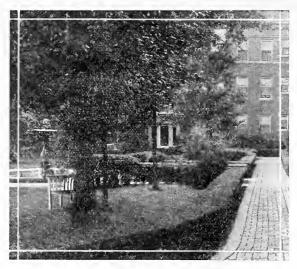

*CANARIENSIS (Canary Island Pine)—(E. T.)—One of the finest. Very striking appearance. Leaves in tufts all over the tree. 2 to 2½ feet, 60c, delivered free; 3 to 4 feet, \$1.50, balled, field grown.

*HALEPENSIS (Aleppo Pine)—
(E. T.)—Rapid grower. Habit spreading. Leaves medium length, yellow-green. Does well any place in California. 1½ to 2 feet, 60c, delivered free; 2 to 3 feet, field grown, \$1.75 each.

*RADIATA (Monterey Pine)—
(E. T.)—Handsome and picturesque tree, growth upright. Very rapid grower. For windbreaks, reforesting, shelter and shade, the Pine has few equals. 2 to 2½ fect, 75c, delivered free; 4 to 5 feet, field grown, \$1.50 each.

grown, \$1.50 each.

PINASTER (Cluster Pine)—(E.
T.)—Grows to 100 feet high,
branches sometimes pendulous forming pyramidal head.
Clusters of short cones. 2 to 3
feef, gallon can, 75c each; 10
for \$7.00, delivered free.

California Privet Hedge

Privet (Liqustrum)

CALIFORNIA (Ovalifolium) — (E. S.)—The most popular hedge plant. Never troubled by insects. 2 to 3 feet, \$1.00 for 10; \$7.50 for 100; 3 to 4 feet, 10 plants for \$1.25; 100 for \$10.00; 4 to 6 feet, per 10, \$1.50; per 100 \$12.50; ten rate on California limit delivered free

OLDEN—(E. S.)—A golden yellow shrub of compact growth. Very showy. Well branched. 2 to 3 feet, 60c each, delivered free; 2½ to 3 feet, field grown, \$1.00 each; 3 to 4 feet, balled, \$1.75 each; 2 feet, field grown, ball shaped, \$2.50 each. *GOLDEN—(E. each.

JAPONICUM—(E. S.)—Japaense Privet, large shrub, very hardy, makes fast growth. Dark glossy green leaves, white flowers. Can be pruned ball or pyramid shape. 3 to 4 feet, 75c; 10 for \$6.50, deliv-ered free.

Effective use of well clipped Privet to enclose an inviting garden retreat.

PITTOSPORUM

CRASSIFOLIUM—(E. S.)—Fast growing variety, glaucous foliage, leaves dark green on one side and pale green on the other. 1½ to 2 feet, 75c each, delivered.

*EUGENOIDES—(E. S.)—A large upright growing shrub with glossy yellowish-green leaves; a very effective shrub. Very desirable for hedges. 1 to 1½ feet, 60c each, delivered free.

NIGRICANS—(E. S.)—A very handsome upright growing shrub. Leaves silvery color and black stems. A very good hedge plant as well as an individual. 1 to 1½ feet, 75c each, delivered free; 2 to 3 feet, field grown, \$1.00.

TOBIRA—(E. S.)—A low-growing shrub with dark green leaves which broaden toward the end; flowers white, fragrant. 1 to 1½ feet, 65c each, delivered.

TOBIRA VARIEGATED—(E. S.)—Variegated form of the Tobira variety. 1 to 1½ feet, 75c each, delivered free.

*UNDULATUM—(E. S.)—Small tree, often called a shrub. Deep green glossy leaves. Fragrant yellowish white flowers. Used very much for a tall hedge. 1 to 1½ feet, 75c each, delivered free.

POMEGRANATE

GRANATUM NANA (Evergreen Pomegranate)—E. S.)—Very showy dwarf shrub with glossy green foliage. Flaming scarlet blossoms and bronze-red fruit. Excellent for small specimens. 1 to 11/2 feet, balled, \$1.50 each.

PYRACANTHA (Burning Bush)

PYRACANIHA (Burning Bush)

*AUGUSTIFOLIA—(E. S.)—Sometimes known as "Cotoneaster Augustifolia." Growth is very spreading. Leaves are narrow. The berries borne in great abundance, are lemon at first, deepening later to ruddy-orange. 1½ to 2 feet, 60c cach, delivered free; 2 to 3 feet, \$1.50, field grown.

*FORMOSIANA—(E. S.)—A compact low growing shrub; foliage quite small and of a good shade of green; berries a bright scarlet red. 2 to 3 feet, \$1.25, field grown, balled.

*LALANDI—(E. S.)—Variety of stronger growth, making longer shoots that can be trained against a wall if desired. Leaves a little longer. Berries orange-yellow. 1 to 2 feet, 60c, delivered free; 2½ to 3 feet, balled \$1.25.

*CRENULATA (Chinese Evergreen Hawthorn)—(S.)—Very distinct from other sorts. Growth is more compact, branches slender, leaves longer, narrow and glossy. New growth very ruddy. Flowers about the same, but berries clear, bright red. It is about the earliest red berry-bearing shrub, as color is fully developed by August. Will endure considerable shade. 2 to 2½ feet, 60c each, delivered free; 2½ to 3 feet, field grown, \$1.25.

*\$1.25.

*YUNNANENSIS—(E. S.)—A vigorous growing variety of recent introduction. Bright glossy foliage and beautiful display of bright coral red berries. 1½ to 2 feet, 60c each, delivered free; 2 to 3 feet, \$1.25, field grown, balled.

RAPHIOLEPSIS

RAPHIOLEPSIS OVATA—Japan, 8 feet. Ornamental shrub with stout upright branches and dark green, lustrous foliage. Leaves thick and bush beautifully compact. Covered in Summer with white flowers, followed by clusters of purple berries in the Autumn. Growth slow. 1 to 1½ feet, gallon cans, 75c each, delivered; 1 to 2 feet, balled, \$1.00 each.

ROSEMARY (Rosmarinus)

S.)—Small Irregular shrub; the foliage is linear. Flowers layender color. Thrives very well in dry soil. 2 to 3 feet, \$1.50, delivered free.

SEQUOIA

SEMPERVIRENS (California Redwood)—(Con. T.)—1 to 1½ feet, 75c each, delivered free; 3 to 4 feet, field grown, \$2.00.
GIGANTEA—(Con. T.)—Giant Sequoia, famous big tree of the Sierras. Grows rapidly, is beautiful at all stages. 1 to 2 feet, in containers, \$1.00, delivered free; 3 to 4 feet, balled, \$2.50 each.

STERCULEA (Bottle Tree)

(E. T.)—Has very large trunk at the base for so small a tree. Will stand extreme heat or cold. Has spotted cream colored leaves. 1 to 1½ feet, 75c each, delivered free; 2 to 3 feet, balled, \$1.25 each.

THUYOPSIS

THUYOPSIS DOLOBRATA VARIEGATA (Variegated Arborvitae)
—(E. S.)—Dwarf plant with flattened front-like branchlets, a
mixture of light green and cream in color. Requires full or
partial shade, with plenty of moisture. A beautiful small plant.
1 to 1½ feet, 75c each, delivered free.

TOYON (Photinia Arbutifolia)

S.)—Christmas berry. Native of California evergreen shrub, bearing brilliant red berries in Winter. 1 to 1½ feet, 60c each, delivered free; 1½ to 2 feet, \$1.00, delivered free.

ULEX

EUROPAEUS (Common Gorse)—(E. S.)—Very stiff, spiny, rapid growing evergreen, 5 to 6 feet in height, producing masses of bright golden flowers in Winter and Spring. 2 to 3 feet, 75c cach, delivered free.

VERONICA

Handsome dwarf shrubs, useful for grouping, borders fore-grounds and for massing at the base of buildings.

ANDERSONII VARIEGATA—(E. S.)—Long foliage and fast growing. Variegated with white; flowers blue, in spikes. 2 to 3 feet, 75c, delivered free.

3 feet, 75c, delivered free.
 *BUXIFOLIA—(Box Leaved Veronica)—(E. S.)—Compact dwarf; foliage small and a glossy green; flowers in spikes one inch long and white. 10-inch spread, 75c, delivered free.

Vines Offer Cool Retreat

with the dappled play of sunshine and shadow

The Boston Ivy cloaks a home with a quiet and austere dignity

BIGNONIA (Trumpet Vine)

TWEEDIANA-Flowers of a beautiful lemon-yellow, as broad as they are long. Evergreen. Tendrils adhere readily to walls; makes a very pretty effect. 25c each; \$2.50 per 12, delivered free.

CLEMATIS

CLEMATIS PANICULATA or Japanese Virgin Flower-A beautiful climber from Japan-that source of so many floral wonders. The flowers are pure white and are borne in great clusters that fairly cover the plant, so that it is as a mass or sheet of fleecy white. 2year old plants, 50c each, postpaid.

swift and heavy growth.

Vines to enclose an inviting sheltered nook, vines to flaunt their gorgeous scarlet in the fall, vines to screen thickly as a protection against unsightly views, vines to cling lovingly against old buildings with their protecting beauty—every home has somewhere a spot that vines would grace. On these two pages you'll find vines for every purpose—evergreen, flowering, and heavy leafy climbers.

All vines are ready for immediate delivery.

AMPELOPSIS

QUINQUEFOLIA (Virginia Creeper)—In the Fall the luxuriant foliage changes to a rich bronze. 3-in. pot 20c each; \$2.00 per doz.; large plants, 50c each, \$5.00 per doz., postpaid.

VEITCHII (Boston Ivy)—One of the finest climbing plants. It grows rapidly and clings without assistance to the smoothest surface. 3-in. pot 20c each; \$2.00 doz.; large plants 35c each; \$3.50 per 12, delivered free.

AUSTRALIAN PEA VINE (Dalichos Lignosus)

One of the prettiest and most graceful ever-blooming vines to be found. A rapid, luxuriant grower. Most desirable ornamental flowering vine for porches, around tall trees or fences; will cover a 25-foot trellis in a season; requires no extra care. The flowers are pea-shaped, rosy lilac; the foliage and leaves are very fine, a great deal like Smilax. 20c per plant; \$2.00 for 12, postpaid.

The Kudzu Vine (below) is spectacular in it

BOUGAINVILLEA

CRIMSON LAKE-Crimson Lake is a name that will never die as long as Bougainvilleas are grown. Wherever shown, this new introduction has created widespread interest and most enthusiastic admiration. The beautifully formed flowers are a glowing red and are produced in great profusion along the branches. Strong, \$1.00 each, postpaid.

SANDERIANA-One of the loveliest climbers in cultivation. They bear peculiarly formed flowers of a beautiful Magenta color in wonderful profusion. The small green leaves are of a beautiful bright olive green shade. Should be given a southern exposure. Strong plants from 4-in. pots 75c each, postpaid; 5-in. pots \$1.00 each, postpaid; 6-in. pots \$2.00 each, delivered free.

The Bougainvillea, like a Gypsy, decks itself in flaming crimson and magenta.

COBEA SCANDENS

Elegant rapid growing climber. Attains a height of 20 to 30 feet in a single season. A prolific bloomer—the flowers being large and bell-shaped. Blue, 25c each, \$2.50 doz., postpaid.

FICUS REPENS

A very handsome evergreen climber. The dark green leaves are very small and cling to stone or wood. 21/1-in. pot 25c; 4-in. pot

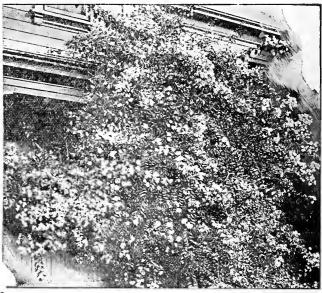

HOP VINE (Hummulus Lupulus)

COMMON-A common but very useful climber. 15c each; \$1.00 per doz., postpaid.

HONEYSUCKLE (Lonicera)

CHINESE-Strong grower; growth is reddish-purple on back of leaves. Flowers white and pink, fragrant. 2-21/2 feet, 35c each; \$3.50 per doz, postpaid.

HALLEANA (Japan)-A strong evergreen, white flowers, changing to yellow; very fragrant; a long, continuous bloomer. $2-2\frac{1}{2}$ feet, 35c each \$3.50 per doz., postpaid.

Sweet Scented Flowering Vines

HARDY ENGLISH-Remains green all the year. 20c each; \$2.00 per doz., postpaid.

KENILWORTH—A rapid grower. The drooping sprays of exquisite foliage are thickly set with lovely flowers. 20c each; \$2.00 per doz., postpaid.

VARIEGATED—The finest of the variegated Ivies. Foliage is mottled with creamy white. 20c each; \$2.00 per doz., postpaid.

JASMINE

OFFICINALIS—Long slender grower, requiring support. The glossy foliage and fragrant white Summer-blooming flowers render the plant very attractive. Very hardy. 1½ to 2 feet, 75c each; \$7.50 per doz., delivered

PRIMULINUM—Rambling and very free-flowering. Large leaves and large flowers. One of the best introductions of recent years. Flowers primrose-yellow, with a darker eye. It blooms in early Spring, the season lasting over two months. Evergreen in the South. 1½ to 2 feet, 75c cach; \$7.50 per doz., delivered free.

KUDZU VINE

PUERARIA THUMBERGIANA—The most rapid growing vine in cultiva-tion, attaining after once being established a height of 50 feet or more in one season. Its foliage is very large and furnishes dense shade. It bears racemes of rosy purple, pea-shaped blossoms. 25c each; \$2.50 per

MADEIRA VINE

The old favorite—Climbing Mignonette. Produces thick, glossy and long hanging stems of feathery white flowers which are strongly and delightfully perfumed. Plant from January to April. Plants 15c each; 75c for 12, postpaid.

MANDEVILLEA

SUAVEOLENS—A very desirable, deciduous climber. A rapid grower and produces clusters of very sweet-scented flowers during the Summer. Remarkable for its long seed pods. Sometimes called Chile Jasmine, due to the fragrance of the flowers. 25c each; \$2.50 per doz., delivered free.

MOONFLOWER (Ipomea)

BONA NEX—Pure White—Flowers from 4 to 6 inches in diameter, are of a beautiful silvery or moon-like whiteness, delightfully perfumed. They open in greatest profusion in the evening and on cloudy days. A Moonflower vine, in full bloom on a moonlight evening in Summer, is one of the most beautiful sights on earth. 15c each; \$1.50 per doz., postpaid.

LEARII (Heavenly Blue)—Habit of growth and flowering the same as the white variety. The color is an exquisite clear, satiny blue. We recommend planting the Blue Moonflower with the White, as the effect will be both novel and attractive. 15c each; \$1.50 per doz., postpaid.

MUEHLENBECKIA COMPLEXA (Maidenhair Vine)

Wistaria and a gracious doorway—and the age-old story, be it North or South!

R a pid-growing twining vine with dark wiry stems and tiny leaves. 20c each; \$1.50 per doz. postpaid.

WISTARIA

A porch or arbor Wistaria covered is a beautiful thing! The masses of frag-rant blossoms so gracefully drooping are a constant de-light. Blue or White, ,\$1.00 each postpaid.

TECOMA RADICANS

This free-blooming climber pro-duces coppery yellow trumpet-shaped flowers in clusters. 35c each; \$3.50 per doz., postpaid.

The Trumpet Vine is an old fashioned favorite.

PASSION VINE (Passiflora)

BLUE—The flowers are of extra large size, of a beautiful blue color. 50c each; extra large plants, 75c each, postpaid.

SHELL PINK—A dainty, exquisite shade. Large flowers and very handsome dark green foliage. 50c each; extra large plants

75c each, postpaid. WHITE—Tinted with lilac light purple corolla. 50c each; cxtra large plants 75c each, postpaid.

PHYSIANTHUS

ALBANS—Bears immense quantities of pure white fragrant flowers in clusters, very much like a single Tuberose. It is well adapted for covering trellises, or for any situation where a climber is required. Succeeds best in the warmest situation. 2 to 3 feet, 35c each; \$3.50 per doz., delivered free.

PLUMBAGO

CAPENSIS—Train as a bush or climber. Beautiful sky-blue flowers. Fine for porches and summer houses. 25c each; \$2.50 per doz., postpaid.
ALBA—Pure white. 35c each; \$3.50 per doz., postpaid.

SMILAX (Medeola Asparagoides)

Indispensable for decoration. Used by all professional florists. 15c each; \$1.50 for 12, postpaid.

SNAIL FLOWER (Phaseolus Caracalla)

Remarkable for its twisted flowers, the appearance of which has induced the popular name, Snail Flower, it is a climber and may be grown out-of-doors, but must be protected in the Winter in districts where the cold is severe. Its flowers are bluish lilac, and are valued by florists for their delicious fragrance. 75c each, nostnaid. postpaid.

SOLANUM (Potato Vine)

JASMINOIDES—Very quick grower. Leaves narrow, dark green. Flowers white, star-shaped, with purple center. Very prolific bloomer. 2 to 3 feet, 75c, delivered free.

SOLLYA (Australian Blue Bell)

HETHEROPHILA—A slender, twining evergreen of much beauty. The leaves are narrow, smooth, of a deep glossy green on the upper surface, and paler beneath. The flowers are deep blue and produced in clusters of from 6 to 10 flowers. 1½ to 2 fcet, 75c each; \$7.50 per doz., delivered free; 3-in. pots 25c; \$2.50 per doz.

VINCA (Periwinkle)

PERIWINKLE—Here is a perennial trailer that is most effective for massing. Has an abundance of Periwinkle blue flowers that bloom season after season. This is the variegated leaf Periwinkle, the prettiest type grown. Plants 75c each, post-

Summer Flowering Bulbs and Roots

AMARYLLIS

BELLADONNA MAJOR—A Summer blooming variety of extremely beautiful silvery-pink sweet-scented Lilies. Shuld be planted early. Mammoth bulbs 20c, by mail 25c; 12 for \$2.00,

planted early. Manmoth bulbs 20c, by mail 23c; 12 for \$2.00, by mail \$2.15.

BELLADONNA MINOR—An Autumn or late blooming variety. Comes in bloom when all other varieties of Amaryllis and Summer blooming flowers have ceased to bloom. The tip of each flower is a dark shell pink, the throat a delicate silver pink. Mammoth bulbs 25c, by mail 30c; 12 for \$2.50, by mail

TUBEROUS-ROOTED BEGONIA

(January delivery, prices postpaid)
We offer Begonias in the following colors:
Orange—Rose—Scarlet—Salmon—White—Yellow
Splendid pot plants; also useful for bedding outside in partial shade, flowering very profusely.
Single: all colors, separate or mixed......Each, 20c; per doz., \$1.50
Double: all colors, separate or mixed.......Each, 25c; per doz., \$2.00

BLEEDING HEART

The beautiful lyre flower—one of the most ornamental of Spring flowering plants, with elegant green foliage and long drooping racemes of heart-shaped flowers. Very hardy. Plant from November to April. Roots 75c each; 12 for \$7.50, postpaid.

CALLA LILIES

TRUE YELLOW CALLA—This rare and beautiful novelty is entirely distinct and unlike all other forms of Yellow Calla. It has the same habit of growth as the white variety. Price 25c each.

each.
WHITE CALLA, or Lily of the Nile—White flowers. Large bulbs,
15c each; \$1.50 per doz. Plant Calla Lily August to March.

CYCLAMEN

The Cyclamen is noted for its richly colored, fragrant flowers and beautifully variegated foliage. Plant from August to March. Selected bulbs 25c each 12 for \$2.50.

BUTTERFLY IRIS

OCHROLEUCA GIGANTEA—Flowers similar, but much larger than the Spanish Iris, and come four to the stalk. Foliage grows to a height of 3 feet. Blooms last 10 days after cutting. Pure canary yellow, 35c each, \$3.50 dozen, postpaid.

Cream white, 25c each, \$2.50 dozen, postpaid.

STYLOSA IRIS

WINTER BLOOMING-In bloom continually from Fall to Spring. Form clumps, with evergreen leaves two feet long. Color a lilac-blue. 15c each, \$1.50 dozen, postpaid.

MONTBRETIA

A Summer flowering bulb, bearing bright colored flowers on long, graceful spikes; foliage is long and graceful, and resembles that of Gladiolus. Large bulbs 12 for 40c; 100 for \$2.50, postpaid. Plant from October to March.

CANNA ROOTS, EXTRA CHOICE

25c per root; 3 for 65c; \$2.50 per dozen, postpaid THE AMBASSADOR—Appropriately referred to as the "Bronze-Leaved President, a wonderfully vigorous free-flowering bril-liant cherry red. 5 feet.

APRICOT-A very attractive Canna, apricot in color.

FIREBIRD-The largest and richest of the red-flowering Cannas. The flowers are born in immense trusses on strong stalks, well above the leaves. Of splendid form—uniformly round and shapely. The petals measure and sometimes exceed 2½ inches across—the color is clear, glistening scarlet without any streaks, spots or blemishes.

MRS. PIERRE S. DUPONT—A gorgeously beautiful Canna of a vivid watermelon-pink; the individual flowers are very large in fine massive trusses; 4 feet high.

STATUE OF LIBERTY-An extremely vigorous grower, bronze foliage and large, orange scarlet flowers, 5 feet high.

YELLOW KING MEDIS—Has the same habit or growth as its parent; foliage a very dark green with flowers measuring 5 to 7 inches across; individual petals 3 to 3½ inches diameter. Color of flower; a deep yellow heavily spotted and blotched with orange.

CANNA ROOTS

15c per root; 3 for 40c; \$1.50 per dozen, postpaid ALLEMANIA-A gorgeous variety, yellow and blood orange.

ALPHONSE BOUVIER-Rich velvety red; green foliage; 5 feet.

MRS. A. F. CONARD—A favorite pink Canna. Unsurpassed for planting either singly or in large beds. The exquisite salmonpink flowers are of giant size and are so freely produced as to keep up a superb showing for months.

MRS. KARL KELSEY—Orange scarlet striped and flaked with golden yellow. Wave-edge petals. Foliage green.

NOKOMIS—Height 5 feet. Large vivid crimson flowers, very attractive, with a rich silky sheen on the petals. Foliage bronze. Superior to any crimson variety yet introduced.

UNCLE SAM—Deep vivid crimson. One of the largest orchid reds. Green foliage. Five to six feet high.

SPECIAL CANNA OFFER

12 Roots \$1.00, postpaid; 6 Roots 60c, postpaid Navlet's Selection in Assorted Colors.

PEONIES

Make a gorgeous display when planted in beds on the lawn or planted singly along a walk or herbaceous border. The roots should be placed so that the crown is covered with two inches of soil. Choice double-flowering pure white, and rose pink, strong roots, 75c each, postpaid; 12 for \$7.50, delivered free. Plant from October to June.

ORIENTAL PODDED IRIS

IRIS FOETIDISSIMA—This unique hardy Iris develops large brown pods which open slowly to reveal rows of bright red berries on a white back ground. Each stalk grows 2 to 5 pods, and may be cut and used in the home indefinitely for winter decoration. 15c each, \$1.00 per dozen.

LILY OF THE VALLEY

12 Large Bulbs for 75c 100 Large Bulbs for \$5.50 Postpaid

Its graceful waxen bells are filled to overflowing with the most delicious perfume, and set among its own glossy green leaves it is indeed the gem of the garden. Fine for flowering in pots in the Winter, but most charming when grown in large patches in partly shaded localities around the lawn or near the borders of streams or lakes.

The Oriental Podded Iris is most effective for interior decorations.

The Lily of the Valley adds an exquisite perfection to shaded garden spots.

The Regal Splendor of Lilies

Lilies succeed best in partial shade. Set bulbs 3 inches below the surface and 12 inches apart. Water only lightly until they are well rooted, but liberally when about to bloom.

German Iris rivals the orchid in delicacy of form and coloring.

GERMAN IRIS

Orchid-like in Beauty

Plant 2 inches deep and about 15 inches apart, in sunny or slightly shaded places.

GORGEOUS, COLORFUL LILIES

LILIUM AURATUM-The Gold-Banded Lily of Japan. The		t Postp	
immense flowers—white, thickly dotted with crimson and beautiful with a wide golden-yellow hand running through the center of each petal—measure nearly a foot in width, and are borne in great clusters	Ea. 25c	Doz. \$2.50	Per 100 \$17.00
LILIUM CANDIDUM—Annunciation or St. Joseph Lily—The well-known garden Lily, with the snow-white, fragrant blossoms. Plant from August to November	35c	3.50	25.00
LILIUM GIGANTEUM—(Late)—Plant sturdy growth, black marked stems. Flowers largest of pure white, longiflorums	25c	2.50	17.00
LILIUM HENRYII—The flowers are a rich apricot yellow with a few brown spots; grows 3 to 5 feet high; very hard and free flowering	35c	3.50	25.00
LILIUM REGALE (The Regal Lily)—Without doubt it is one of the finest and should find a place in every garden. It is vigorous in growth, hardy and thrives best in loam, but will grow anywhere that is well drained. It bears a profusion of funnel-shaped blooms; the outside ribs are brown, shading to pink, then white. The fragrance is delightful. Blooms in July. Plant 8-10 inches deep	25c	2.50	17.00
LILIUM PLATYPHYLLUM—Similar to Auratum, but larger. Especially noted for its broad, lustrous leaves which give double attraction. The petals are studded with crimson chocolate spots	35c	3.50	25.00
LILIUM RUBRUM—Magnificent. White flowers are spotted with red, and have a deep rose band running through the center of each petal	25c	2.50	17.00
LILIUM TIGRINUM—The grandest of the Tiger Lilies. Produces extremely large pyramids of flowers—orange-red, spotted with black. Very showy	25c	2.50	17.00

NAVLET'S SPECIAL IRIS OFFER

Sent Postpaid

RING DOVE—Standards deep lavender to olive lake. Falls lavender, violet shaded at beard to wax yellow. Stalks well branched, growth vigorous. Height 36 inches.

TUNISIE—Standards smoky lavender shaded olive buff. Falls deep violet blue with brown reticulations at haft; late. 24 inches.

EASTER LILIES

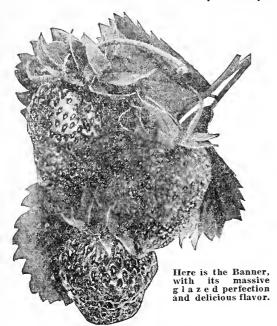

25c each; \$2.50 per doz.; \$17.00 per 100, postpaid 25c each; \$2.50 per doz.; \$17.00 per 100, postpaid LILIUM FORMOSUM — (Early)—The greatest acquisition made in many years. The remarkably short time required to bring them into flower, and the certainty to produce a profusion of blooms, and also the ease with which they can be made to flower at the desired period, such as Christmas, Easter and other special occasions, render them invaluable. The flowers are delightfully fragrant, pure waxy white, of great substance, and if cut as soon as they open, or partially open, they can be kept for two weeks. If planted early will bloom for Easter.

There's a pure perfection in the Easter Lily.

Berries, Ripe and Luscious

Grow to heavy, fruity fragrance on your own sun-warmed vines

THE NEW YOUNGBERRY A Most Prolific Bearer

Mammoth berries, cross between the Loganberry and the Dewberry. Ideal for jelling and canning. Set the plants 4 to 6 feet apart in rows 8 feet apart. 20c each, postpaid; \$1.50 per 10, postpaid; 100 for \$10.00, by express.

BLACKBERRIES

MAMMOTH (or Black Logan)—It is a rapid grower, trailing upon trelises. Canes are large and strong. Foliage large, healthy, thick and a deep green color. Fruit enormously large often reaching 2½ inches in length. Seed small and soft. 25c each; 5 for \$1.00, postpaid.

THORNLESS—(Cory's)—Perfectly Thornless—The Cory Thornless Blackberry grows like the Mammoth Blackberry. It is a rapid grower; canes are large and strong; foliage large, thick and deep green in color; fruit enormously large, very early. Plants 25c each, postpaid; 5 for \$1.00, postpaid.

HIMALAYA GIANT—A late Blackberry, coming after the other berries are gone and ripening over a period of several weeks. Especially desirable for family use. In northern California they are seldom injured by frost, as they blossom after all frosts are over. Must be grown on a trellis—the vines under favorable conditions growing 15 to 20 feet. Berries grow in bunches, are of excellent flavor and the yield is tremendously large. 25c per plant; 5 for \$1.00, postpaid.

LOGANBERRIES

The Wonderful Blackberry-Raspberry-Roots, 25c each; 5 for \$1.00.

GOOSEBERRIES

DOWNING-Fruit pale green, large and juicy. 30c each, 5 for \$1.25, postpaid. CHAMPION—Berries large and brownish red. 30c each; 5 for

\$1.25, postpaid.

CURRANTS

CHERRY—The largest Red Currant in existence. The berries grow in immense clusters, resembling bunches of red grapes. 30c per plant, postpaid; 5 for \$1.25, postpaid.
WHITE GRAPE—This is the hardlest white Currant ever introduced. 30c per plant, postpaid; 5 for \$1.25, postpaid.

DEWBERRIES

LUCRETIA—The Dewberry is a wonderful berry, ripening an immense crop of fruit early. 25c per plant, postpaid; 5 for \$1.00.

Write for quotations on large quantities of any berry.

Berries in the early morning, with the dew still fresh upon them-berries in the cool of evening, ripened to heavy, fruity fullness-berries fresh from the vines for tempting jams and conserves-what a joy to have plenty of berries right in your own back yard! Here are the choicest varieties, strains especially selected for fullness and flavor. And they come to you in prime condition.

BANNER STRAWBERRIES

12 Choice Plants 25c 100 Choice Plants \$2.00 Plants \$15

Wherever Strawberries are grown on the Pacific Coast, there BANNER BER-RIES are the favorite. Berries are of uniformly good size, finely shaped, and of a rich, red color. Because they are such prolific producers, and the vines are of vigorous growth, Banner Berries are preferred by commercial berry growers as well as for home gardens.

MASTODON EVERBEARING (New)—The largest and most productive straw-berry. Berries are large, firm, glossy, brilliant red, sweet and juicy with exquisite aroma. Vigorous, well crowned and deep rooted. Excellent ship-per. Unexcellent for home and commercial use. 12 for 75c; 100 for \$5.00,

OTHER FAVORITE STRAWBERRIES

RENAREE—Superior to any other Raspberry. The berries are a deep, rich crimson in color, delicious flavor and firm. Renaree is the heaviest bearer and bears a fair crop the first year. 20c each, \$1.00 per 10, postpaid.

CUTHBERT—
"The Queen of
the Market"—
A standard,
hardy variety
that endures
northern Winters and southern Summers
equally well.
The berries—a
deen rich deep, rich crimson in color. 15c per plant, postpaid; \$1.00 per 10, \$1.00 per postpaid.

GREGG — Best Plack Variety Black Variet —The cane grow strongly and vigorously, and under good culture are very culture are very productive. Berries are large, covered with heavy bloom, heavy bloom, firm, meaty and of fine flavor. 25c each, postpaid; 10 for \$1.50, postpaid.

Renaree Raspberry

Fruit Trees, Nut Trees, Grape Vines

Fulfill a three-fold mission with their blossoms, shade and harvest

Fruit Trees are a continuous joy, from bursting of the first tender blossom in the Spring, through the cool leafy shade of Summer to the last gathering of the fruity, fragrant harvest. It's as easy to plant Fruit Trees as the ornamentals—and there's three times the satisfaction!

Delivery. Fruit trees will be sent after the first December rains. Where no instructions to the contrary accompany the order, we will substitute varieties if varieties ordered have run out.

Caution. Be careful to unpack stock carefully. Plant at once or carefully cover roots with soil. Keep roots moist—never permit them to become

SPECIAL NOTICE TO PURCHASERS

While we aim to have all our fruit trees to name, and hold ourselves ready, on proper proof, to replace, free of charge, all stock that may prove untrue to label, or to refund amount originally paid by the customer, it is mutually understood and agreed between the purchaser and ourselves that our guarantee of genuineness shall not make us liable for any sum greater than that originally paid us for such stock as may prove untrue. The system recently adopted of selling by Caliper measurement of Fruit Trees is based on the following scale: A tree with a Caliper measurement of 5/16 to 3/8 of an inch is considered the same as a tree 2 to 3 ft.; 3/8 to 1/2 of an inch, 3 to 5 ft.; 1/2 to 11/16 of an inch, the same as 4 to 6 ft. trees.

The letter (S), (F), or (W) indicates that it is a SUMMER, FALL or WINTER variety.

Purchaser to Pay Transportation

GLASS CLOTH

A Cheap Substitute for Glass

Simply tack GLASS CLOTH over your screens to make fine storm doors and windows. Enclose your porch for the Winter by using GLASS CLOTH on light frames. Brings Winter Comfort. Shuts out cold. Ideal for enclosing porches and sleeping porches. Like adding a new room at small cost.

When a garage window—or one in the chicken house breaks, why bother with expensive glass that has to be cut to fit and then puttied in. At only a fraction of the cost and in one-fourth the time, you can mend that window with GLASS CLOTH. Some tacks and a hammer are all you need. Keep a roll around the house for emergencies. Write for circulars.

EVERGREEN—The new non-poisonous spray for Aphis, Thrips and soft-bodied worms. Does not burn tender plants or blossoms. Use 2½ to 5 teaspoonfuls with 2 tablespoonfuls of Whale Oil Soap in 1 gal of water. 1-oz. 35c; 6 ozs., \$1.00; 1-pt., \$2.00; 1-qt., \$3.85, postpaid; 1 gal.,

- FLU-SI DUST—Non-poisonous dust material to control Earwigs, Tree Crickets, Roaches, Ants, Termites, Diabroticus, Beetles, Weevils and leaf-cutting Worms. Do not dust on wet foliage or on fruits. 1-lbs., 60c; 5-lbs., \$1.75, postpaid; 10-lbs., \$3.00; 25-lbs., \$4.20.
- HYDRATED LIME-For Pear and Cherry Slugs as Dust. See page -
- INSECTILIZER—Coarse Tobacco compound, fine for mulching around plants. A repellent for soil insects. 5-lbs., 50c; 12-lbs., \$1.00, postpaid; 50-lbs., \$2.50; 100-lbs., \$4.25.

- K-M-G—The most effective control yet found for wild Morning Glory. Endorsed by all Authorities. Destroys the roots—harmless to the soil. Applied as spray to foliage in the evening. 1-qt., \$1.25; 1-gal., \$2.50; 5-gals., \$6.00. Not mailable.
- NICOTINE SPRAY-Black Leaf 40 and Whale Oil Soap combined. Saves mixing these two materials. For Aphis, Thrips, etc. Use 4 teaspoonful in 1 pint of water. 4-ozs., 35c; 8-ozs., 65c; 16-ozs., \$1.00; 1-gal., \$5.00. Not mailable.
- QUA-SUL—Controls Mildew, Fungus, Peach Leaf Curl and Rust. Use 1 part to 100 parts of water. 8-ozs., 40c; 1-qt., \$1.00, post-paid; 1-gal., \$3.75; 5-gals., \$17.50.
- SUMMER OIL—Kills Mealy Bug, Red Spider and Scale Insects. Safe to use on tender foliage. See Formula on page 83. 1-pt., 45c: 1-qt., 70c, postpaid; 1-gal., \$1.85; 5-gals., \$6.25; 14-gals., \$13.30; 32-gals., \$28.50.
- SEMESAN—Used as a disinfectant for Rots and Diseases of Bulbs. Plants, Seeds and Roots, also for Brown Patch on lawns. 2-oz., 50c; 1-lb., \$2.75; 5-lbs., \$13.00. Not mailable.
- SULPHUR—"Anchor" Brand Dusting and Bleaching Sulphur. Recognized for years as the very best Sublimed Sulphur. Its 100% purity causes it to burn freely without ashes. 3-lbs., 45c; 10-lbs., 85c, postpaid; 100-lbs., \$4.30.
- SULPHUR—"Alpha" Brand mixes freely with water. For Red Spider and Mildew, and for Scab on Apples and Pears use at rate of 5 to 10 lbs. to 100 gals. of water. 3-lbs., 55c; 10-lbs., \$1.10, postpaid; 100-lbs., \$7.00.
- TOBACCO DUST—Fine ground for dusting and use in soil against Sucking Insects. Controls poultry worm. 1-lb., 15c; 2-lbs., 25c; 10-lbs., 90c, postpaid; 100-lbs., \$6.75.
- VOLCK—The year-round garden spray, safe on tender plants for all Scale, Mealy Bugs, Red Spider, etc., on trees, vegetables, plants and shrubs. Prevents Mildew and Rust on Roses. 1-pt., 55c, 50c postpaid; 1-qt., 80c, 90c postpaid; 1-gal., \$2.10, \$2.30 postpaid; 5-gals., \$9.10.
- GARDEN VOLCK—New Nicotine-Volck spray. Safe and effective Use 2 to 3 teaspoonfuls to 1 pint of water. Small size, 35c; on Aphis, Thrips, etc. Preventative against Rust and Mildew. 1-pt., 90c; 1-gal., \$4.85. Not mailable.

PEST CONTROL CHART

To obtain the best results with Spray materials listed below, we have indicated the best time for application, as follows: "D"—Recommends a dormant application during rest period, when deciduous trees are devoid of foliage. "SD"—Recommends a semi-dormant application, when leaf and blossom buds are swelling in the Spring. "F"—Recommends a foliage application during full growth. Dust sprays are applied during full growth, so key initial is omitted.

Quantities are based on one gallon of water. Lesser or greater amounts in the same proportion.

FORMULA "A". 2 tablespoons Navco Whale Oil Soap and either 2½ tablespoons of "Evergreen" or 1½ teaspoons of "Black Leaf 40"; or, 1 tablespoon of "Nicotine Spray"; or, 4 teaspoons of "Garden Volck".

2 tablespoons Navco Whale Oil Soap and either 6 tablespoons of "Sum-

FORMULA "B". 2 tab mer Oil" or "Volck" FORMULA "C". 2 tab mer Oil" or "Volck" 2 tablespoons Navco Whale Oil Soap and either 4 tablespoons of "Sum-

FORMULA "D". 2 tablespoons Navco Whale Oil Soap and either 3 to 4 tablespoons of "Summer Oil" or "Volck" with either 1½ teaspoons of "Black Leaf 40" or 2½ teaspoons of "Evergreen"; or, 4 tablespoons of "Garden Volck". This Formula is an excellent combination garden spray for Aphis and all sucking insects and a preventative against Mildews, Rusts, etc., at the same time.

ANTS in the garden, on plants, shrubs, etc., are carriers of Mealy Bug, Aphis and Scale.

Destroy them in soil with Cyanogas. Dust plants, etc., with Navco Nicotine Dust or spray with Formula "A".

BEETLES-Dust with Navco Nicotine Dust, Navco Arsen-deaux, or "Flu-Si Dust".

BROWN ROT OF APRICOTS, PLUMS AND PRUNES-Navco Home-Mix Bordeaux (D

CANE BLIGHT ON BLACKBERRIES, LOGANBERRIES, RASPBERRIES—Spray with Navco Lime-Sulphur (SD) or with Navco Home-Mix Bordeaux (SD).

CATERPILLARS (Leaf Eating) on Plants and Trees—Dust with Navco Arsen-deaux, or "Flu-Si Dust"; or spray with Navco Home-Mix Bordeaux (SD).

CELERY BLIGHT ON CELERY-Spray with Navco Home-Mix Bordeaux.

CODLING MOTH ON APPLES, PEARS AND QUINCES-Standard Arsenate of Lead or "Flu-Si Dust" (SD and F).

CODLING MOTH ON WALNUTS-Spray with Basic Arsenate of Lead.

CURL LEAF OF PEACHES—Spray with Navco Lime-Sulphur (SD) December 15th, and with Navco Home-Mix Bordeaux (SD) February 15th.

CUT WORMS—Scatter Navco Slug and Snail Destroyer.

EARWIGS—Use "Flu-Si Dust".

FERN LICE AND SCALE—Dip plant frequently in weak solution of "Black Leaf 40" and Navco Whale Oil Soap, "Evergreen" and Whale Oil Soap, or "Garden Volck".

FLEA BEETLE ON TOMATOES—Dust with Navco Arsen-deaux.

GRASSHOPPER IN THE FIELD AND GARDEN—Scatter Navco Slug and Snail Destroyer.

GRASSHOPPER IN THE FIELD AND GARDEN—Scatter Navco Slug and Snail Destroyer.

LEAF MINER ON CINERARIAS AND CHRYSANTHEMUMS—Spray with Formula "A".

LEAF HOPPER on grapes, etc. Dust with Cyanogas when foliage is dry.

MEALY BUG ON GARDEN AND GREENHOUSE PLANTS, SHRUBS, GRAPES, PEARS—Formula "B".

MEALY PLUM LOUSE ON PRUNES AND PLUMS—Formula "A" or "D".

MILDEW ON APPLES, BEANS, CURRANTS, DAHLIAS, DELPHINIUM, GOOSEBERRIES, GRAPES, LETTUCE, PEACHES, PEAS—Neutral Brand Dusting Sulphur, or spray with Qua-Sul.

MILDEW ON CUCUMBERS, MELONS, SHRUBS, ONIONS—Navco Home-Mix Bordeaux.

MILDEW ON ROSES—Spray with Navco Home-Mix Bordeaux (D) or with Navco Lime-Sulphur (D) before growth starts in Spring. Dust with Neutral Brand Dusting Sulphur repeatedly as new shoots appear, or spray with Qua-Sul, or Formula "C" or "D". Irrigate in morning, keep water off foliage. Fertilize for strength.

MORNING GLORY—Use K. M. G.

PEACH TWIG BORER ON APRICOTS, NECTARINES, PEACHES, PLUMS, PRUNES—Spray with Navco Home-Mix Bordeaux (D) before December 15th.

PEACH TWIG BORER ON APRICOTS, NECTARINES, PEACHES, PLUMS PRUNES—PEACHES, PLUMS PRUNES—PEACHES PLUMS PRUNES—PEACHE

Paradichlor.

PEACH TWIG BORER ON APRICOTS, NECTARINES, PEACHES, PLUMS, PRUNES—Spray with Basic Arsenate of Lead (SD).

RED BERRY on blackberries, raspberries, etc. Dust with Neutral Brand Dusting Sulphur. Spray with Qua-Sul, Lime-Sulphur or Formula "C".

RED SPIDER—Dust with Neutral Dusting Sulphur. Spray with Formula "C". Dormant Spray with Navco Miscible Oil in deciduous trees will destroy eggs.

ROSE SCALE ON BUSH BERRIES, ROSES—Spray with Formula "B".

ROT OF BULBS, CORNS, ROOTS AND TUBERS—Use Semesan.

RUST ON ASPARAGUS AND BEANS—Dust with Neutral Brand Dusting Sulphur.

RUST ON ROSES, SNAPDRAGONS AND HOLLYHOCKS—Spray with Alfa Brand Wettable Sulphur, Qua-Sul, or Formula "D", also fertilize and water freely to promote healthy growth.

SCALE ON DECIDUOUS AND NUT TREES—Navco Miscible Oil (D), or Formula "B"

SCALE ON DECIDUOUS AND NUT TREES—Navco Miscible Oil (D), or Formula "B"

SCALE ON SHRUBS, CITRUS TREES, DECIDUOUS AND NUT TREES IN SUMMER-Formula "B".

SCALE ON SHRUBS, CITRUS TREES, BECIDOUS AND NOT TREES IN SUMMER-Formula "B".

SLUGS ON CHERRIES AND PEARS—Dust with Hydrated Lime or Navco Nicotine Dust. SLUGS AND SNAILS IN THE GARDEN AND ON LAWNS—Scatter Navco Slug and Snail Destroyer.

SOW-BUGS IN THE GARDEN AND ON LAWNS—Scatter Navco Sow-bug Destroyer. TERMITAS—Use "Flu-Si Dust".

SQUASH BUGS—Dust with Navco Arsen-deaux or "Flu-Si Dust".

THRIPS—Dust with Navco Nicotine, or spray with Formula "A".

WEEDS IN DRIVEWAYS, WALKS, YARDS, TENNIS COURTS, CURBS and all places where the ground is to be kept clear of plant life—Spray with Navco Weed Destroyer. Do not apply on lawns.

WEEDS in lawns. Spray with "Soiliron" for dandelion and broad leaved weeds. Fertilize frequently with "Ammo-Phos" or Sulphate of Ammonia.

WIREWORMS in soil. Use "Cyanogas".

WEEVIL on vegetables, etc. Dust with "Flu-Si Dust".

WOOLLY APHIS ON ROOTS AND BRANCHES OF FRUIT TREES—Spray with Formula "D". Spray uncovered crowns and mains roots with Navco Miscible Oil (D). Treat with Navco Paradichlor during Summer months.

Aphis

Alphis suck sap from the leaves and terminal shoots, caus-ing leaves to curl and checking growth,

Rust

Appears as rusty reddish brown out-breaks. About breaks. About size of pinhead, chiefly on under side of leaves.

Cherry or Pear Slug

Leaves eat away the green tissue from un-der side of leaf.

Mildew

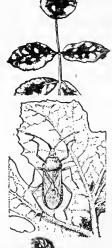

Develops a white powder or cobwed growth on the young leaves, which become more or less distorted. Occasionally blasts blossoms of certain varie-

Squash Slug

A brown bug 34 inch in length. Sucks the sap from the under side leaves, cau them to under side of causing them tand die. wilt

Bettles

Adults and larvae devour the foliage.

Fertilizers and Soil Correctives

NOTE: To simplify measuring out fertilizers, a one-pound baking soda or similar can will hold about an equal weight of fertilizer. To obtain the best results in using plant foods it is well to alternate between the Chemical and Organic Types and to use "Groz-It" at least once a year in order to introduce the essential beneficial bacteria into the soil. "Gaviota" Garden and Lawn and "Loma" contain both Chemical and Organic Plant Foods. Bloodmeal and Bonemeal are Organic. Nitrate of Soda, "Ammo-Phos," Sulphate of Ammonia and "Vigoro" are Chemical.

ADCO—You must have manure and thanks to ADCO you can have quantities of it. You can turn every bit of vegetable refuse—cuttings, weeds, leaves, etc., from the garden, straw and cornstalks from the farm, into rich manure by the simple ADCO Process. Information free. 25 lbs., \$2.25. Makes ½ ton of manure. \$11.00 for 150 lbs. Makes 3 tons of manure. Use 1 lb. of Adco to every 4 cubic feet of debris. All prices are charges collect.

ALUMINUM SULPHATE—Makes Alkaline and Neutral Soils Acid. Valuable and necessary for Rhododendrons, Heathers, and other acid-loving plants. Apply 1 to 2 tablespoonfuls to the plant according to size, several times a year. 1 lb. 15c, 20c, postpaid; 5 lbs. 50c, 60c, postpaid; 5 lbs. 50c, 60c, postpaid.

contains 16% Nitrogen and 20% Phosphoric Acid. Unexcelled for run-down lawns, vegfetables, fruit trees, berries, vines, etc.

The Universal Ferniuzer One tablespoonful will fertilize 3 feet of row. For fruit trees, use 2 to 10 lbs. per tree. On lawns use ½ lb. to 100 square feet dissolved in 4 gals. of water. 3 lbs. 50c; 5 lbs. 75c, postpaid; 10 lbs. \$1.25, \$1.50, postpaid; 25 lbs. \$2.50; 50 lbs. \$3.50; 125 lbs. \$7.75, charges collect.

BLOODMEAL (Dried)—Contains 12-13% Nitrogen. One pound will fertilize 70 sq. ft. 10 lbs. 75c, postpaid; 25 lbs. \$1.50; 50 lbs. \$3.50; 100 lbs. \$5.00, charges collect.

\$3.50; 100 lbs. \$5.00, charges collect.

BONEMEAL (Steamed)—Contains approximately 3½% Nitrogen, 8% Phosphoric Acid. Fine for all garden purposes. Slow in action, so must be used at planting time for best results. 1 lb. will fertilize 25 sq. ft. 5 lbs. 35c, 45c, postpaid; 10 lbs. 60c; 25 lbs. \$1.00; 50 lbs. \$1.75; 100 lbs. \$3.25, charges collect.

CALCIUM SULPHATE—Agricultural Gypsum. Best known material for breaking up adobe and sticky soils which bake and crack when dry. No action on soil acidity. Use 4 lbs. to 100 sq. ft. 20 lbs. 50c; 100 lbs. \$1.50, charges collect.

"GAVIOTA" GARDEN AND LAWN—Contains 6% Nitrogen, 8% Phosphoric Acid 6% Potash. Fine for general garden use. 4 to 5 lbs. will fertilize 100 sq. ft. of lawn or garden. 4 to 8 tablespoonfuls to a rose bush. 25 lbs. \$1.65; 50 lbs. \$2.75; 100 lbs. \$5.00, charges collect.

spoonfuls to a rose bush. 25 lbs. \$1.65; 50 lbs. \$2.75; 100 lbs. \$5.00, charges collect.

"GROZ-IT"—Contains 1.84 Nitrogen, 0.75 Phosphoric Acid, 3.00 Potash. Concentrated pulverized natural Sheep Manure, in paper-lined sacks, clean, odorless and free of weed seeds and foreign matter. Should not be confused with other Sheep Manures as it is specially processed. Use 1 lb. to 4 sq. ft. on lawns and flower beds. Soak 2 lbs. in 5 gals. of water and water weekly with liquid for finer and larger sweet peas, pansies, etc. 5 lbs. 25c; 10 lbs. 45c, postpaid; 25 lbs. 75c; 50 lbs. \$1.25; 100 lbs. \$2.25; 300 lbs. \$6.25; 500 lbs. \$10.00; 1,000 lbs. \$17.50, charges collect.

LAWN SPRINKLERS

Ready Shower

The Whirling Shower is an adjustable and variable lawn sprinkler of the revolving type. Equipped with bronze roller-bearings. Ma-chined nozzles are adjustable for both volume of spray and distance, allowing a coverage of from 10 to 70 feet ln diameter. Brass lock holds arms stationary for beds and garden plots. \$2.75 each, \$3.00 postpaid.

The Revolvo, like the Whirling Shower, has seamless brass cross arm and shaft, unbreakable malleable base and bronze roller bearings eliminating all friction. It will cover an area of from 40 to 50 feet in diameter. \$1.75 each; \$2.00. postnaid. \$2.00, postpaid.

The Ready Shower is a stationary lawn sprink-ler for small lawns, flowler for small lawns, flower beds and borders. The volume of spray and area may be regulated by adjusting pressure. Rustless heavy brass spray plate. 75c each; 90c, postpaid LEAF MOLD—For potting and garden soil mixtures. 3 lbs. 20c, 30c, postpaid; 10 lbs. 45c, 60c, postpaid; gunny-sack full, \$1.00,

LEAF MOLD—For potting and garden soil mixtures. 3 lbs. 20c, 30c, postpaid; 10 lbs. 45c, 60c, postpaid; gunny-sack full, \$1.00, \$1.50, postpaid; 10 lbs. 45c, 60c, postpaid; gunny-sack full, \$1.00, \$1.50, postpaid; 20 lbs. 45c, postpaid; yearly application desirable about lime-loving plants. Do not use on lawns as lime encourages weeds. Calcium-sulphate better for breaking-up adobe soils. 100 lbs. \$1.50, charges collect. LIME—Hydrated—This form used mostly for dusting on foliage against leaf-eating slugs, and with Acid Arsenate of Lead on tender foliage. 3 lbs. 15c; 10 lbs. 45c, postpaid; 50 lbs. \$1.00, charges collect.

LOMA—This scientifically-prepared plant food will give results that are startling. Lawns velvety green; flowering plants sturdy, full-bloomed and tall; vegetables such as you have never had before. Contains 5% Nitrogen, 10% Phosphoric Acid, 4% Potash. Colorless, clean and free of weed seeds. Use 4 to 5 lbs. up to 100 sq. feet, on lawns, flower and vegetable beds. Loma works quickly. In a week's time you can see the difference. 1 lb. 25c, 30c, postpaid; 5 lbs. 75c, 90c, postpaid; 10 lbs. \$1.25, \$1.50, postpaid; 25 lbs. \$2.35; 50 lbs. \$4.25; 100 lbs. \$7.00, charges collect.

NITRATE OF SODA—Contains 15% Nitrogen, for forcing only. Use 1 tablespoonful in 1 gal. of water. 3 lbs. 25c; 10 lbs. 75c; 25 lbs. \$1.25; 100 lbs. \$4.25, express collect.

PEAT (German)—Very best grade granulated, breaks up easily in the hand. Odorless and clean, free from weed seeds and fungus. Indispensible in potting and soil mixture, as mulch and top dressing on lawns and garden beds to retain moisture, and to provide acid condition like by Rhododendons, Azaleas and Heathers. Invaluable for breaking up and aerating adobe soils. 5 lbs. 55c; 10 lbs. 75c, postpaid; ½ bale, \$2.00; full large bale (approximately 165 lbs.), \$3.50, charges collect.

"STIM-U-PLAN"—Every lover of thrifty potted plants should use this complete plant food. Contains 11% Nitrogen, 12% Phosphoric Acid, 15% Potash. In convenient tablet form. 30 tablets 25c

Contains 4% Nitrogen, 12%
Phosphoric Acid, 4% Potash.
Scientifically prepared to furnish right kind of nourishment to lawns and flower beds. Use 4 lbs. to 100 sq. ft.
Apply at regular intervals. 5
charges collect.

Contains 4% Nitrogen, 12%
Phosphoric Acid, 4% Potash.
Scientifically prepared to furnish right kind of nourishment to lawns and flower beds. Use 4 lbs. to 100 sq. ft.
Apply at regular intervals. 5
S2.00; 50 lbs. \$3.75; 100 lbs. \$6.00,

ORCHARD AND GARDEN SUPPLIES TREE SEAL

A grafting, in-arching, or pruning compound.

Pint, 35c; by mail 45c Quart, 60c; by mail 75c
Gallon, \$1.80; by mail \$2.10

GRAFTING WAX

Should be used in a liquid form—with a little heat it soon melts. ¼ lb. 20c each; ½ lb. 30c each; 1 lb. 50c; each, postpaid; 1 gal. \$2.00, express collect.

PRUNING COMPOUND

For use after pruning or tree surgery. A cut made in a tree of any size, should be properly covered with Pruning Compound to prevent the tree from "bleeding." Pint, 40c; quart can, 60c, postpaid.

TREE PROTECTORS

	Made	of Yucca, v	vith wire	faste	ners.	
Length	Per 100	Per 1000	Len	gth	Per 10	0 Per 1000
12-in	\$1.30	\$11.75	18-ir	n	\$1.70	\$15.25

rata chinned	fraight	or evnress	collect			

TREE TANGLEFOOT

Apply directly to bark of trees. Tanglefoot protects them against Ants and Climbing insect Pests. One pound will spread 8 feet by 5 inches wide. Lb. can, 60c, postpaid; 5 lb. can, \$2.75; 10 lb. can, \$5.25, postpaid.

Navlet's Planter's Guide

A Handy Reference Guide, Telling You What, When and How to Plant

Here are 8 pages of Garden Information that we have tried to make as complete, as practical and as helpful as we can. You'll find here garden calendars for Flower and Vegetable seeds, telling you when to plant. You'll find much valuable information regarding soil, planting locations, sowing of seed, special cultivation problems, and the answers to many of your garden problems. If you do not find the information you wish, do not hesitate to write us. We conduct correspondence in French, German, Spanish, Italian and Portuguese. We will be only too glad to answer your garden questions.

> This guide is intended for California conditions, but can be used for northern states by making suitable allowance for difference in climate. Usually planting should be done a few weeks later in the north.

PLANNING YOUR GARDEN

In planning the flower garden it is well to bear in mind the fact that we intend our garden for year round pleasure. Many home gardeners permit their enthusiasms for particular types of flowers to run away with them, and consequently fall into the error of developing a garden that has only a brief seasonal charm. Some, for example, confine themselves to a spring garden, with tulips, narcissus, iris and various rock plants predominating. Others specialize in dahlias or gladioli, which are at their best in the summer months, while still others will feature chrysanthemums, which are at their best in October. If all the plants in the garden bloom in the same season, however, the garden is apt to be uninteresting during the rest of the year. For this reason, there is a tendency even among the people who have a hobby, to diversify their plantings so that there will be blooms during a large part of the year. In most locations in California it is possible to have some color in the garden every month in the year.

In a year-round garden, there will probably be a perennial bor-In a year-round garden, there will probably be a perennial border that has several distinct flushes of bloom, and possibly there will be a change in the prevailing color with each separate blooming period. Modern landscape designers often favor such planning of gardens. A green lawn or ground cover, a garden pool with its interesting water plants, green shrubs and trees in the background, vines and climbing roses on the fences and trellises, ornamental gates, and garden furniture of good taste give a permanency to the garden which is lacking where a single kind of flower is grown.

The spring months in the garden will feature the spring bulbs, the flowering trees, the primroses and other early herbaceous plants. A little later will come delphinium, Transvaal daisy, pyrethrum, ixias, early gladiolus, perennial scabiosa, campanulas, etc., followed by the main season gladiolus and a host of other popular annuals and perennials in a wide range of colorings. Dahlias are at their best in July, August and September, chrysanthemums in October, and the berried shrubs take care of the winter months with the help of a few occasional flowers.

winter months with the help of a few occasional flowers.

It is easy, with a little forethought, to plan the garden so there will be flowers to fill in the bare spots in each month of the year, except, perhaps, during the winter. For example, just as the irises are past their bloom, or when the daffodils and tulips have past their prime, the little Virginia stocks can be planted around the bulbs to pick up the thread of color and carry it on into the summer months. These Virginia stocks take only six to eight weeks to begin blooming from seed sown broadcast and watered well. Again, some of the bulbs like gladiolus may be planted at different times to extend the season of bloom. Sweet peas have a rather long season of bloom. Just these few examples suggest the possibilities of even the modest home garden. Certainly most California gardens can have color in practically every month of the year at no great expense.

PLANTING FOR EFFECT

Beginners in home floriculture often have to be satisfied for the Beginners in home floriculture often have to be satisfied for the time being with annuals which give a quick effect. Such annuals are usually inexpensive. Tall annuals for grouping in the background and climbing vines for growing about the buildings are a wise choice. In front of the tall annuals may be placed a perennial border of plants which will give a quick effect. The bedding annuals or low edging biennials and perennials are well adapted for planting near garden walks. A few shrubs which give a quick effect may be planted along with the annuals and herbaceous perennials baceous perennials.

But as quickly as possible, home gardeners should plan for permanent effects in the garden. Deciduous flowering shrubs and

trees, deciduous flowering climbers and trailing plants, broad leaved evergreens for flowers and berries, evergreen flowering vine and trailers, and occasionally some of the yuccas, grasses and large succulents may be used to secure these effects.

PLANTS FOR SPECIAL LOCATIONS

The flower grower usually finds that he must select plants for a particular environment. Possibly he may need herbaceous plants or shrubs for shade with plenty of moisture. In other parts of the garden there may be a need for plants which will tolerate a hot sun. These sun loving plants may require considerable moisture in some instances, but in many cases the plants for sunny situations are drought-resistant. Only in a few cases will a drouth-resistant plant be unable to stand a hot sun.

Gardeners have a tendency to become specialists. After working to establish a permanent garden, they often wish to build special kinds of gardens. Rock gardening has recently become very popular and has greatly increased the demand for rock garden plants of both desert and alpine types. More people are building lily pools in their gardens than ever before, and this development has increased the need for acquatic and bog plants.

For those who cannot have full size gardens, there are many delightful garden possibilities in hanging baskets, window boxes, and bowls or portable gardens. Many of the succulents (see p. 54) are adapted to small portable gardens or miniature plantings.

flowers are frequently planted with a utility value in the home. Herbaceous or perennial plants may be chosen for their fragrance. Flowering plants are very fre-quently selected for their value in supplying cut flowers for the house, as well as for the flash of color in the garden. It is well to keep these various purposes in mind in planning the planting.

THE ANNUALS

Annuals are ornamental plants producing seed and coming into maturity the year in which the seeds are sown. They are not necessarily annual in their duration, in the sense of dying and completing their cycle within twelve months.

For quick effects, the annuals are most valuable, and for that reason they are usually planted in considerable abundance in the newer gardens. Too, the annuals give opportunity for variety in the garden from year to year, as compared with the greater permanence of shrubs and perennials.

The annuals are of easy propagation, being grown from seeds of the previous year. Whether the seeds should be started incors depends on the region, the species, the season in which bloom is desired. Small delicate seeds should be started under cover for protection from beating rains and winds, whatever the region, north or south. Very few annuals bloom continuously from early to late. The best results are obtained by repeated sowings at Intervals. The seedlings should be transplanted before they crowd in the boxes.

Listings of annual plants will be found in this Catalogue on pp. 55 to 57. Flower seeds, both annual and perennial, are listed on pp. 26 to 40.

Planter's Guide (continued)

THE PERENNIALS

For permanent effects in the garden, the flower lover looks to the perennials. $\,$

Perennials are herbaceous plants that live three years or more. Many of the herbaceous perennials propagate from off-sets and divisible parts. Most of the herbaceous perennials propagates readily by means of seeds. The Larkspur, Campanula, Golden Rods, Chrysanthemums, and many others, may be grown easily from seeds sown in the open ground in Spring. It is preferable to raise the seedlings in boxes or beds and transplant in Autumn or Spring to permanent quarters. Seeds of many perennials, particularly those borne in fleshy capsules or berries, do not grow until they pass the Winter's frost, and some will not germinate until the second Spring. With most herbaceous perennials, the best bloom is obtained with young plants; after the second bloom the plants may begin to fall or to become root-bound. We encourage the practice of growing perennials from seed.

Perennial plants are listed on pp. 58 to 63, with Flower Seeds on pp. 26 to 40.

CHOOSING ROSES

A home garden is hardly complete without a few Roses. Some home gardeners add at least one new Rose a year. The interest thus sustained makes home gardening a renewed pleasure. Roses do require fertilizing, pest control, and careful pruning, but few garden plants give more garden color or more cut flowers for the home.

The selection of rose varieties is largely based on the tastes of the grower, although some roses seem to be universally liked. But many of the excellent old roses of twenty-five or thirty years ago have been largely discarded because gardeners are continually on the search for something new. This explains why varieties now popular are seldom over five to ten years old. Hundreds of new roses are being introduced each year. Many of these will fall by the wayside as being inferior in doubleness, resistance to mildew, strength of necks, shape and color, or in one or more of the other essential points.

A rose that blooms a long time, is vigorous in habit practically free from mildew, resistant to aphis, with attractive foliage, a long pointed bud that holds its shape well, maturing into a flower pleasing in color and not too single (except where entirely single), will most likely remain popular. Some roses fade, or are too variable to be desirebl. Many climbing roses have been developed from bush roses. Some of these fail to retain their climbing habits, or do not climb readily, while others are very dependable. Caution, therefore, is needed to avovid mistakes in choosing new varieties.

CALIFORNIA SOILS

There are two kinds of soil in California. One is the raw soil that packs so hard that vegetation cannot take root. The other soil is as pliable as sand, and ought to grow anything, but will not. They need life (humus), and there is nothing better to put life into soil than to ploy under a green manuring crop at the right time, and to thoroughly air the soil by cultivation.

For your garden gather weeds, leaves, etc. Put them in a pile to rot. This will add humus. For the field, grow vetch, melilotus, or horse beans during the Winter months, and in the spring plant cow peas. All these crops will furnish feed for the stock as well as humus to the soil. Cover crops for green manuring should be plowed under a month before planting and before sowing any seed the field should be thoroughly irrigated and cultivated. If this is not done a dry crust will form over the humus.

SIX GARDEN RULES

- 1—Do not plant close; give vegetables enough room to grow.
- 2-Have soil good and moist when planting.
- 3-Irrigation is always preferable over sprinkling.
- 4—Cultivation as soon as possible following irrigation is essential.
- $5\mbox{--}{\rm Try}$ to keep all growing stock growing continuously; a check in growth almost equals a failure.
- 6-Always have ground good and wet where you transplant any plant to permanent location.

HOW TO SOW

Preparing the Soil.—To grow well, a plant requires a deep, mellow, moist soil, supplied with the right amount of air, heat, and available plant food. An important step, then, in the successful growing of vegetables is to prepare the soil in such a way that it will be congenial to the best root growth. The soil for trucks crosp is a rich, sandy loam—a soil containing varying proportions of clay, sand and organic matter. A good garden soil can be made in most back yards by intelligent management and an application of two pounds each of Toro Sulphur and lime to every 100 square feet.

In a deep, mellow soil, the plants grow more quickly, since larger root systems can be developed and more food and moisture absorbed. A deep, mellow soil affords a larger reservoir to hold rain needed during the droughts that come in the growing season. Such a soil is warmer and contains air needed for the growing roots and for the bacteria that cause decay of organic matter or gather nitrogen from the soil air.

Clay is easily injured by tilling when it is not in the right condition. If worked too wet, the particles all slide together into a compact mass. On the other hand, if worked too dry, the clods are hard to break. When clay soil is in the right condition to work it will crumble apart if squeezed in the hand. If it sticks together it is too wet. Clay soil should never be worked when it is wet, not even with a hoe. Calcium Sulphate will help very materially to break up this type of soil.

materially to break up this type of soil.

Seeds in the Open.—Seeds of hardy annuals may be sown directly in the bed where they are to remain. Have the ground well worked up and mixed with Humus if needed. The soil should be well moistened, not wet and soggy, and not, by any means, dry when the seeds are sown. Put all medium-sized seeds at a depth of one-quarter to one-half inch. Sweet Peas should go deeper. Very fine seed should be pressed into the soil and a little sand or Peat (see page 83) sifted over them. Water more frequently if the seed is close to the surface, and if necessary protect them with cheese cloth while watering. These seeds are best sown in the open, so as not to be transplanted: Eschscholtzia, Nasturtium, Poppy. If the seed be sown directly in the garden, it should be sown in the Spring after the soil is well worked and when in moist condition. When up, the plants must be thinned from two to twelve inches, depending on the variety, otherwise they will be weak and spindling.

Seeds in Boyes.—Always use care in getting a good loam as

Seeds in Boxes.—Always use care in getting a good loam as described above. Use no manure in any seed bed. Boxes 4 inches deep and 18x24 inches are the usual size. See that good drainage is provided by boring holes in the bottom; fill with the fine prepared soil, which should be moist but not wet enough to stick together when squeezed with the hand. Sow the seed about one-quarter inch deep, except fine seeds. Water so as to keep the soil always just moist. Water carefully and regularly. A pane of glass over the box adds more heat, protects from draught, prevents drying out and is not necessary except for difficult seeds. The box should be in the sunlight. When the plants are in third or fourth leaf they should be pricked out and reset in another box with plenty of room, for it is important that the plant be of good size, strong and sturdy, when finally transplanted in the garden.

MAKING A HOT-BED

Good hot-beds can be made by digging down about three feet and filling the excavation with rather fresh horse manuere in which there is a good deal of bedding straw. About 18 inches of this nanure is sufficient and then fill in on top with about one foot of good soil mixed with sand. This manure pile will be compressed and will soon begin to ferment and will then keep the top soil warm and cause the seed to sprout quickly and the young plants will grow very fast.

It is best to enclose the hot-bed with boards, making what is called a cold-frame. This is done by running the length of the bed east and west and by making the north side about two feet high and the south side not more than six inches. The ends also should be enclosed and a sash of glass should be huung on hinges at the highest end. This sash should be raised for ventilation during most of the day, since the bed gets very warm and the atmosphere very close if kept tightly closed for too long a time. As the plants grow, the sash should be left up longer each day to harden them and prepare them for final transplanting.

The hot-bed should have a very sunny location near a hedge or some building, well protected from the prevailing wind.

The object of the cold-frame is to make an artificial heat, and to protect the plants from frost during the Winter. Seed may be started at any time during the Winter, and the plants can be ready to set out just as soon as danger of frost is over.

As the sun gets too hot it is necessary to shade the bed and the glass should be whitewashed or covered with sacking if necessary. Too much heat is fatal to the tender young plants.

How to Grow DAHLIAS, ROSES, CARNATIONS, CHRYSANTHEMUMS, BERRIES, GRAPES

BLACKBERRIES, RASPBERRIES, ETC.

ENCOURAGE NEW GROWTH—Each year, after the leaves have fallen, and have left the canes bare, cut off the canes that have fruited during the summer so they will be level with the surface of the ground, then new canes will sprout out. Allow to remain for the coming season. After they have grown, prune off or pinch the tips of each cane to force out the laterals (side branches). It is the new growth that produces the choicest fruit. If you intend to tie the canes to the control of the canes to the can

fruit.

If you intend to tie the canes to stakes or a trellis, let the plant attain a height of 5 to 6 feet before pinching or pruning off the tips of the new cane growth. If you intend to teach plants to stand alone, pinch off the tips when 2 to 4 feet high.

REMOVE OLD CANE—All old cane and other debris should be removed from the rows after pruning. Blackberries require a rich ground, and plenty of well-rotted stable manure or compost should be applied as soon as the patch is cleaned up. Blackberries should be planted in rows from 6 to 8 feet apart, and the plants 3 feet apart in each row, as they have a constant tendency to spread themselves in the rows.

CURRANTS AND GOOSEBERRIES

EASY TO GROW—Culture of Currants and Gooseberries consists in cleaning them of the dead wood in Winter and thinning he new shoots in the spring, as may be desired. They should be grown in rows from 5 to 6 feet apart, and the plants should be planted in rows 2 to 3 feet apart. For mildew use sulphur. Treatment of the soil is the same as for Blackberries.

STRAWBERRY CULTURE

FOR BEST SUCCESS—The ground should be prepared by digging or plowing about 12 inches deep. The soil should be well inriched with thoroughly rotted stable manure or ground bone, or my other good fertilizer, and worked thoroughly in the soil. Make the beds about 3 feet wide, so as to accommodate 3 rows of blants. The plants should be set 15 inches apart each way. Don't allow runner plants to set closer than 4 inches after the plants begin to send out runners.

The plants must have ample room to build up. Keep the soil round young plants well loosened and never allow the soil to get lard around the young plants. Hoe often.

HOW TO GROW GRAPES

HOW TO GROW GRAPES

SOILS FOR THE GRAPE—Grape Vines will thrive in almost my soil that is fertile.

DISTANCE OF PLANTING—Plant 8 to 10 feet apart. If for asisins and you want to dry the grapes on trays in the fields, hen plant vines 4½ feet in rows, and rows 11 feet apart; double eam can be used for cultivating when planted this way.

In planting great care should be taken; the holes should be arefully dug. If the ground is dry, pour water in the hole; horoughly soak. Before planting, all dead or injured roots should be trimmed. Plant from December to March.

STAKING—In autumn or winter following the planting the ines should be staked either before or after pruning; in any ase, some time before the buds start in the spring.

The stakes used depend on the variety of the vine and method f pruning to be ultimately adopted.

Good strong stakes, about 5 to 6 feet long, and 1¾ to 2 inches quare should be used, and driven far enough into the ground, t least two feet, so they will stay firm and prevent them from lening loosened by the force of the wind on the vine, which is tied to the stake. The stake should extend 2 or 3 inches above the leight at which the vine is intended to head. The stakes should extend 2 to 2 inches from the vine on the side opposite to the revailing heavy winds.

PRUNING THE VINE—The vines may be pruned at any time fter the leaves have fallen. All the canes are removed entirely xcept the strongest, and these are cut back to two buds from the boint and the canes tied to the stake. It is very important that hese canes should be straight. The top cut is made through the und.

DISEASE OF THE VINE—One of the most prevalent diseases

hese canes should be straight. The top cut is made through the disc.

DISEASE OF THE VINE—One of the most prevalent diseases f the vine in California is caused by fungus, which affects leaves, anes and berries, and which is locally known as "Mildew." This isease is recognized by grayish white coloring of the affected eaves, which, as the disease progresses, shrivel and dry up. The oung cane also blackens and dies, and the individual grapes how whitish patches, which become darker colored and they rack open. The usual remedy is finely ground sulphur; apply everal times during the season.

CARNATION CULTIVATION

Carnations will thrive in almost any soil. Use one-quarter of ecayed manure worked well into the soil 12 inches deep. The oung plants should not be set out any closer than 2 feet. Press he soil firmly around the roots so as not to allow air to reach he roots; water freely. Mulch or cover the ground with a layer f decayed manure from 1 to 2 inches thick. This application will eep the soils moist and prevent the hot sun from injuring the

THIS IS IMPORTANT—Stopping the growth of the young plants by pinching off the leading shoots is one of the most important operations connected with Carnation culture. By stopping the shoots the result is to produce a greater number of growths and make a bushy plant.

To get the largest blooms and long stems you should pinch off all the buds except the leading top bud.

The best time to water Carnations is in the morning.

TIME TO PLANT—The best time to plant Carnations is from November to June, although they can be planted all the year round. Carnation plants generally become exhausted in two years and should be replenished.

CHRYSANTHEMUM CULTIVATION

HOW TO PLANT—Chrysanthemums are one of the easiest plants to grow. They thrive in almost any soil, and require a sunny exposure.

sunny exposure.

To prepare the soil, use one-quarter of decayed manure and work it in thoroughly about 12 inches deep. The young plants should be set out about 2 feet apart, the ground pressed around the roots, and watered freely.

TO GET LARGE BLOOMS—After the young plants have grown 12 inches, pinch them back about 4 inches, then each plant will send out from 3 to 4 stems. In order to give strength to the flowers, mulch, or cover, the ground with a layer of from 1 to 2 inches of decayed manure. As soon as the buds appear on stems, let the largest remain an pinch off all others. Water freely in the morning. the morning.

DAHLIA CULTIVATION

SOIL AND LOCATION—The Dahlia loves the open, sunny situations and for convenience and ease in cultivation a rich, mellow soil is preferred. The Dahlia possesses a happy and easygoing disposition, and readily adapts itself to almost any soil or situation, except dense shade and wet, sour soil. Dahlia plants or bulbs can be set as soon as danger of frost is over. Young plants or divided bulbs produces larger and finer flowers than large undivided clumps of bulbs.

DIVISION OF BULBS—Dahlia bulbs should be taken out of the ground and divided every year to obtain the best results. In dividing Dahlia bulbs one should be very careful not to pull them apart, but use a knife, and be sure to cut part of the stem with the bulb so as to have an eye on the bulb, otherwise the bulb will not grow.

FOR LARGE FLOWERS—To obtain large blooms or Exhibition flowers, select the largest bud on each stock and pinch off all the rest; by so doing the flowers reach an enormous size.

If troubled with Aphis use Nico-Dust No. 4. For Slugs use Nico-Dust No. 5. (See page 83.)

ROSE CULTIVATION

UNPACKING—Should plants, when received, have a withered appearance, caused by an unusual delay in transit (which seldom occurs), soak them in water for an hour or more, so as to restore

occurs), soak them in water for an hour or more, so as to restore their vitality.

TIME TO PLANT—Roses should be set out when the plants are dormant or when the leaves begin to fall. Planting season begins about November 15th.

HOW TO PLANT—The Rose delights in an open, airy situation; all types are partial to clay loam, but will succeed in any ordinary soil if enriched with decayed manure. Dig up the soil thoroughly to a depth of 12 to 15 inches. When the bush is planted press the soil firmly over the roots. Make a basin around the plant, and water freely to exclude air, and settle the earth.

PRUNING—This operation is best performed during the dormant seasont. Most Roses do better if moderately pruned. We usually remove from one-third to two-thirds of the past year's growth, and all weak or decayed wood should be entirely cut out. As a rule, the more vigorous the variety the less it should be pruned. It is always the new growth which gives the most flowers.

ROSE DISEASES AND REMEDIES

APHIS, OR GREEN FLY—This is a small louse that attacks the young and tender shoots and buds. Nico-Dust No. 6 powdered on the bushes in early morning will kill them. (See page 83.)

MILDEW—This attacks the leaves and they become covered with a whitish mold. If not attended to, mildew will greatly retard the growth of the plant and impair the quality of the flower. Sprinkle with our powdered sulphur. If powdered sulphur is used early in the morning, when the dew is on the leaves, the remedy will be most effective. Otherwise spray with water before using the sulphur, so it will adhre to the leaves. (See page 83.)

ROSE BUG—This little rogue is about the size of a house-fly and crawls out of the ground in early spring; powdered white hellebore, or a solution of whale oil soap are the best remedies.

are the best remedies.

ROSE SLUG—This pest is about an inch long and of a grayish color. It appears early in the spring and feasts upon the opening buds and flowers. (See page 82, 83.)

Where to Plant Flowers---Classified

Quite often we are asked as to what flowers are suitable for planting in certain locations, and as to their most suitable uses. We have therefore classified all the different flowers of which we sell seeds or plants for convenient reference.

Perennials are separated from Annuals, and Bicnnials are classed with the Perennials. Plants that will do well in a shady location we have indicated by (s) after the name, and those that will do well in partially shaded locations are indicated by (ps).

SEED OR GREENHOUSE PLANTS

Asparagus Fern (s) Cineraria (s) Begonia Tuberous (ps) Calceolaria (ps)

Coleus Gloxinia

BEDDING PLANTS, PERENNIAL From 1 to 2 Feet High

Achillea Begonia, Tuberous (ps) Begonia, Vernon Candytuft, Peren-nial Carnation Cineraria (s) Columbine Coreopsis Daisy, Shasta Gaillardia

Geum Lantana

Marguerite Marguerite Carnation Pentstemon Salvia Shasta Daisy Stevia Serrata Stocks, Perpetual Sweet William Umbrella Plant Verbena Violet (s) Wallflower

Asparagus Fern(s) Asparagus Ferrics, Bignonia Forget-Me-Not (s) Kenilworth Ivy (s) Lobelia, Trailing Maurandia Mimulus

Musk Nasturtium Oxalis Portulaca (Rock-Verbena (ps)

CLIMBING VINES, ANNUAL

Balloon Vine Scarlet Runner Bean Canary Bird Vine Cypress Vine Gourds, Ornamental Hardy Jasmine Humulus, or Japanese Hop

Hyacinth Bean Mina Lobata Moonflower Morning Glory Nasturtium, Tall Plumbago Sweet Pea Tecoma Radicans

CLIMBING VINES, PERENNIAL

Ampelopsis, Boston Ivy Australian Pea Vine Bridal Veil Bougainvillea Cinnamon Vine Cobea Scandens Heliotrope

Honeysuckle Hop Vine Kudzu Vine Passion Vine Roses Smilax Trumpet Vine Virginia Creeper Wistaria

FOR DRY PLACES

The following are fairly drought-resistant and may be grown in dry situations, where they will bloom freely with little attention:

Abronia Calla Lily Coreopsis Cornflower California Poppy Gazania Godetia Golden Rod Helichrysum

Lippia

Marigold, French Ice Plant Mimulus Nasturtium Nigella Pelargonium Pentstemon Petunia Scabiosa Shirley Poppy Fuchsia

CUT FLOWERS AND GREENERY

The following plants are well adapted for use in a garden when quantities of flowers and greenery are wanted for interior decoration and other purposes:

Geranium

Alvssum Amaryllis Anemone Japonica Snapdragon Asparagus Plumosus Bellflower Bleeding Heart Calceolaria Calla Lily Campanula Candytuft Canna Carnation Centaurea Sweet Sultan Chrysanthemums Clarkia Coreopsis Cornflower Cosmos Cyclamen Dahlia Delphinium California Poppy Everlasting Flowers Feverfew

Gaillardia

Gerbera Geum Gladiolus Godetia Gypsophila Heliotrope Heuchera Hollyhock Hydrangea Ixia Larkspur Marguerite Marigold Mignonette Mimulus Forget-Me-Not Nigella Nasturtium Pansy Pentstemon Petunia Phlox Pinks Poppy Salvia

Smilax Sweet Pea Snapdragon Statice Verbena Violets Woodwardia Stock Sunflower

HERBACEOUS HEDGE PLANTS

The following plants range from 1½ to 3 to 4 feet high and may be used to give a profusion of color and brightness to a home place; to make low boundary lines between property lines; partially to hide some disagreeable object; to give a touch of privacy about some garden feature; to plant around a vegetable garden to make it more attractive; they are very effective treated as temporary plant material:

Calceolaria Lantana Calla Lily Lavender Feverfew Marguerite **Fuchsia** Pelargonium Rosemary Geranium Helichrysum Salvia Heliotrope

FOR NATURALIZING

Plants that will grow year after year without much attention, and therefore good to naturalize and leave alone:
Aquilegia Iris Pantstemon Aquilegia Bleeding Heart Pentstemon

MOIST SOILS, BOGS, OR EDGES OF WATER

For wet grounds, bogs, or near edges of water the following have been found to be successful:
Calla Lily
Cypress Alternifolius

Pampas Grass
Rudbeckia
Rudbeckia
Watercress Tris

ALMOST CONTINUOUS BLOOMERS IN SOME PARTS OF CALIFORNIA

Flowers from these plants can be had most of the year in some parts of Cali-

fornia: Alyssum Begonia Hollyhock Marguerite Canna Carnation Lantana, Dwarf California Poppy Pelargonium Pentstemon Petunia Primula Shasta Daisy Feverfew Geraniums Snapdragon Stoksia Geum Gerbera Statice

ROCK GARDENS IN SHADE

A selection from the following will enable one to bring into the garden some of the dainty beauty of wildwood plants:
Aquilegia
Heuchera
Myosotis
Myosotis
Aslands
Forget-Me
Oxalis
Phlox
Phick

Primula

FOR SHADY PLACES

Plants such as these that grow freely in the direct rays of the sun in middle California require shade in southern California and must be protected from the summer sun of the Sacramento and San Joaquin Valleys. Therefore, plant them under lath-houses or in the shade of trees or on the north side of a house:

Agapanthus

Foxglove
Alvssum

Heuchera

Agapanthus Alyssum Heuchera Anemone Aquilegia Larkspur Lily of the Valley Asparagus Aspedestra Mimulus Myosotis Oxalis Begonia Daisy Pansy Pentstemon Calla Cineraria Cyclamen Paeony Primula Cyperus Bleeding Heart Salvia Wallflower Digitalis

ROCK GARDENS IN THE SUN

Abronia Alyssum Gazania Geum Helichrysum

Liliput Zinnias Nemophylla Pentstemon Portulaca Santolina

Scabiosa

Schizanthus

Shasta Daisy

The Planting Calendar

Giving Planting Months for Flower Seeds, Bulbs and Roots

In this table the following seeds may be planted outdoors in the Fall: Cactus, Campanula, Canterbnry Bells, Delphinium, Dianthns, Hollyhock, Larkspur, Pansies, Pentstemon, Sweet Peas. For all other varieties the Fall period is for planting inside in boxes to give the plant growth for transplanting outdoors in the Spring after all danger of frost is over, and the Spring period is for planting out-

Planting Table for VEGETABLE SEEDS AND PLANTS

Quantity of seed, or number of plants required to produce a given number of plants, or sow a certain quantity of ground, with disdances to plant, depth of planting, times for planting and period required for production of crop.

This table is for plants. If you use seed, drop two or three seeds where you would use one plant, then thin out later if necessary.

	Quantity of Seed Required	Distance A	part for Plan	nts to Stand	Depth of Planting	
Kind of Vegetable	to Produce a Given Number of Plants or Sow a Certain Quantity of Ground	Rws. Apt. Florse Cultiv'tn	Rws. Apt. Hand Cultiv'tn	Plants Apart in Rows	(Note— See below)	When to Plant Ready for Use After Planting

RUIT TREES PLANTING PRUNING

PLANTING—The holes should be dug at least 8 inches to one foot larger in every direction than required by the roots when spread out in their natural position; top soil should be broken down from the edge, and raised to a cone in the center of the hole to set the tree on, and the roots then brought to their natural position; then carefully shovel in the top soil (which should be made quite fine) between the roots until covered; then tramp firmly as the filling up progresses; when nearly all filled in, place two inches of fine soil on top.

TIME TO PLANT—Generally speaking, last half of December.

place two inches of fine soil on top.

TIME TO PLANT—Generally speaking, last half of December, all of January and February, is the best time, but good results may be obtained from March and even April planting. Depends on the rainfall in early fall and late spring.

FERTILIZE—If soil requires it, use fertilizer, the safer way being to use a mulch, or scatter on the surface after planting; then cultivate in if a commercial fertilizer is used. In no instance put manure in the hole when planting, as it will burn the roots.

PROTECT TREES—The "Yucca palm fiber" tree protectors are the best, as they are easily put on and will last a long time. Most orchardists advise use of some protection around young trees when planting out.

ond year after planting, but not in paying quantities.

HOW TO PRUNE

The tops should be shortened in, more or less, depending on the size, variety and condition of the trees. In commercial orchards one-year-old trees are cut down to from 18 inches to 2 feet above the ground, and all the side limbs are cut to one or two buds; two-year-old trees with formed tops should be shortened in from 6 inches to 1 foot of main stem. No Summer pruning should be done the first year; strong growing side limbs on lower part of the tree can be shortened in from 6 inches to 1 foot from stem, so that the leaves left will shade the trees.

APPLE AND CRABAPPLE—Trees should not be allowed to carry too many branches, and pruning will largely consist of thinning out surplus shoots, and removing interference between branches. It is not desirable to shorten-in the Apple, as is done with the Apricot and Peach.

APRICOTS—The practice is to remove half or two-thirds of the new growth and thin out by removing enough new and old wood to prevent the tree from becoming thick and bushy.

ALMONDS—The tree should be headed low and pruned during the first three years to secure a shapely, strong tree. After the third year little pruning is required except to thin out objectionable branches by Winter pruning.

CHERRY—The Cherry tree may be pruned the same as any other deciduous fruit tree, until it is about five years old; after that the less pruning the better.

FIGS—After getting the general shape of the tree, there is little need of pruning except to remove defective branches or those which cross and Interfere with each other. It is better to remove branches entirely than shorten them, or, In shortening, always cut to a strong lateral. Stubs left in pruning are very undesirable.

ORANGE—LEMON—POMELO—The Orange tree is more discrete.

ORANGE—LEMON—POMELO—The Orange tree is more disposed, naturally, to assume a good form than most other trees, and for this reason it requires as little pruning as possible. Overcome the tendency of the young trees to run long shoots, which interfere with irrigation and cultivation. Remove defective branches and those which will cross and interfere with each other. PEACH AND NECTABINE—The Peach, fruiting only on wood of the previous year's growth, bears fruit farther away from the body of the tree each year, and the small shoots of from one-eighth to three-sixteenths in diameter begin to decline when the fruit is removed. To have healthy growth, all of these small branches must be removed.

PEAR—Prune straggling branches; thin out so that the -LEMON-POMELO-The Orange tree is more ORANGE

branches must be removed.

PEAR—Prune straggling branches; thin out so that the branches will not wind around each other, but don't cut the top. The more you cut the more wood you get. After the tree comes into full bearing it is plenty of time to head back.

PLUMS AND PRUNES—The annual growth must be shortenedin every Winter from one-half to two-thirds, and all laterals and fruit spurs must be cut back at every pruning.

CHESTNUT—PERSIMMON—POMEGRANATE—QUINCE—Re-

quire practically no pruning, except to remove defective branches and those which interfere with each other.

WALNUT—All the pruning needed is to obtain the general shape. Whenever shoots are killed back by frost or by sunburn, they should be cut off cleanly below the black mark which shows how far the injury has extended. If this is done, the die-back down the branches is usually prevented.

How To Bud and Graft A Few Simple Rules for the Home Gardener

The mention of budding and grafting to the home gardener immediately opens up a vision of something at once so complicated and out of the ordinary that only an expert in this particular line should attempt it.

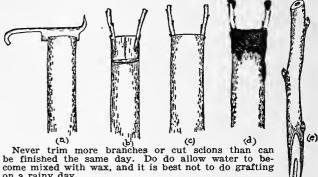

line should attempt it.

A few simple rules that anyone can easily understand, and a few experiments will convince the most skeptical that with a little care the calling in of an expert is not at all necessary.

The first fact to be borne in mind is the proper time to bud

GRAFTING

Grafting Fruit or Nut Trees in California must be done when the trees are dormant. This is usually any time between December and February, according to the section of the State.

come mixed with wax, and it is best not to do grafting on a rainy day.

One graft or scion to a 1-inch llmb, or 3 scions to a 3-inch stub ls a good rule to follow.

First select the scions, which should have three or four healthy buds thereon, and shape as in Fig. (e), being at the base in the form of a wedge or like the letter V.

Next select the tree upon which the graft is to be made, being sure to select a healthy limb. Saw off with a sharp saw from 6 inches to 2 feet from the main trunk. Then take a grafting knife and make a clean cut as in Fig. (a) in the illustration above, about 3 inches deep; spread the cut with back hook of grafting knife to allow insertion of grafts as in Fig. (b), which for convenience sake has been shown as though a section of the tree had been removed, making sure that the wedge is just below the upper surface of cut. Figure (c) shows the grafts as they actually appear.

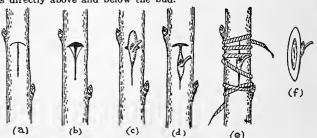

The next step is to cover the tops of grafts and stump of branch

The next step is to cover the tops of grafts and stump of branch with grafting wax of best quality, as shown in Fig. (d), filling the cut across the end of limb and along the side following the cut, to exclude the air, so the scion or graft will not dry out, and be given a chance to grow.

BUDDING Budding should be done in the spring and summer, when the bark can be separated.

First prepare the bud as it appears in Fig. (f) as shown in the illustration below; next select the branch on which the bud is to be inserted. It is always well to select the bud from a healthy tree or branch and, of course, to select a healthy limb for the incision.

With a budding or other sharp knife, make a T-shaped incision a little longer than the bud, in the bark of limb, in a smooth place of bark on the parent tree, as shown in Fig. (a); next roll back the bark as shown in Fig. (b); then insert bud as in Fig. (c); gently press bud down into the incision until firmly placed against the inner wood as shown in Fig. (d); next tie securely the bud and bark with twine, starting above the bud and working downward, as shown in Fig. (e), making sure that the twine is directly above and below the bud.

Cut string in two to three weeks, before the string shows signs

Cut string in two to three weeks, before the string shows sight of abraising the bark.

You may grow several different varieties of fruit on one tree, but always remember that a stone fruit can only be budded or grafted on a stone fruit tree.

Roses should be budded after the spring blooms have died down, but may be budded all through the active growing season. Why not have more roses? You may have a dozen different wrights of roses on one hush varieties of roses on one bush.

HOW to GROW Velvety Lawns

SOW ANY MONTH—Lawns can be made in California any month in the year, but if made from September to May will require less care and water. The ground should be well prepared. The soil should not be too rich, as at the start a rapid growth is not wanted from Grass sowed for lawns.

PREPARATION OF SOIL—After the ground is thoroughly worked, roll the soil before seeding to prevent the soil from setting uneven. After the soil is rolled, then rake the surface lightly. Sow the seed so as to cover the ground thoroughly with seed. After seeding cover seed lightly with soil. Then roll again so as to press the seed in firmly. If you have no roller use boards and tramp on them so as to pack the ground firmly. A roller is preferred. If you do not pack the ground firmly the seed will grow in spats and the movem will min the lawner agreement of the soil in spots, and the mower will ruin the lawn on account of the soil being loose.

being loose.

KEEP NEW LAWNS MOIST—Grass Seed will germinate in from 8 to 15 days, according to the weather. If a lawn is made during the Summer, after the seed has been rolled, the ground should be covered lightly with straw or grass or pine sawdust so as to retain the moisture. New lawns should not be allowed to dry out, not even for half a day. For the first 15 days the lawn should be watered twice a day if it is required.

FERTILIZE TWICE A YEAR—A lawn should be fertilized after the first cutting. If these directions are carried out, the seed will quickly produce a firm, deep, velvety and elastic turf, with no tendency to stool or grow in clumps. It roots deeply and holds its beautiful emerald green color throughout the season. To keep this beautiful color, lawns should be fertilized with Groz-it or Bone Meal in the Fall or early Spring—or Ammo-Phos in Spring. If stable manure, which is often full of weed seeds, is used, it will cost more to remove the weeds than to put in a new lawn. cost more to remove the weeds than to put in a new lawn,

THE SEED TO SOW-SEE OUR LIST OF GRASS SEEDS, PAGE 24

LAWN DRESSING-Lawn Dressing is more effective when used after sundown and immediately watered, so as to force the dressing to the roots of the grass. If Lawn Dressing is put on during the heat of the day and not immediately watered, the lawn will be damaged by the chemical which is contained in the dressing. If you follow these directions, you will have a beautiful lawn. Use 2 to 21/2 pounds of Lawn Dressing to 225 square feet.

MAKE YOUR OWN LAWN ROLLER

You sometimes envy people with velvety and level lawns, and quite often the reason they are level and look so nice is beause they are rolled with a lawn roller.

Lawn rollers are an expensive luxury, but you can easily

Lawn rollers are an expensive luxury, but you can easily make one at little cost.

Take an old galvanized iron hot water tank, have your plumber cut the end off, making same from 3 to 4 feet wide tilt same on end, make a core of iron pipe 1 inch in diameter, place in center, then fill with concrete and let harden. Next take %-inch iron gas pipe and pass through core for an axle and with elbows and more %-inch pipe make sides and handle to push same back and forth. Sprinkle lawn, then use roller.

HELPFUL GARDEN BOOKS

Dependable garden information both general and specialized compiled by experts (Order from Navlet's Book Department)

- THE NURSERY MANUAL, by L. H. Bailey. Indispensible to everyone who propagates plants. Contains an extended alphabetical list of plants with full indications under each one for propagation, whether by seeds, layerings, cuttings, buds, grafts, or otherwise. Gives an invaluable account of the main insects and diseases and how to control them. 240 illustrations. 456 pages ..
- AROUND THE YEAR IN THE GARDEN, by F. F. Rockwell. Because the time when you do your garden work is so important, you need a regular schedule. This book gives you complete information on every garden problem, outlined week by week, and written by a practical gardener. 88 illustrations, 350
- THE GARDENER, by L. H. Bailey. You get full advantage of Dr. Bailey's unequaled knowledge and experience in this book. It tells how to grow flowers, vegetables, and fruits from the time of planting through to maturity. Special articles on different types of gardening. Information that is easy to find and simple to use. 116 illustrations, 260 pages................................\$2.00
- MANUAL OF GARDENING, by L. H. Bailey. You can depend on this book to supply you with complete and practical information on planting and landscaping your home grounds. Tells how to make the most of natural features; how to drain, cultivate, and fertilize the soil; how to propagate, transplant, prune, and graft the different classes of fruits, vegetables and flowers. Olives lists of varieties suited for different purposes.

 \$3.60
- PLANT NAMES, by T. S. Lindsay. If jaw-breaking plant names puzzle you, this little book will make the system and the reasons clear. It tells how plants are named, why they are named as they are, and just what each word form, prefix or suffix as they are, and means. 99 pages...
- CALIFORNIA GARDENS, by W. S. Dobyns. Two hundred and twenty beautiful photographs illustrate the most interesting features of California's finest gardens, with text on landscape, architecture and gardening as it is practiced.......\$5.00

- SHRUBS—By F. F. Rockwell. Here is brief but complete and usable information on the best ways to improve the beauty and value of your home with shrubs. Tells what to select for different combinations and effects, and how to plant, water, mulch, prune, and care for shrubs. 49 illustrations, 75

- THE BOOK OF BULBS, by F. F. Rockwell. Will help you grow bulbs successfully for Spring, Summer, Fall and Winter flowering. Inside and outside your home. The information in this book tells, and its pictures show how to grow 70 different bulbous plants including tulips, daffodils, hyacinth, lilies, gladiolus, dahlias, peonies, irises, begonia, cannas, bloodroots, and dozens of others. Recommended as the most complete and newest guide to bulb growing. 187 illustrations, 264 pages \$3.00

- LAWNS, by F. F. Rockwell. You will find use for this information year after year, for it shows both how to start a lawn right and how to keep it smooth and velvety thereafter. Full of suggestions on laying out the lawn, grading, fertilizing, planting, care after planting, weed and pest control, and remaking and repairing old lawns. 39 illustrations, 87 pages...\$1.00
- PATIO GARDENS, by Helen M. Fox. Spanish gardens offer many opportunities to gardeners all over the United States. This book contains accurate descriptions, pictures and plans of patios, pools, flowerpots, balconies, stairways, fountains, tiles, and wrought-iron with clear-cut suggestions for their use in your own garden. 98 illustrations, 247 pages, beautifully bound
- THE CACTUS BOOK, by Dr. A. D. Houghton. Just select the right kinds and you can grow cacti in any climate and under any conditions, with flowers up to a foot across and sometimes 200 blooms on a single plant. This book tells you which cacti to seed, hybridize, make cuttings and grafts, and everything else connected with successful cacti growing. 18 illustrations, 145 pages \$2.25
- CANARY BIRDS, by D. L. Burkett. A complete guide for their breeding, rearing and treatment in health and disease. A book for beginners and experienced canary keepers. A book for every home where a canary is kept

ROSE BARGAIN

12 GRAND ROSES

Grown in Our Own Fields, Budded

Nο Two Alike \$3.75 2 Yr. Old Field Grown

(Delivered Free)

These 12 Labeled Varieties—Read Them!

TALISMAN—Brilliant orange-red buds, opening to a large, fragrant, high pointed bloom of golden yellow, stained with copper-red and orange rose on inside petal.

VILLE DE PARIS—A clear sunflower yellow that does not fade. Very long stems, almost thornless, with vigorous, glossy, reddish green foliage.

DUCHESS OF YORK—Flowers large and very full. Bud a deep golden yellow, opening to a shrimp pink center with gold base.

MAUD CUMMINGS—Flowers a rich peach-pink, shaded with coral. Buds are long and tapering. Vigorous bushy grower and heavy bloomer.

DAME EDITH HELEN—Bright pink rose, large and perfectly shaped. Heavily perfumed. Bloom abundantly, with long, shaped. Hear strong stems.

CUBA—Produces enormous semi-double blooms of a blazing red-orange. Very showy in the garden. Strong, vigorous plant with excellent foliage.

HADLEY—Deep, velvety crimson flowers, very double, and extremely fragrant. Flowers early in the Spring, and blooms profusely. Always popular garden favorite.
 MRS LOVELL SWISHER—One of the newest varieties, with immense flowers, very heavy, in a pale flesh pink. Fine grower, with strong, erect stems.

GOLDEN EMBLEM—A beautiful, clear yellow, occasionally flaked with coppery orange on outer petals. Beautifully shaped buds, glossy green foliage.

LOS ANGELES—Luminous flame pink, toned with coral and shaded with gold at base of the petals. Blooms continuously, with long stemmed flowers.

MRS. CHAS. RUSSELL—Brilliant rosy carmine with rich scarlet center. Very large blooms, beautifully formed.

INDEPENDENCE DAY—Sunflower yellow buds overlaid with apricot, the colors blending as the bud develops. Graceful, oval buds with well formed flowers.

For regular list prices and other varieties of Roses, turn to pages 44 to 49.
